FRESH PERSPECTIVES

Fall colors brightened the campus as we traveled to classes or relaxed with friends on the lawn of the University Center.

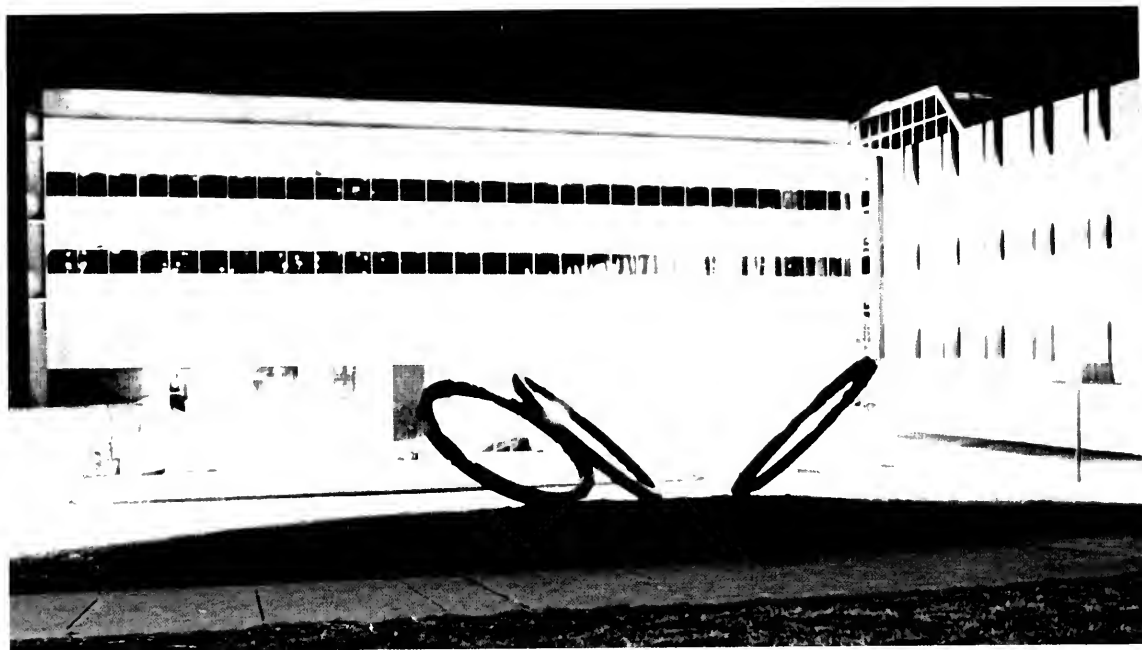

EDITOR-IN-CHIEF

Howard Herrera

Ellen Villegas

View The Scenes

It could have seemed like just another year. Seasons came and went. We achieved, competed, and celebrated as thousands had before us. But fresh perspectives revealed that the year was unlike any other.

Time spent studying for tests, adjusting to new lifestyles, or dealing with problems often distracted us from realizing that surroundings, people, and events had unique and special effects. New outlooks revealed often unnoticed images that left indelible impressions on those who had noticed them; the outlooks that we have chosen created a distinctive campus personality.

Through both joy and tragedy, we often overlooked the beauty of campus. The time taken to view the scenes from new angles lifted our spirits and made us proud to be a part of Lehigh. Whether it was the nighttime glow of Mart Library, the comforting shade of towering trees, the peaceful interior of Packer Chapel, or the sunlit lawn of the Alumni Memorial Building, we felt a serenity that gave purpose to our lives at Lehigh.

Find The Spirit

No one had to look far to find the spirit; it was behind everything we did. The Lehigh spirit motivated us to succeed, rejoice, and win. As we reveled in the glory of victory, partied till the sun came up, and endured through pressure, our spirit bonded us in a sense of identity. And although spirit was sometimes unnoticed, fresh perspectives revealed that it was always present.

Nowhere was spirit more alive than in faces and scenes around campus; our involvement brought spirit to life. Katie Zilligen, a sophomore cheerleader, exuded spirit even when she wasn't cheering. It lingered in the eyes of sophomore Vanessa Cordero as she played with a puppy. Surrounded by the crowd, that one fan still exploded with spirit. And both a soccer game from a new view and the expression on senior Melissa Capuano proved that the Lehigh spirit never faded.

Create The Mood

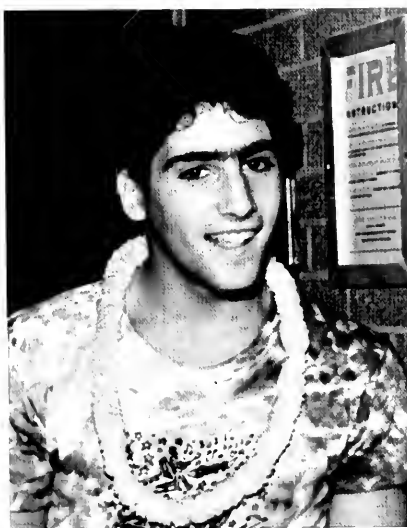

A sense of pride in tradition and a feeling of strength in unity helped to create the mood that gave our campus a unique personality. Through fresh views of the people and environment, we realized that we all inspired the mood. Our emotions and attitudes were not constrained; they radiated over campus. In victory, we celebrated; in defeat, we persevered. In despair, we united. And in happiness, we smiled.

The campus, always integrating tradition with innovation, held a history that never disappeared. The modern buildings on lower campus represented continual progress without diminishing the tradition symbolized by both the gothic architecture of Underman Library and the English tudor style of Coppee Hall. Laughter, seen on the faces of Karyn Yost, an alumnus, and Anne Sapir, a senior, created a lighthearted mood. As the football players battled for another weekend, fans and cheerleaders alike rejoiced; in victory or defeat, we were still proud. Through everchanging seasons our moods ranged from joy to sorrow, and the flag continued to wave.

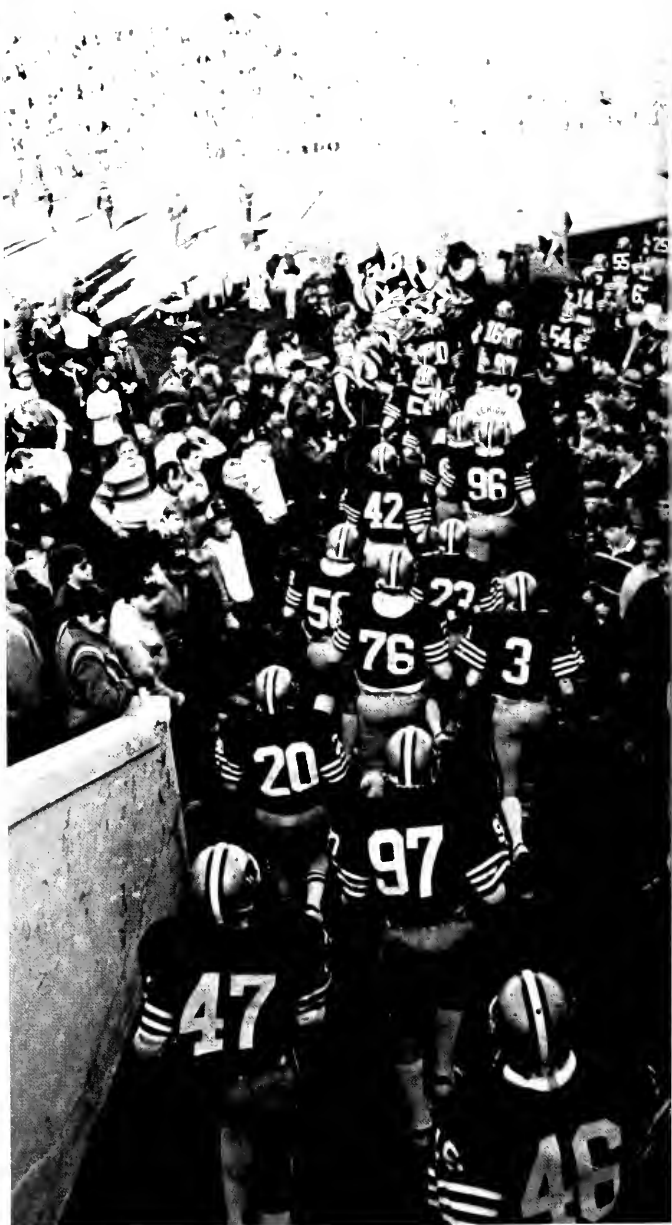

Celebrate The Colors

When we opened our eyes to fresh perspectives and found value in images that had gone unseen, it was easy to celebrate the colors. They brightened our days and lifted our spirits. And they were everywhere. Red and silver, reflecting off an enormous balloon held by a spectator, sparkled in the sunlight, and the kaleidoscopic T-shirt on freshman David Eisenbud brought radiant color to his hair. A bright blue coat added color to an otherwise gloomy Parent's Weekend football game against Rhode Island. On the opening day of Alcohol Awareness Week, held in October, sophomore Marnie Lieberman held a rainbow in her hand as brilliant balloons decorated the University Center lawn. And our best known colors, brown and white, appeared on everything from uniforms to sweatshirts, like the one worn by freshman Stacey Stabile.

We had every chance to live the tradition as countless others had before us; our involvement made us a part of Lehigh history. Yet, new perspectives revealed that we added unequalled spirit and lived tradition like others never had. For the 121st time, we battled Lafayette in college football's most played rivalry, and, although we triumphed over the 'Pards on that spectacular November 23rd afternoon, it was our determination, spirit, and unity, not the score, that made the event memorable.

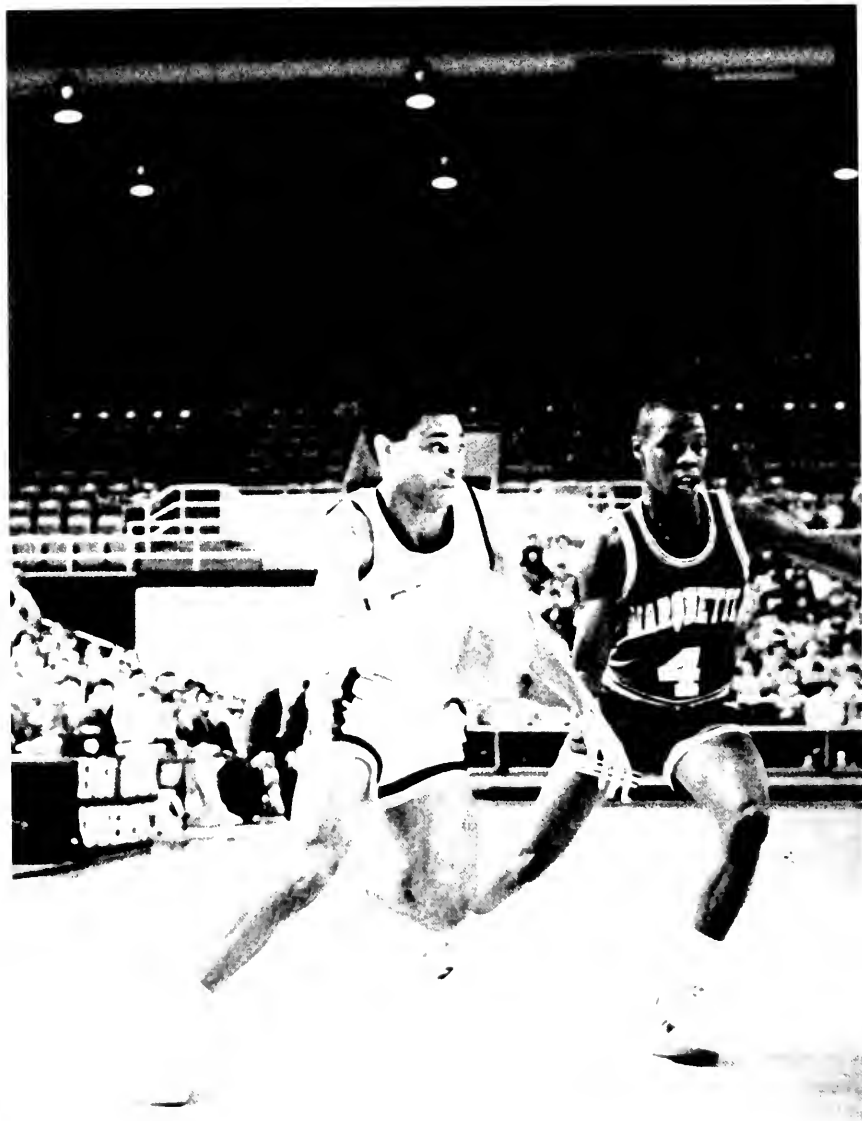

Traditions highlighted the weekend as fireworks brightened the night sky, and the bonfire blazed once again. In the roar of the fans, alumni, players, cheerleaders, and band we still gained attention with our own spirit. Steve Gross, a junior, donned a clown wig and Lehigh cap to become a part of the tradition. The raised fist of sophomore Michael Cazer symbolized his determination to get a piece of the goalpost and live the tradition. Seniors Rich Smith and Scott Sendel exposed the colors under their uniforms in another effort to live tradition.

Live The Tradition

Watch The Action

It wasn't enough to know the score. To get the full effect of competition, we had to watch the action from different angles. Only then could we realize the strength, ambition, and unity that were crucial elements in our victory. Success brought celebration; failure taught perseverance. And through it all, we remained proud.

A close-up view of the action let us catch unforgettable images. We could remember the expression on senior Vernon Doswell's face as he fended off the competition to score another basket. We could feel inspired by Eyvind Boyesen, a junior, being coached by Thad Turner, or we could notice the determination with which senior Kerry Ritrilevi attempted to take down another opponent. Off the mat or the court, we saw our spirit and pride reflected in the faces of freshman Stacy Bean and other spectators as they cheered our teams to success.

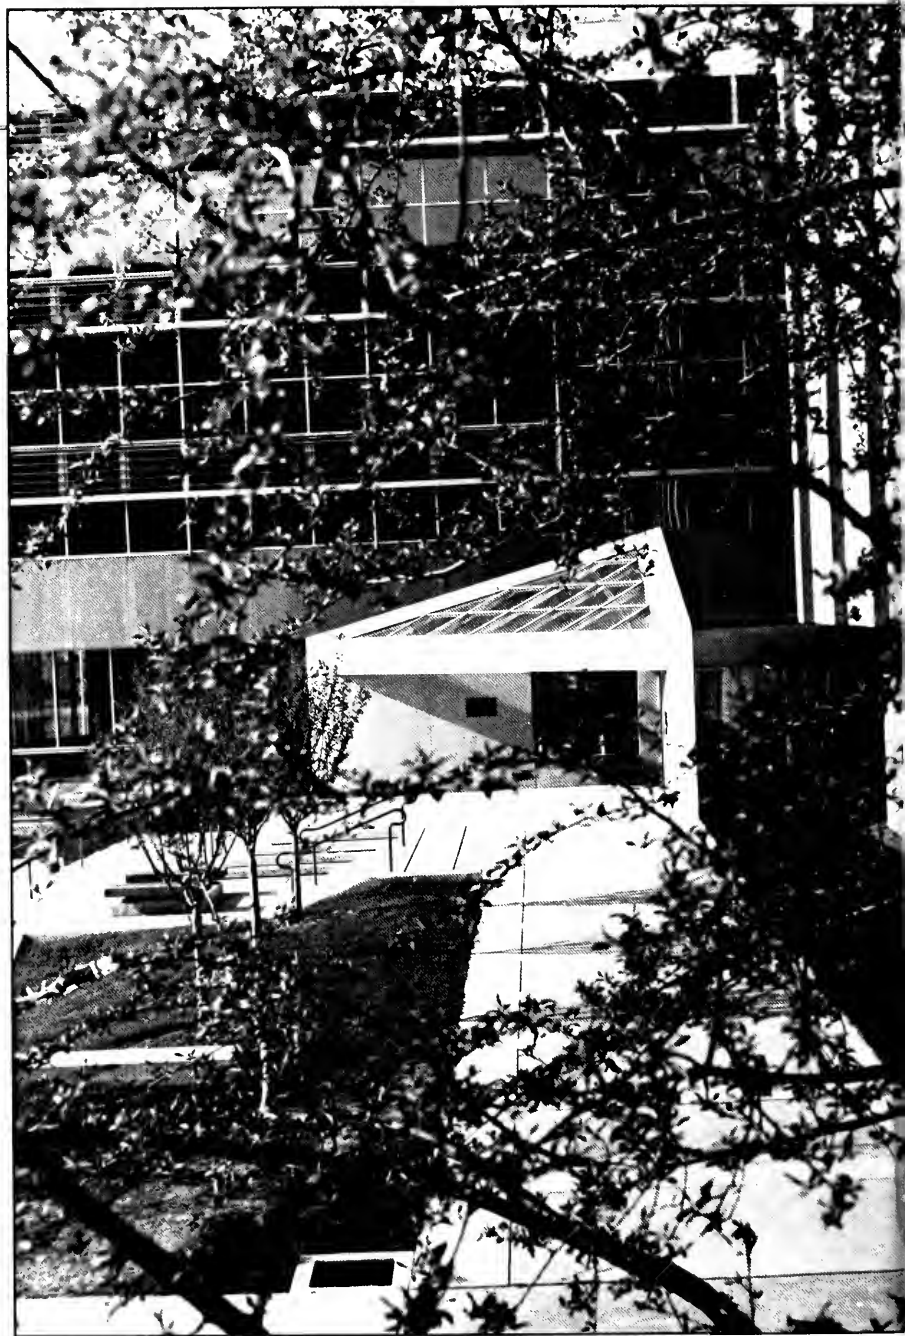

Catch The Stars

Taking a break from studies, athletics, or parties, we found time to catch the stars who appeared in the spotlight. Nancy Wilson lead the group Heart through songs that included "Never" and "These Dreams." In a year of big name performers, undoubtedly the most famous was Sting, who captivated the crowd with his stage presence and sang "Fortress Around Your Heart" and "If You Love Somebody" among other hits. James Taylor, who appeared in October and was the first performer of the year, brought some to tears with mostly mellow songs that included "You've Got A Friend" and "Going To Carolina". The rock group Night Ranger performed for a crowd of 2,200 in Stabler Arena, and Chuck Mangione, Grammy Award-winning jazz artist, played before a huge crowd in Grace Hall. Both Anne Murray and Amy Grant, though less famous to the Lehigh crowd than other headline acts, illuminated the stage with their presence.

LEHIGHLIGHTS

Some things never seemed to change. Seasons passed, and students continued to celebrate traditional holidays and events.

Yet, it took fresh perspectives to realize that students transformed typical highlights of the year into unique Lehighlights. Nothing could match the spirit and pride of students as they participated in University Day on the UC lawn, put on costumes and traveled on the Hill for Halloween, witnessed the victory against Lafayette, or let off some steam during Greek Week.

Mart Library, in all the glory of its glass and chrome, dethroned gothic Underman as the hot spot for socializing and studying. Mart became an important part of student life and one more Lehighlight when viewed from a new perspective.

Leaves, clothing, and balloons provided a brilliant backdrop for the activities that kicked off a new year.

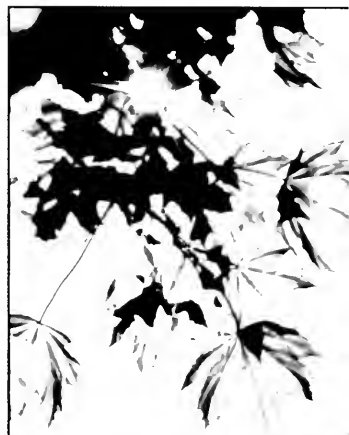

In August, members of the Gryphon society and the New Student Orientation committee showed off the colors of their bright blue and orange shirts during Freshmen Orientation. New students got a chance to get used to unfamiliar surroundings before facing the confusion of registering for classes, buying books, and adjusting to a new

lifestyle. Lehigh life may not have seemed easy, but newcomers adjusted to it quickly. They had to.

Once the fall was underway, colors appeared everywhere. Balloons dotted the UC front lawn during Alcohol Awareness Week, which had been sponsored by the Dean of Students office in October.

Meanwhile, bright warm weather clothes gave way to heavier apparel as students traveled to classes beneath the golden leaves of fall.

WELCOME

Generations of alumni welcomed new students at the annual Freshman Rally held in Grace Hall on August 28th.

On September 5th, everyone was able to participate in

All University Day held on the UC lawn. The event, sponsored by the Student Activities and Residence Hall Councils, featured a magician, a caricaturist, music, games, food, balloons, and an outdoor movie at night.

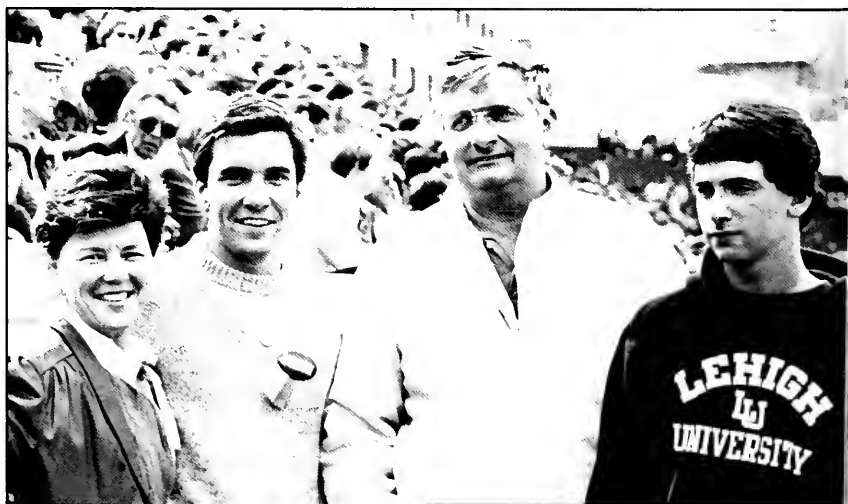

CATCHING FALL

In a place where Fridays could be Mondays and Tuesdays became Thursdays, it was no surprise that Halloween came to Lehigh on the night of November 2nd. Nonetheless, the Hill was crawling with everything from ghosts and clowns to Madonnas and Pee Wee

Hermans. It was a welcome chance to put on disguises and find another reason to have a party.

At the 32nd annual Turkey Trot on November 21st, students and faculty engaged in some friendly competition to celebrate the Thanksgiving holiday.

VISITORS FROM HOME

It was the one weekend of the year that most students had to be on their best behavior. Mom and Dad (and possibly brother and sister) were paying a visit. What could be better than trying to entertain the family for an afternoon?

Other than being with family, the highlights of Freshman and Upperclass Parent's Weekends were the football games. But in both attempts toward victory, the Engineers lost. At the October 12th Rhode Island game fans were subjected to a disappointing 45-38 loss. The November 2nd William & Mary battle saw the Engineers lose again with a score of 31-29. But even the losses did not diminish the joy parents and students felt being together.

FOOTBALL FEVER

Weekends were made for Engineer football. Fans and cheerleaders alike cheered as the Engineers battled. With each touchdown came the familiar sound of the cannon, and, at halftime, the Marching 97 entertained the crowd with its flawless formations.

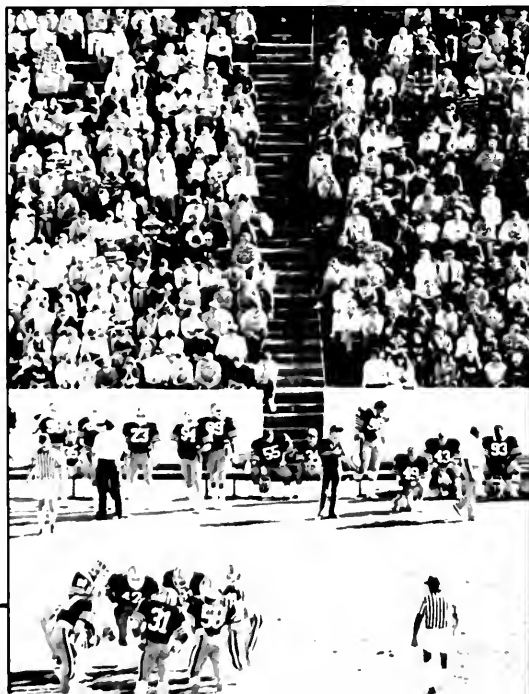

ONE IN EVERY CROWD

The team may have played the game but the fans made it fun. After all, who would even see the team play if fans weren't there to watch?

They crowded the stadium each weekend, inspiring the team to victory and remaining loyal in defeat. Lehigh loyalty was so strong that fans still filled the stands at rainy and cold away games at New Hampshire and Bucknell.

Taylor Stadium was packed to near capacity. A steel fence surrounded the field, two wooden goalposts at either end. Police guards anticipated any conflicts. The team ran onto the field, and the crowd went wild. But it was not just another football game. It was the 121st meeting of college football's most played rivalry against Lafayette.

The game highlighted a week of events in celebration of tradition. And some new traditions gave the celebration a distinct touch, making it a Lehighlight unique from years past. The IFC, RHC, and Gryphon Society sponsored performances

by up and coming comedians in the snack bar each night of the week. The finale to the week of comedy occurred on Friday night when SAC presented a comedy kick-off concert in Stabler arena. Three performers entertained the crowd with improvisation and impersonations. A pep rally followed with members of the team giving their aspirations for the game. The band played traditional fighting songs as cheerleaders threw miniature footballs to the crowd.

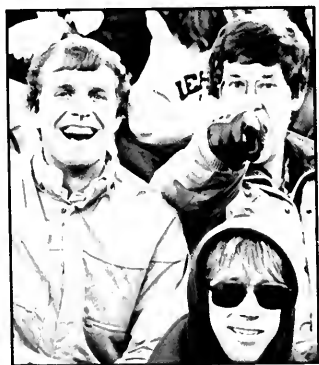

Once outside, the crowd gathered around the blazing bonfire, and for the first time in Lehigh — Lafayette history, fireworks lit the

night sky.

But this celebration would not have taken place if it weren't for the football game itself. More than 17,000 fans crowded into Taylor stadium on the glorious afternoon of November 23rd. Problems with crowd control in the past were alleviated by not allowing people to leave and reenter the stadium once the game began. Alcohol was the only spirit restricted from the stadium, as spectators cheered the Engineers to a 24-19 victory over the 'Pards. Or as the mixed-up buttons worn by fans said, it was the "Pods" who were punted on that spectacular day.

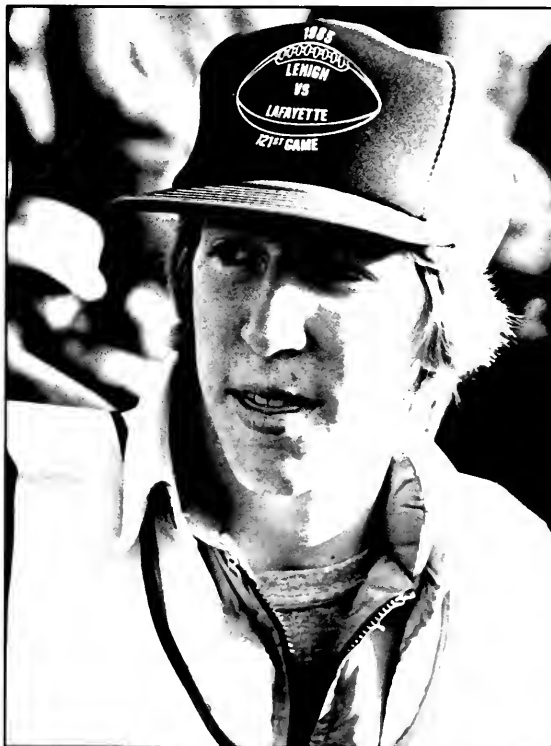

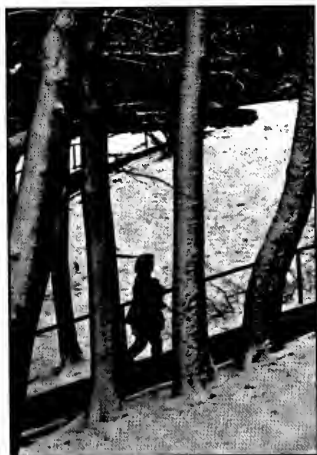

SNAPSHOTS

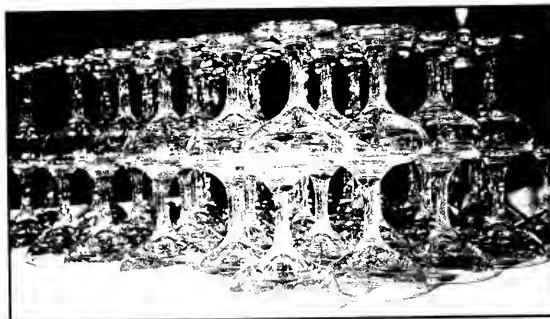

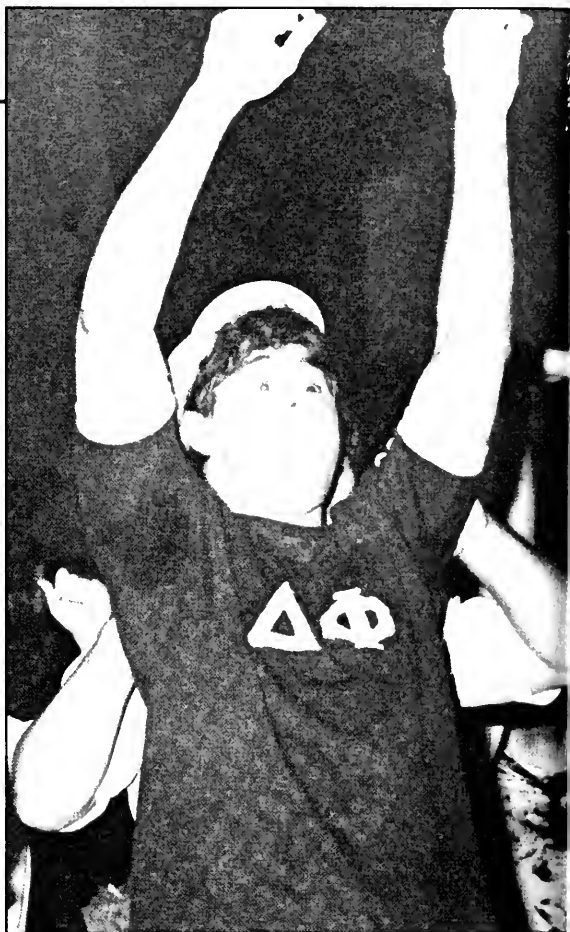

AN AFFAIR TO REMEMBER

Although Taylor College, ROTC, Panhel, and the International Club, among others, held dances, the most popular

was the Presidential Ball, held on April 12th at Stabler Arena, in honor of the inauguration of President Likins.

The week they had been waiting for finally arrived. Once more, traditional Greek Week activities highlighted another spring semester. It was the week to let loose and revel in the glory of pies, greekers, beds, and togas. But fresh perspectives of the week and the people showed that Greek Week 1986 was indeed a unique Lehighlight.

The festivities began with the opening ceremonies in Taylor Stadium on Monday. After speeches by President Peter Likins and IFC and Panhel representatives, the banner procession and toga race took place. Following the race, students participated in a game of "Simon Sez" in the parking lot. Actor Larry Linville, of MASH fame, spoke to a crowd of over 1,100 that night in Grace Hall, which was also the setting for the 2nd annual Dat-

ing Game on Tuesday.

The ever popular pie and grecker eating contests, held in Grace because of the rain, turned into a food throwing free-for-all on Wednesday, but spectators were protected by their umbrellas. On Thursday night, the crowd watched as fellow students dressed up and lip-synched to popular music for the Air Band contest.

As usual, students and alumni crowded the Hill on Friday to view the bed races. Pi Kappa Alpha fraternity won the event, considered to be the highlight of a week of parties and competition.

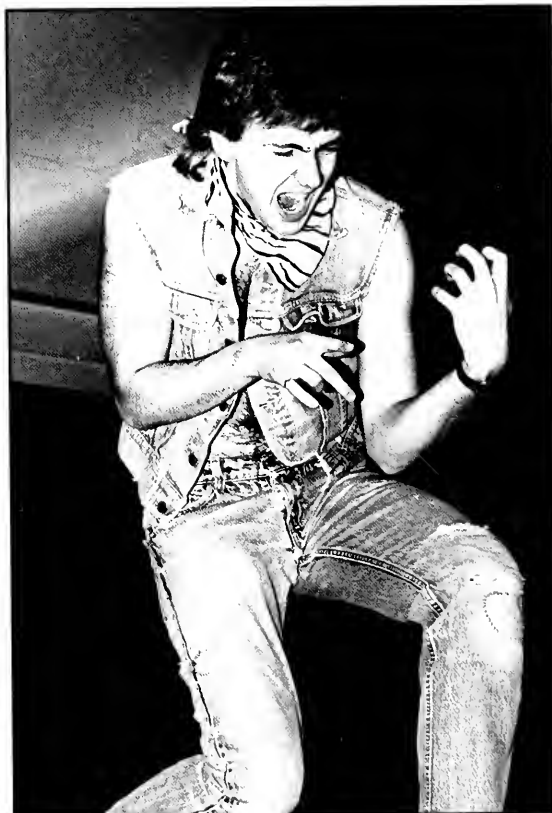

Though the week gave students cause to celebrate, a few incidents of poor behavior cast doubt on future Greek Weeks. But, chances are that Greek Week will return each year to remain a Lehighlight.

IMAGES OF GREEK WEEK

It wasn't just the parties and events that made Greek Week 1986 a unique and memorable Lehighlight. Images of the people who participated in the events reflected the spirit and determination with which students celebrated and excelled throughout the entire year. True spirit

shined as students competed in the toga race, the Air Band contest, and the bed race. Perhaps the best place to look for spirit and endurance was at the pie and grecker eating contest, where expressions were both humorous and inspiring.

TIME TO RELAX

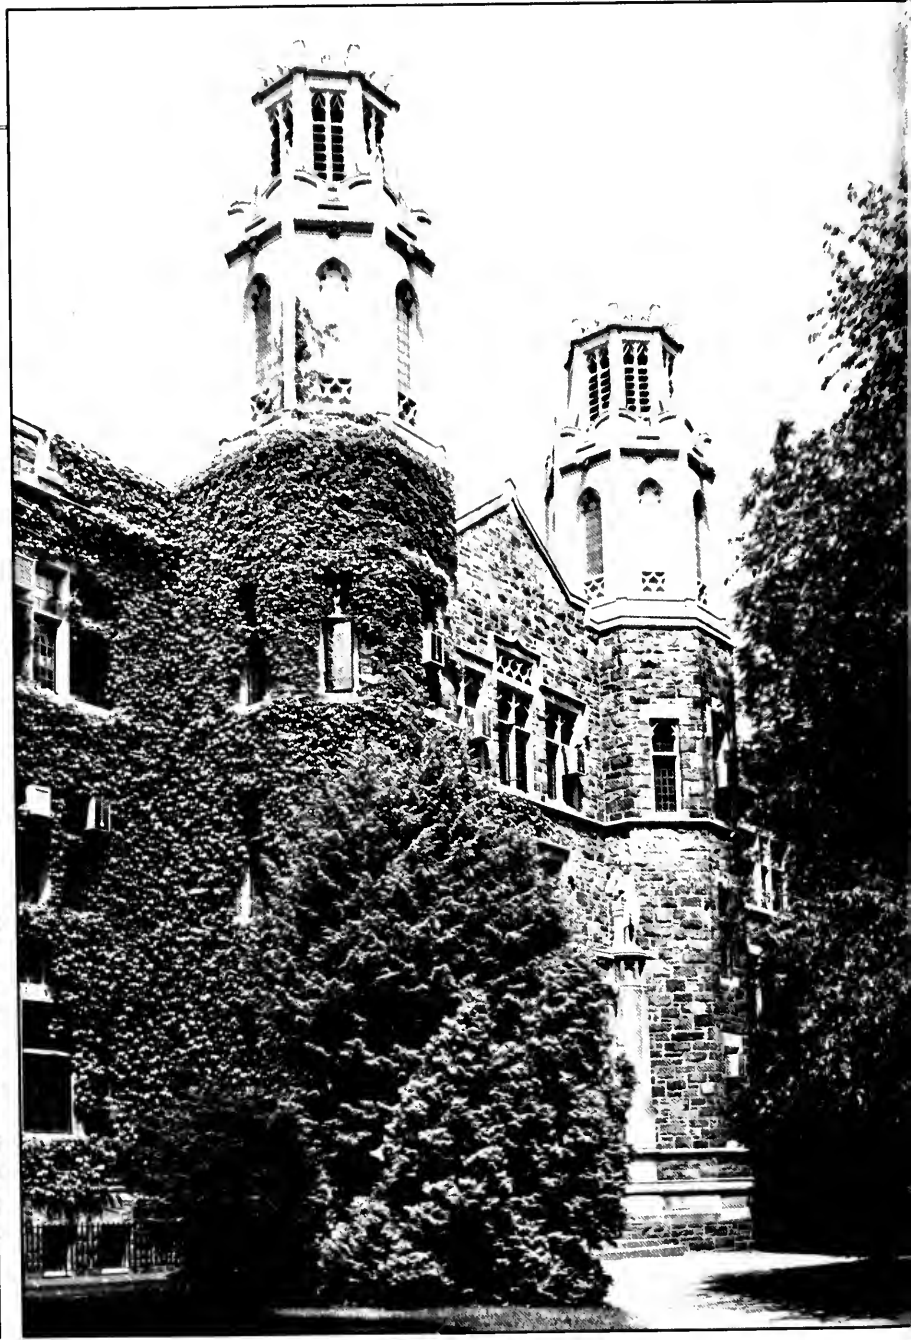

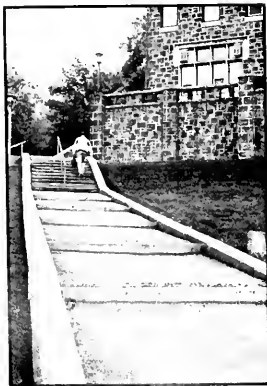

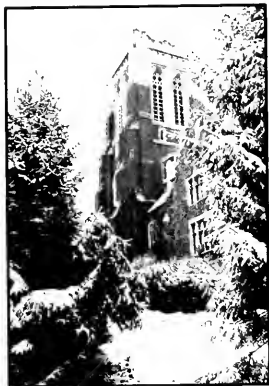

Spring. The time to put away the heavy sweaters and to put on the shorts. The time to relax and take it easy.

Students used every opportunity to get outside. Bright clothes appeared all over campus. Flowers

bloomed as students took a welcome break from the classroom grind. But then, without warning, winter seemed to return as snow covered the campus on April 23rd.

ATMOSPHERE

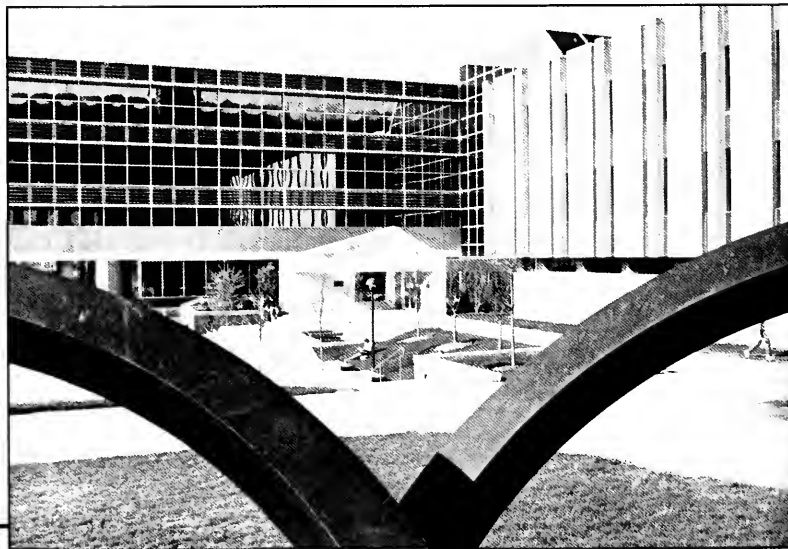

Too often the beauty of campus was overlooked by students as the pressures and events of Lehighlife passed by. But, behind the buildings on campus lies a rich, everlasting history that remains through generations of faculty and students, victory

and defeat, joy and tragedy.

The campus continued to change as technology met tradition. And though some of the buildings were renovated, they all symbolized the strength and determination with which students lived Lehighlife.

MART LIBRARY

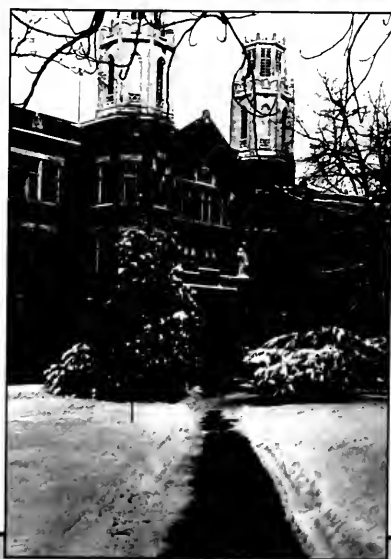

IT'S ACADEMIC

PACKARD LAB

When students remember Lehigh, it is unlikely that their first memories will be of the campus and its buildings, because they never seemed to change. That fact alone made them special; in reality they were always changing. Each building had a personality which survived as decades of students passed. Yet, it was up to them to notice that, among others, buildings like Mart Library and Packard Lab were symbols of academics, though one was modern and the other was historic.

In the year of campus-wide networking and the Physics Building renovation, who would remember that over 300,000 books and periodicals had been moved to Mart or that a new computer card catalog was installed? The system, known as ASA, short for Automated System Access, enabled a person to search the entire library catalog in a matter of seconds. And who would remember that a satellite dish was installed on top of Packard Lab to present video seminars to campus audiences or that workmen put barbed wire on the statues above the entrance so that students would not be able to deface them?

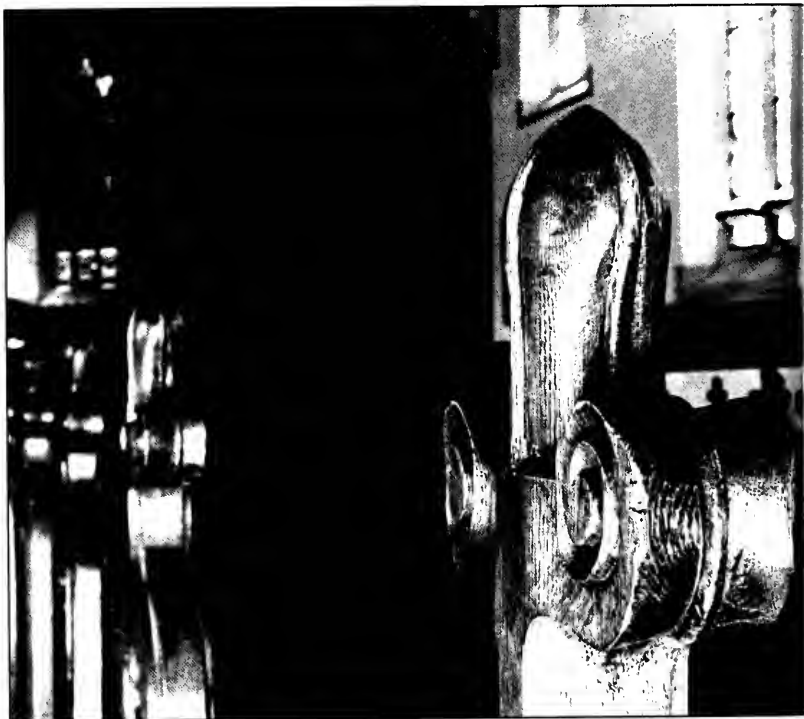

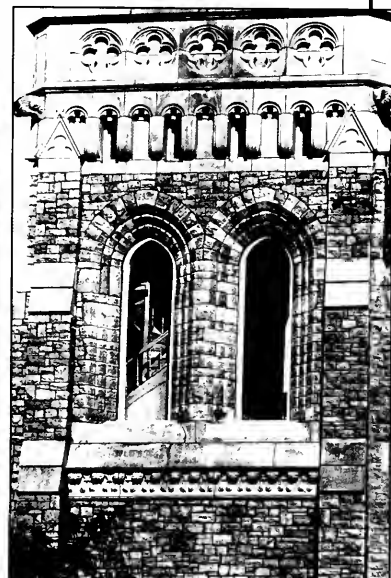

TRADITIONAL BEAUTY

PACKER MEMORIAL CHURCH

Packer Memorial Church, built in 1887, exemplified the dedication with which architects of the past designed their creations. From the carved pews to the intricate door handle, the church held a history waiting to be uncovered. It was the gift of Mary Packer Cummings in memory of her father, Asa Packer, founder of the university. The stained glass window over the main door was attributed to Louis Comfort Tiffany.

Packer was used not only for religious services, but also for choir presentations such as Christmas Vespers. Many alumni chose to be married there. With the addition of a patio that matched the exterior, Packer once again found itself in the Lehigh history books.

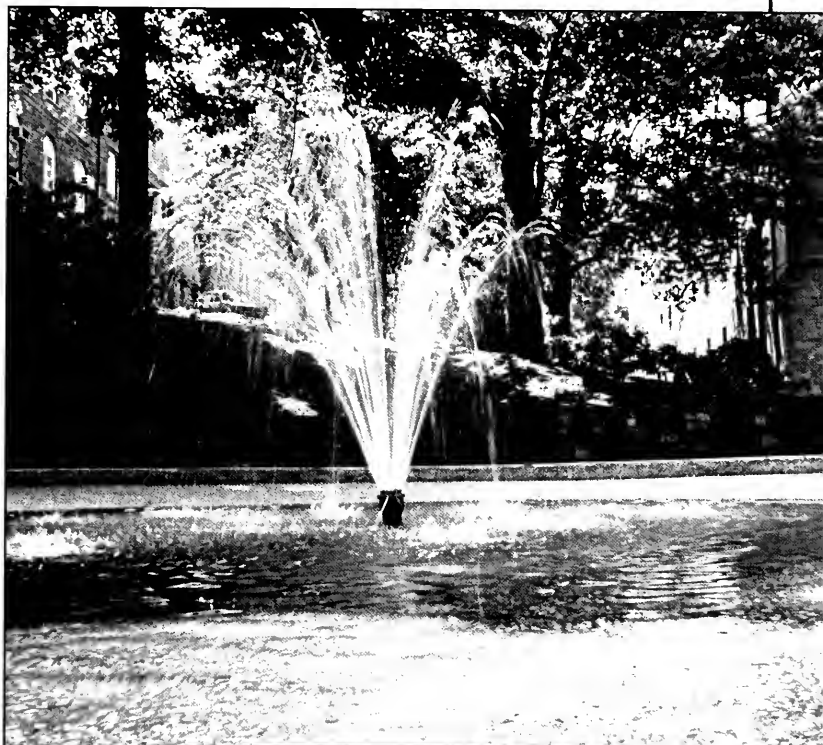

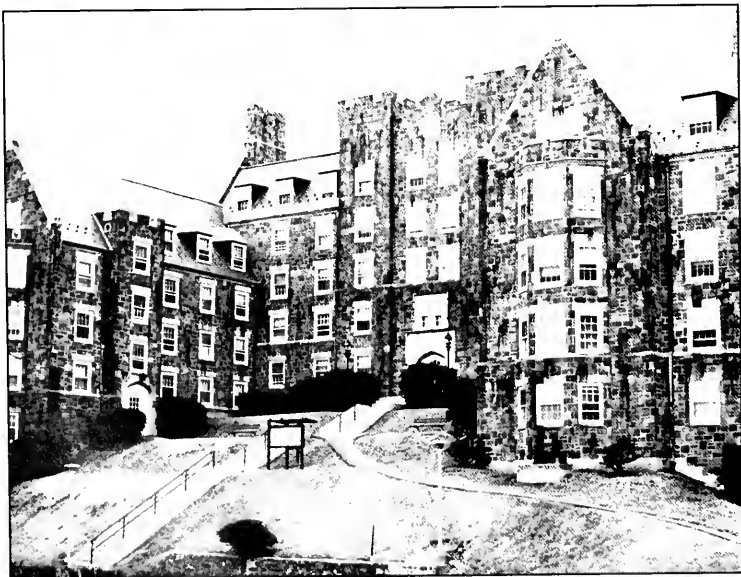

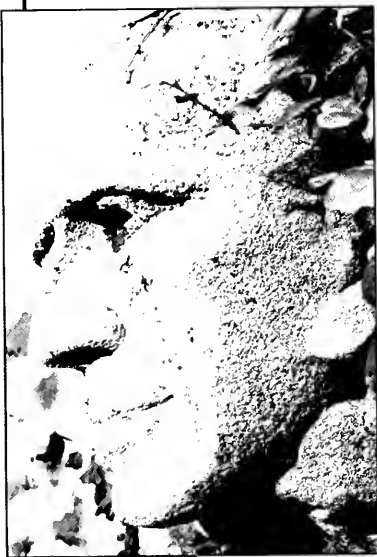

Campus got the best of the seasons. The calm of early autumn turned to the blustery days of late fall. When winter brought snow, the campus sparkled in the glow of street lamps. The long-awaited spring had flowers blooming in brilliant color. But Mother Nature had her strange moments, such as when it snowed — after Greek Week and Spring Break.

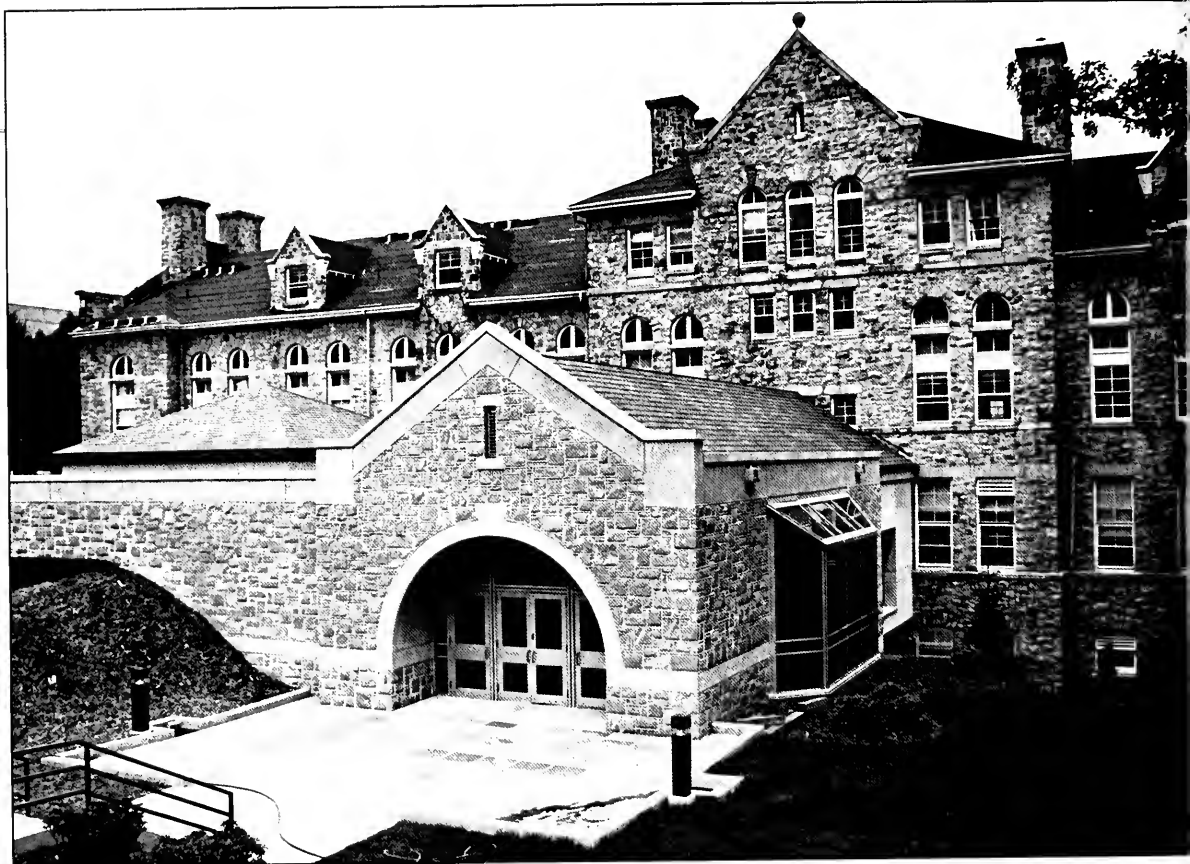

'TIS THE SEASONS

FROM ANOTHER ANGLE

CAMPUSCOPE

... That was it that made this year so different from all the rest? Or was it really "just the same old news?" With all of the aspects of Lehigh life, from academics and living to activities and athletics, students hardly had time to think about how much actually happened in a year. Knowing what was going to take place over the year was impossible. It seemed that only two things were certain: Finals and Lehigh-Lafayette Weekend.

Fresh perspectives of the scope of events around campus proved that the year was unlike any other. They also revealed the effects campus events had on people.

No one could predict the response to the renovations of the Physics building or the makeover of the cafeteria. No one could possibly know that disorderly conduct during Greek Week called into question the future of that tradition

and the new social policy which was trying to survive in its first year. And in the fifteenth year of female students, it was doubtful that anyone stopped to think of how the presence of women had changed the campus scope.

Visiting speakers and performers had their effects on the people lucky enough to see them. Whether it was the mellow music of James Taylor or the hard rock sound of Heart, the audience was always left with indelible impressions. Still, no one could predict these effects.

A look at what was considered to be hot or not gave some insight into both the type of people that populated the campus and the attitudes that they held.

And a brief history of the events on campus and off was evidence that the year was unlike any other from any perspective.

CAMPUS SCOPE

Step Into Tomorrow

With the completion of Super Mart last year, the campus was still in high gear for making changes. In addition to the makeover of the cafeteria, the Physics building received a facelift, and a campus-wide computer network was installed.

The \$4.3 million price tag attached to the renovation of the Physics building included a complete overhaul of the old building, construction of a new lobby, and an addition to the old building which included a new lecture auditorium and a connection between the old building and the Sherman Fairchild laboratory.

The renovations provided a more pleasant working atmosphere. The rooms were air conditioned and better ventilated. Lab facilities were improved, and skylights and glass windows were installed to admit more light so that spectators could watch the lab work.

The Physics building was not the only area to receive a makeover. The Cort Room dining hall in the University Center installed a "scramble system" in order to provide a greater variety in food offerings and to allow for quicker movement through the lines. These renovations were the results of two years of planning, several student surveys sent out by the food services, and input through the "Grapevine" (student suggestions) in the dining hall. Student feedback had indicated that the most requested services were for a grill

service, a deli bar and an expanded salad bar. The new "scramble system" allowed students to start their meals in any area that they wanted. Students reacted favorably to the greater variety of foods available and to the better dining atmosphere.

Finally, installation of Lehigh's new on-campus telecommunications and computer data network was expected to

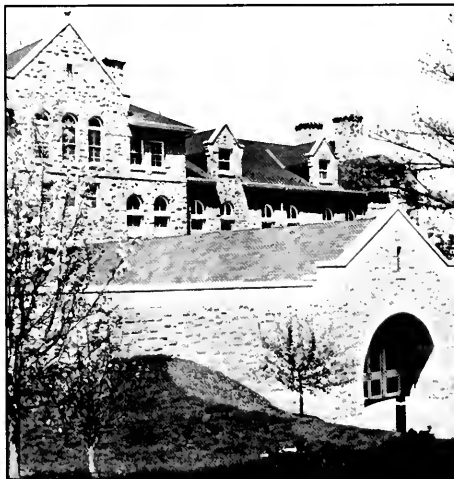

continue through the summer. When activated in the upcoming fall, every student living in the dormitories, fraternities and sororities will be able to use telephones to talk with faculty members while sending or receiving data on their personal computers without the use of a modem.

Students who use Zenith or other IBM-compatible computers will be able to hook directly into the network from any campus resident using special software. Because the system will be completely digital, the computer will behave exactly like a digital telephone and will have direct access to the computerized library catalog system, the

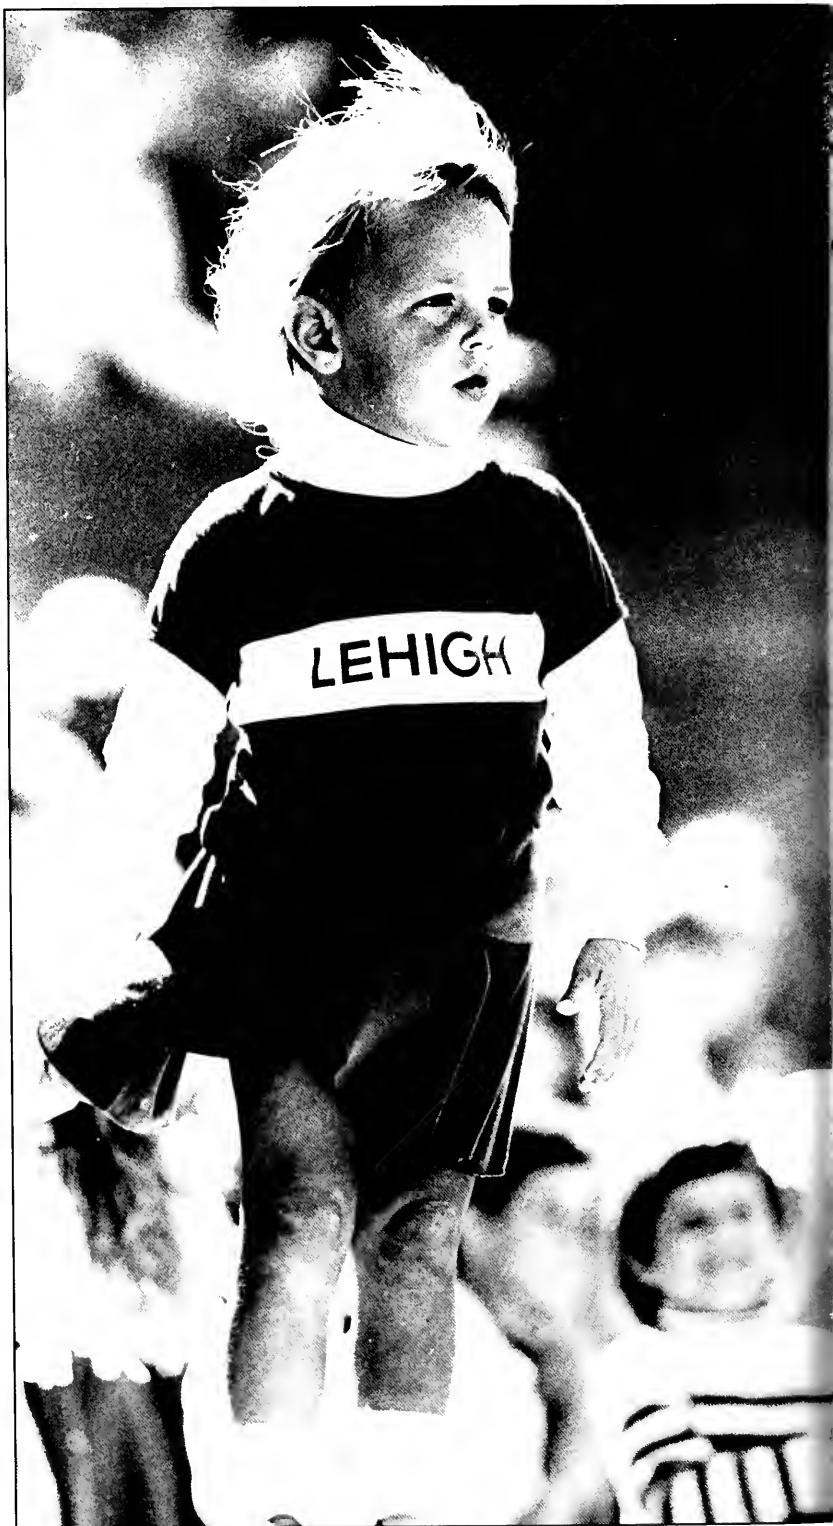

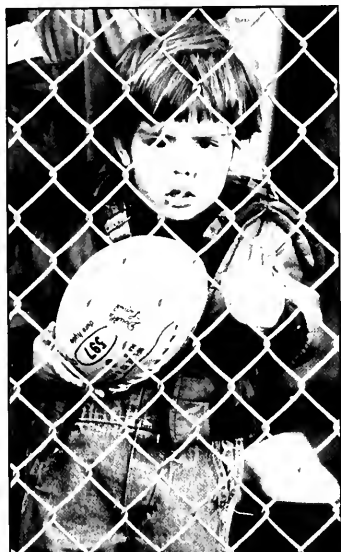

university's new computer store and eventually a campus wide "electronic mail" system, in addition to all the current mainframe computers.

The campus continued to move full force into the future. Only time will tell how these and other changes will affect the scope of the campus.

By Mark Meagher

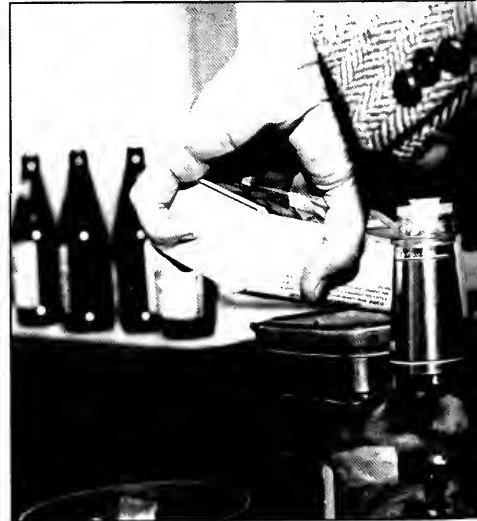

Faces Of The Future

"I believe the children are our future.

Teach them well
and let them lead the way.
Show them all the beauty
they possess inside.
Give them a sense of pride,
to make it easier,
let the children's laughter
remind us how we used to be."
From "The Greatest Love Of All"

Put To The Test

Was it a success . . . or a failure? That was the question many people were asking about their new social policy. As it stood, the policy successfully survived one year of trials and tests.

In an effort to see how the fraternities conformed to the new social policy, the University kept the "Party Patrol" in full swing; the "Patrol" was a group of students who visited all registered parties to determine the availability of food and an alternative beverage, to judge the type of atmosphere at the event, and to see whether intoxicated people were being served, among other items.

It was difficult to determine if the "Party Patrol" was effective since most fraternities did not turn in the required self-assessment after each party. The "Patrol" had a clear impact, though; most houses did make changes at their parties after being informed of violations.

Two important proving grounds for the new social policy were the Lehigh-Lafayette weekend and Greek Week. If Lehigh had gotten through these without a major incident, then it would have been a giant boost (as well as a miracle) for the new policy.

Administrators were calling the Lehigh-Lafayette weekend a "period of trial." Many students did not even take notice of the critical nature of the time. As it turned out, there were no major incidents the entire weekend. It

was too early to tell if this lack of incidents was a direct result of the new social policy.

As April 13 rolled around, tensions began to rise again. Many wondered if Lehigh would be able to get through Greek Week without any major problems. When the dust settled, it was not a pretty sight. The campus policy reported several incidents of bottles thrown at passing vehicles, vandalism to cars and

residence halls, noise complaints from Bethlehem residents, disorderly conduct, criminal mischief, and assault. It was becoming clear that students still were not grasping the general intent of the social policy: a commitment by students to respect the rights of others, watch out for their fellow student, and to see that social life does not interfere with academic life.

Where did this leave the social policy? Was it time to abolish the policy, change it to regulations that could be

more easily enforced, or simply leave it alone?

It was difficult to substantiate any immediate and necessary changes since the social policy had only been in existence for one year. With the close of the year, it appeared that much still rested in the hands of students. Only time will tell how they will adhere to the prescribed set of guidelines.

By Mark Meagher

They've Come A Long Way

Women of Lehigh, take a bow, you've come a long way. This marked the fifteenth year that women have attended Lehigh. But it has been anything but smooth sailing. In fact, the past decade and a half was quite a steep uphill battle for women in their attempt to gain the standing they have today. The campus has been forced to undergo a drastic change from the first day women stepped onto it as students rather than as weekend dates.

The Lehigh they entered then was quite different from today. The early seventies were noted as very liberal; student activism became a major influence across the country and Lehigh was no exception. In 1970, just one year before coeducation began, the students were so rebellious that they staged several student strikes in an attempt to gain a voice in the University's government. In one demonstration, students took control of the U.C. and wouldn't allow it to close at midnight. The result: cancellation of classes for four days and the birth of the Forum.

However, just one year later sentiments on campus were turned around completely. In late August, 1971, female students, commonly known around campus as "coeds," arrived and caused quite a ruckus. The reactions to these newcomers were mixed. At first, the men were so shocked and excited after winning their long fight for coeducation, that the women found them extremely helpful and courteous. The change was welcome as far as everyone was concerned and a spirit reminiscent of the fifties prevailed. For once it wasn't necessary to import women from all other schools to fill up the parties. The market for cheerleaders closed as well. Up until then, Cedar Crest women were brought in to be cheerleaders, but now Lehigh could cover that position. Everything seemed to be going great: the football team had its first winning season in years, the Lehigh-Lafayette weekend bonfire was lit after remaining dormant for the previous three years, and the campus itself was modernized with the addition of the Lower Centennials (an all-female quad) and Rathbone. Most importantly, the overall attitude on campus was much more enthusiastic than before coeducation.

However, reactions continued to be mixed. Some men became jealous of the "plush" living arrangements provided for women since men were still forced to suffer Dravo and M&M. Even the girls were not too thrilled with the Centennials because the dorms were not even fully completed when the coeds moved in. The problem of the prevailing ratio existed as well. The ratio of three guys to one girl was considered bad by students today; with one

hundred and fifty females admitted in 1971, the ratio stood at thirty males to every one female. Talk about being outnumbered.

With figures like that, it was logical to believe that everything on campus was geared towards men. No women's varsity sports or intramurals had been formed. The only sporting event was the annual Lehigh-Lafayette Powder Puff Football Game. Some anti-feminine sentiment also existed in the classrooms. Very few female professors were teaching and some of the male teachers teased the coeds, making them feel even more uncomfortable.

In some cases, discrimination against women was blatant. For example, the Marching 97 did not allow any women to march onto the field with them. Women could try out for the band, but they would have to sit on the sidelines at the games. Problems with the social life cropped up, too. With thirty females on campus, the majority of men had their entire social scene handed to them on a silver platter (or, more appropriately, in a plastic cup?) The women weren't quite as lucky. Many were quite disappointed with the Greek System and felt that men at parties didn't treat them very well. Guys began to take the attitude that most Lehigh women were snobs. By the end of the year, everyone realized that many changes would have to be made, including admitting a larger percentage of women into the next class.

The female troops fighting the battle were led by Assistant Dean of Student Life, Ruth Hurley. She became a combination of friend, mother and spy for the women here. By the following year (72-73) they were given the opportunities to participate in women's intramural sports and to live in a coed dorm, M & M, thus making it easier for men and women to meet. By then, the uproar over coeducation had worn off, and everyone was starting to feel more comfortable about friendships between males and females. Men even became cheerleaders for the first time since the fifties, another example of men and women working together.

By the fall of 1973, the enrollment of women had increased enough for the initiation of three female varsity sports: field hockey, swimming, and tennis (all of which had losing records their first year). Richards followed M & M in becoming a coed dorm and men moved into some of the lower Centennials so that no one could complain of unequal living arrangements. Slowly but surely, women were sinking their claws into the roots of South Mountain and making quite an impact. In 1973, women were finally allowed to march with the men of the Marching 97.

The social inequalities were not really addressed until December 1975 when Alpha Gamma Delta, Alpha Phi, and Gamma Phi Beta were officially recognized as the first sororities. At least the women had their own club houses; they didn't have to depend on fraternities for social functions. This was perhaps the biggest step towards independence. Added to other accomplishments such as women's varsity basketball and lacrosse teams initiated in 1975 and volleyball in 1976, women were finally catching up.

By the mid-seventies, women had clearly made their mark of Lehigh in all campus activities. They held leading positions on SAC, the Brown and White, the Epitome, the Forum, and many other prominent offices. Their sports teams gradually progressed to their positions of prominence held today. Women were gaining the respect they deserved after working hard to get it. The only walls dividing men and women were the physical ones made of plaster and cement; in

other words, the dormitories, fraternities or sororities in which they lived.

Of course, men and women are unable to share rooms, but they have gradually integrated them as closely as possible. Girls moved into Dravo in 1977, making it the first coed freshmen dorm. By 1978, upperclassmen moved into the apartments of Brodhead where the individual apartments were all the same sex, but the halls consisted of apartments of both sexes. The final step was taken in 1984 when the first three sororities moved onto campus and Taylor Residential College opened its doors with coed halls of regular dormitory rooms. These tight quarters induced closer friendships between men and women. It was only natural that they would get to know each other better if they see each other on a daily basis.

This brought the history of Lehigh women to 1986, where women were still outnumbered three to one, and fraternities outnumbered sororities thirty-one to six. Still, over the last two

years, women's athletic teams had won ECC titles in lacrosse, field hockey, tennis, and basketball. The battles may have been won along the way but the war continues. Coeds of the eighties may fail to realize how good they have it compared to their forerunners of just fifteen short years ago. Take a minute, women, take a bow, and, most importantly, continue to take action.

By Allison Land

John Ehrlichman

Defense attorney F. Lee Bailey spoke to a standing-room-only crowd in Packard Lab in September. His speech, "The Defense Never Rests," centered around the treatment of criminals. John Ehrlichman, former counsel and special assistant to Richard Nixon, spoke on "Ronald Reagan and the State of the Union," in February. In his speech, Ehrlichman criticized many of Reagan's policies and spoke of his years with the Nixon administration.

Packing Them In

Larry Linville

The Astonishing Neal

In October, Vincent Price told a crowd of more than a 1,000 in Grace Hall how villainous roles affected his career. Though only 20 of his 110 roles were as villains, they were the ones with which he was associated.

The Astonishing Neal, billed as the most spectacular psychic and hypnotist in the entertainment field, appeared in October. He thrilled the audience with his remarkable mental abilities.

To close out the year of outstanding lectures, Larry Linville, who played Frank Burns on TV's MASH, spoke to a crowd of over 1,000 during Greek Week in April.

Vincent Price

CAMPU COPE

In The Spotlight

The Connection, a student band who won the talent contest first semester, performed for a large crowd during Asa Daze. The event was sponsored by SAC, RHC, and the Dean of Students office to fill the void in the social scene caused by Bid Day.

To Gillian on Her 37th Birthday met with overwhelming success when it was performed in April. The drama quickly sold out all six shows. It was the account of a man learning to deal with the death of his wife and coming to terms with himself. Adam Riss played the leading man, David, whose wife Gillian, Katherine Edwards, died two years before.

The labor involved in producing and performing the play was enormous. Director Nadine Kennedy spent about ten months planning, coordinating, and executing the operation.

Lighting The Stage

John Parr

James Taylor

Simple Minds

Jerry Lee Lewis

Nancy Wilson of Heart

Sting

Chuck Mangione

James Taylor dazzled the crowd at Stabler Arena in October. He mesmerized the audience with such classics as "Going To Carolina." He was the first concert of the year.

Two of the biggest concerts of the year happened in the same week in November. Heart took the stage on a Friday with a warm-up performance by John Parr. The Wilson sisters, Ann and Nancy, belted out an hour and a half of

music from their new album. Yet, their performance could not compare with Sting's sell-out concert. From the moment the lights dimmed and he leaped on stage until he finished his last encore almost two and a half hours later, Sting kept the crowd's undivided attention. The performance included exhilarating versions of "If You Love Somebody," and "Fortress Around Your Heart."

What Happened?

Campus-wide networking, the Physics building renovation, fifteen years of women. What else made the year so different from all the rest? Plenty.

September:

With the dissolution of Delta Sigma Phi fraternity on charges of hazing, the house was dubbed "Packer House" and became home to 33 upperclass men and women.

In the fifteenth year of women, the freshman class ratio of males to females was higher than any previous incoming class. As more women populated the campus, adjustments were constantly being made. Alpha Gamma Delta and Gamma Phi Beta sororities found new homes in the Upper Centennials, and Kappa Alpha Theta moved into SMAGS.

300,000 books were moved from Linderman to Mart as the old card catalogue was replaced by ASA, a computer catalogue. Renovations to Linderman began, including the installation of air conditioning and the redistribution of materials. Increased study room would also result from the renovations.

Fran McCaffery was named head basketball coach after Tom Schneider resigned from the position. Edward Uhl, a 1940 alumnus, became the tenth chairman of the board of trustees.

For the men in Dravo, Friday the thirteenth certainly was an unlucky day. A student used a chainsaw to damage a few of the doors in the building. He was arrested and led away by campus police.

Hurricane Gloria visited campus at the end of the month. A cave-in of the road behind Lamberton Hall and an uprooted tree in front of Trembley Park were the worst of the damage, which also included flooding in the UC. Although Lehigh was on the edge of Gloria's path, many students were concerned about the welfare of their families along the shores of New York and New Jersey.

October:

The Forum established a Judicial Re-

view Subcommittee to re-evaluate the university's entire judicial system, which was believed to suffer from "a lack of consistency" in the disciplinary process.

Phi Kappa Psi Colony failed to receive official recognition from the university. As a chapter of the national organization, it maintained its own functions including a fall rush in an off-campus house.

At the 107th Founder's Day on October 13th, President Peter Likins conferred degrees on students who had completed their requirements during the previous summer.

Parents and students watched the Engineer football team lose against Rhode Island on Upperclass Parent's Weekend. The Engineers did not do much better on Freshman Parent's Weekend. They lost to William & Mary.

After an Allentown man was struck by a moving vehicle in front of Alpha Tau Omega fraternity, sparks flew over whether cars should be allowed on the Hill on weekends. The controversy lasted for a few months and came to no real conclusions. Any car with a Lehigh sticker would be allowed on the Hill at anytime, including weekends.

November:

The Epitome, having raised the price of its 110th volume, received criticism from seniors who did not believe that they should have to pay more than underclassmen for their books. When they received the books, though, they realized it was worth the added expense.

The first Lehigh Phonathon raised more than \$80,000 for financial aid, campus renovations, and special academic programs.

The entire campus underwent testing for the amount of radon, a potentially lethal natural gas, present in university buildings. Results of a test the previous spring revealed that the air in many buildings in the Lehigh Valley was found to have radon levels above those considered safe. Two fraternity houses whose identities were not disclosed were also found to have higher

than normal levels.

John Hunt, Dean of the College of Arts and Science, announced his resignation effective June 1987. His reasons for leaving the post included the proposal to move the chemistry and physics departments from the Arts College to the Engineering College. The proposal itself was not resolved by the end of the year.

Lehigh defeated Lafayette in college football's most played rivalry on November 23rd. Restricting people from leaving and re-entering the stadium once the game began seemed to help prevent problems commonly associated with the event.

January:

Second semester brought news of an increase in tuition for the 1986-1987 academic year. With a 9.95 percent increase, the tuition rose from \$9,550 to \$10,500. Networking was the main cause for the increase.

The dining services announced two new programs. "With Our Compliments" allowed students on the meal plan the opportunity to invite a guest to a meal without charge. "Lehigh Cafe Plus" was a credit card type service which let students pay for food using their ID card. The cost was then deducted from a prepaid account.

The university raised a record \$112 million during its most recent New Century Fund Capital Campaign. It was the largest fund-raising effort in the university's history and exceeded its goal by 55 percent. The money was to be used for major renovations, new constructions and endowments, such as financial aid.

57 students were named to the 1986 edition of "Who's Who Among Students in American Universities and Colleges" based on their academic achievement and leadership in activities.

February:

The Senior Class Gift Campaign commenced and lasted for three weeks. Solicitors encouraged fellow seniors to pledge \$100 to Lehigh over the five years after their graduation. It turned out to be the most successful campaign in its history, with the highest percentage of participation

of any previous class.

Several buildings had to be evacuated when a student poured carbon disulfide down a drain in Mudd and the toxic waste fumes spread to other buildings through the sewer system. The vapors could have been fatal if inhaled or absorbed through

the skin.

President Likins announced Dr. David Sanchez as the successor to retiring Provost Arthur Humphrey.

Five students were among 80 injured in a two-bus crash near Scranton.

The passengers were returning from a ski weekend.

March:

John Whitehead, the head football coach since 1976, was named the new athletic director, following the death of Richard Gibney.

Two students were arrested for underage drinking in a raid of Your Mother's Bloomers bar, which faced the possibility of losing its liquor license after the arrests.

In an effort to change its image, the snack bar was renamed "The Lehigh Cafe" in a campus-wide contest. A student produced a number of sweat-shirts bearing the new name, but, since the logo on the shirt was similar to that of the Hard Rock Cafe in New York, production was stopped.

April:

Henry Small, former quarterback coach at Brown University, was named as the new head football coach to succeed John Whitehead.

As always, the Brown and White's April Fools issue, *The Clown and Gripe*, appeared around campus and caused a few to complain about the controversial nature of its humor.

The entire campus exhibited its unity and spirit as it mourned the death of classmate Jeanne Clerly.

The university raised the rent of the Fabric Center by 250 percent which forced it out of business. The Center had not faced a rent increase since 1958 when the property was originally purchased by Lehigh.

The results of the Student Activities Council elections were invalidated due to suspected ballot fixing. The re-elections were held two weeks later.

Disruptive behavior during Greek Week called into question the survival of one of Lehigh's strongest traditional celebrations.

Just when students thought it was safe to put away heavy sweaters and coats, snow blanketed the campus.

And, to end another year of Lehigh-life, the Class of 1986 graduated in a spirited ceremony at Stabler Arena.

OK, so what happened?

In The Headlines

Campus events were not the only parts of Lehighlife. Sometimes, world news was even more memorable and influential to students than campus news. Highlights of the year in headlines follow:

Mexico City was hit by an earthquake that measured 7.8 on the Richter scale in September. More than 250 buildings collapsed as the death toll reached 2,000. In October, Mt. Nevado del Ruiz erupted near a small town in Columbia. Mud slides caused by melting snow claimed more than 20,000 lives.

The nation watched with horror and disbelief as the Space Shuttle Challenger exploded before their eyes. Seven crew members, including schoolteacher Christa McAuliffe, were on board the January 28 flight.

Terrorism became so widespread that people began to think twice before travelling abroad. On October 8, the Italian cruise ship Achille Lauro was held hostage in the Mediterranean by Palestinian terrorists. During the siege, American passenger Leon Klinghoffer, confined to a wheelchair, was killed and thrown overboard. After two days, the men set the ship free, but they were arrested in Italy after American warplanes forced their plane to land.

About 15 minutes after take-off from Athens for Cairo, Egyptair Flight 648 was hijacked. Egyptian Commandos stormed the jetliner while it was landed in Malta, in an effort to save the lives of the passengers

aboard. Gunshots and explosions during the assault killed 50 people.

In November, President Reagan travelled to Geneva for a summit meeting with Soviet leader Mikhail Gorbachev. It was the first summit meeting in more than six years. The two world leaders made little progress on the major issues confronting them, including Reagan's Strategic Defense Initiative arms control policy, also

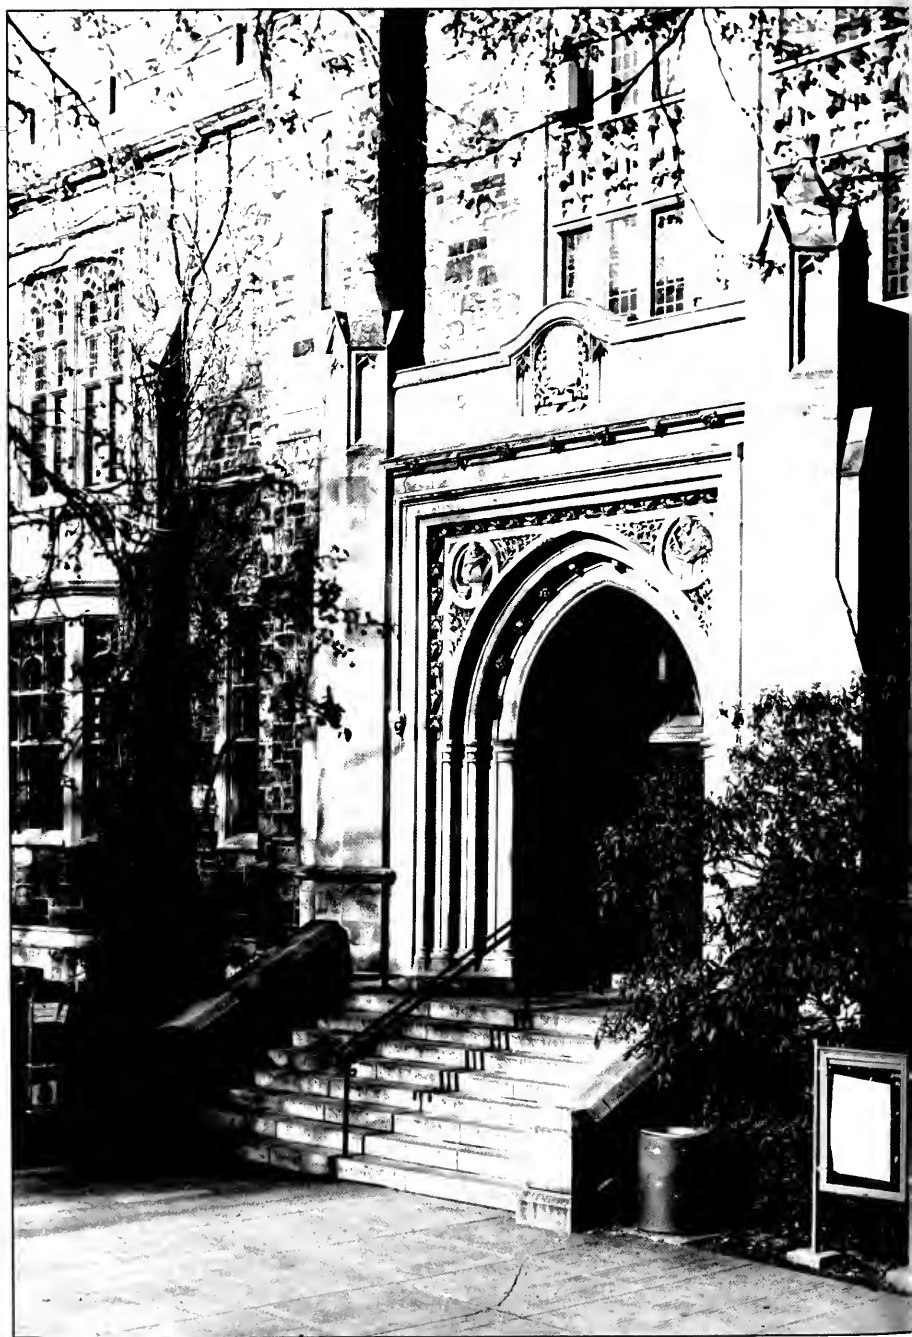

known as "Star Wars." They did, however, lay groundwork for continued negotiations and a more productive Soviet-American relationship.

Trouble brewed in the Philippines as President Ferdinand Marcos' government crumbled under pressure. His dilemma began when he held an election to prove his political support. Marcos' supporters used counterfeit ballots and force to make it appear Marcos had support that did not exist. To avoid a revolution once he was exposed, Marcos and his wife, Imelda, flew to Hawaii. Filipino leader, Corazon Aquino, who had plans for government reform, became popular with the people.

In health news, the death of actor Rock Hudson brought AIDS into the limelight. Public demonstrations displayed growing awareness of the illness. It was believed that by 1990 more men will have died from AIDS than died in Vietnam.

History repeated itself when, four years after seven people died from taking cyanide-laced Tylenol capsules, Diane Elsroth died after consuming a poisoned Extra-Strength Tylenol. The FDA warned the nation not to use the drug in capsule form.

In sports, the Chicago Bears trounced the New England Patriots 46-10 in Super Bowl XX. And the Kansas City Royals became the first team in World Series history to win the championship after dropping the first two games at home against the St. Louis Cardinals.

ACADEMICS

Although they hated to admit it, students were here to study. Every excuse was used to find something else to do, but no matter how involved they were in activities, athletics, and recreation, academics were supposed to be a priority. It meant not only reading books, doing problems, and taking exams, but also learning to interact with others.

No where was academics better represented than in the facade of Linderman Library. Though students usually did not think of its great history, Linderman remained a symbol of the power of learning.

A fresh view of academics revealed that students did not learn just from books. Interacting with teachers also raised students to new heights of knowledge. An inside look at academics gave this fresh perspective.

Peter Likins, President

Making The Vision A Reality

Lehigh University is home to students from August to May. For President Peter Likins, however, Lehigh is home to him and his family year round.

Married at the age of nineteen, President Likins graduated from Stanford University with a degree in civil engineering. He earned his masters degree at MIT during the advent of space exploration, and then went to work in Pasadena for the American organization that launched the first United States satellite. He returned to Stanford and received his doctorate in engineering mechanics. He joined the faculty of UCLA and then became a member of the faculty and administration of Columbia University. At the time he received the offer to be the new university president, he had no intentions of leaving Columbia. However, he was drawn to Lehigh. His attraction to Lehigh stemmed from the fact that he was an engineer and a wrestler; he believes that this combination leads to a certain discipline

and competitiveness which both Lehigh and he himself exhibit. "It's exactly right for me," he said.

It was very easy for President Likins to adapt to the Lehigh community. He found the students and faculty aggressive, goal oriented and "upwardly bound," yet at the same time, easy going. Although Likins thinks Lehigh tends to be conservative politically, he finds the university to be socially liberal and humanistic, much

like himself. Therefore, it was easy for him to step into his role as President.

Likins believes his primary duty is to develop and achieve a longterm vision for the university. This vision, in the intellectual sense, is for all aspects of Lehigh to be recognized nationally and internationally. To accomplish this, Lehigh must strengthen its arts and science school while maintaining the status reached in the engineering

school and in certain sectors of the business school. In addition, Likins stresses the need for a common core curriculum throughout the entire university so that all students will have a sound intellectual background.

The social aspect of the vision includes the need to achieve even greater cohesiveness in the student body, which is already "tight." He wants to foster a stronger allegiance to the university and a sense of pride in the students' capability. Likins hopes that students will realize the advantage they have to function competitively and successfully in society, but at the same time, he does not want them to forget to include love and a concern for fellow humans in their lives.

But, the day to day tasks of the president can obscure the vision. Because of his busy schedule, only a small portion of his time is devoted to actually making this vision a reality. Likins works with a variety of constituents in a number of ways to reach this view. These constituents include students, faculty, staff, alumni, trustees, the business sector and both the local and federal government.

His vision is developing and maturing constantly. President Likins hopes that when his term is over, Lehigh University will be a better place.

Joseph Cassidy
Student Activities Coordinator

"If I start making any changes or additions it probably won't be done until after the first year," said new student activities coordinator, Joseph Cassidy. "This year I will be concentrating on minor changes, trying to make the existing programs run smoother."

According to Cassidy, All University Day ran smoothly, even without the presence of a beer truck. Attendance was comparable to previous years, yet there was not "a

push to remove alcohol from activities," rather a "growing awareness that you can have a good time ... if alcohol isn't the main interest."

Cassidy advised the Student Activities Council and worked with student clubs and organizations. He graduated from Bellarime College in Kentucky with a bachelor's degree in business administration and then earned a master's degree in education at Eastern Illinois University while

working in its Office of Student Activities.

Expressing his concerns for performing arts on campus, Cassidy said, "One program that I find the biggest void in is performing arts," attributing this to the "lack of a suitable facility." He arranged for a professional performance of Neil Simon's, "The Last of the Red Hot Lovers," during Freshman Parents Weekend.

By Stuart M. Silberman

The College of Arts and Science

Preparing For Change

In October, a presidential committee recommended that the two sciences in the College of Engineering and Physical Sciences — chemistry and physics — join biology, geology, and mathematics in the **College of Arts and Science**. It was believed that placing the two sciences under the arts college would strengthen the university's reputation as a well rounded institution.

Consideration was also given to unifying all five sciences under the engineering college or to establishing a separate college of science. Both suggestions were rejected; if either was implemented, Lehigh would have the appearance of a technical institute, not of a true university. A separate science college also would jeopardize the survival of the arts college.

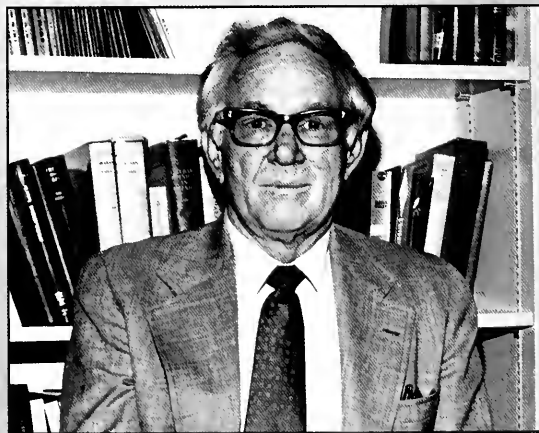

Moving chemistry and physics to the Arts college appeared to have faculty and administrative support, but the tradition of having chemistry and physics in the Engineering College was a major obstacle. By year's end, a decision had not been made concerning the move.

In November, John Hunt, Dean of the College of Arts and Science announced his resignation. In his 13 years as dean, Hunt said he had worked to move the arts college to a "position of strength" in the university but now, the "time has come for new leadership." Among his reasons for resigning, Hunt named the proposal to

combine all of the science departments under the arts college. "... there will be a new College of Arts and Science" in the approaching years, one that "will fall into a style of leadership which is not my own," Hunt said. Since assuming the post, he was greatly responsible for bringing more than half of the arts college faculty to Lehigh.

A mandatory course for freshmen in the arts college, Choices and Decisions, was not well received, according to freshmen questioned by The Brown and White. The main purpose of the course was to help freshmen better choose their major by allowing weekly meetings between the student and his or her advisor. Many freshmen believed that the course was a waste of time.

Finally, in March, the Arts and Science College Policy Committee approved two proposals calling for a change in the distribution system and an increase in the minimum hours required for a bachelor of arts degree.

Air Force

(Front Row): Capt. J. Robinson, Sgt. K. King; (Back Row): Capt. J. Bader, Maj. R. Stankiewicz, Capt. R. Booth, Col. W.D. Kauffman, Capt. J. Armejka.

Air Force ROTC Detachment 715 was housed in Grace Hall together with the Army ROTC unit. Within the university, Aerospace Studies was a separate department under the supervision of the University Provost who served as the military coordinator.

The enrollment in AFROTC totalled 149 cadets of which 104 students had AFROTC scholarships. Cadets majored in every curriculum, but most were engineering majors. Women comprised approximately 18 percent of the cadet corps and minorities made up approximately 2 percent of the corps.

In the fall, receptions were held for both Freshman and Upperclass Parents' Weekend. Dining-In was a major event held in the Asa Packer Room of the University Center where the entire corps gathered for a formal banquet in the best of military tradition. Late in March, selected cadets served as judges for several Air Force awards at the Reading Science and Engineering Fair in Reading, Pennsylvania. The annual Military Ball, a joint

Army-Air Force affair, also took place in the spring in Grace Hall. The theme was "The Roaring Twenties."

The corps had been changing since the conclusion of the past year. Physical fitness programs were fully integrated into cadets' schedules and the corps tackled leadership laboratory with renewed enthusiasm. Communication and cooperation with the Army ROTC unit was more extensive than before. An intensive effort to analyze and enhance every section of the corps organization and activities had been underway since May 1985 and is still in progress. The result of these efforts was a steady rise in quality, performance, and esprit de corps.

Some said that music and theatre were performing arts departments and that **art and architecture** was not — they hadn't heard Ricardo sing opera or Dick do a Fred Astaire medley. We were a department where creative students found a mecca. Dick's color students took on drab Whitaker Lab lobby and

Army

gave it a color presence. Steve's students transformed Chandler Hall with large scale architectural constructions throughout the building. All our students were on the go with architectural tours and museum trips. Thomas Armstrong, museum director, brought the Whitney to our threshold during a week residency at Lehigh. Student/faculty interaction was our middle name; you can't teach courses in design without it.

In a department of creative people with egos, we got along famously, working cooperatively in an atmosphere of mutual respect. This was all calculated for Nick Adams, who was finishing his seventh year as chairman — we wanted to keep him sane and happy. We plugged in for our first CAD course under Tun Akiner. We would have liked to tell you how we seduced the computer but only a cad would tell.

Ricardo, Lucy, and Dick all had solo shows. Lucy had a large installation at the Allentown Art Museum combining sculpture and drawing. Her baby took his first steps but hadn't decided whether to be a painter like Daddy or a sculptor like Mommy. After all the ditches, trenches, and mud slides on this campus, people who had complained about the outdoor sculptures were finding them more beautiful.

John Whitehead, head football coach since 1976, was named the new university **athletic** director following the death of Richard Gibney. "We have every confidence in John's administrative skills to move us forward in our athletic programs," said Vice President of Student Affairs Marsha Duncan.

Named national Coach of the Year in 1977 and 1979 by ABC Television, Whitehead ranks as one of the nation's most successful football coaches.

He was appointed as the twenty-fourth head coach of

Art and Architecture

(Front Row): M.E. Orben, L. Fink, T. Akiner; (Back Row): S. Van Gorp, O. Jacoby, N. Adams, R. Redd, L. Gans, P. Felder.

Athletics

C. Sonon, W. Grube, M. Nesbit, M. McGraw, M.B. Holder, M. Clark, W. Whitehead, K. Adams, C. Anderson, K. Kilcoyne, M. Rockovich, W. Trexler, D. Duke, F. Farkas, R. Ward, J. McCloskey, S. Kiegan.

Lehigh football in January of 1976. In his 10 seasons as coach, Whitehead led the Engineers to 75 wins against 38 losses and two ties.

In just his second year, Whitehead's 1977 team captured the NCAA division II National Championship, compiling a 9-2 regular

season mark, then beating Massachusetts, the University of California at Davis in the Knute Rockne Bowl and Jacksonville State in the championship, the Pioneer Bowl, Wichita Falls, Texas.

Under Whitehead, the Engineers have won two Lambert Cups, in 1977 and

1980, symbolic of football supremacy among Eastern middle-sized colleges.

Biology

(Front row): B. Hargreaves, S. Barbara, C. Williamson; (Back Row): D. Cundall, M. Itzkowitz, H. Pritchard, S. Herman, B. Bean.

ness as values such that your education became an enduring and cherished lifelong process.

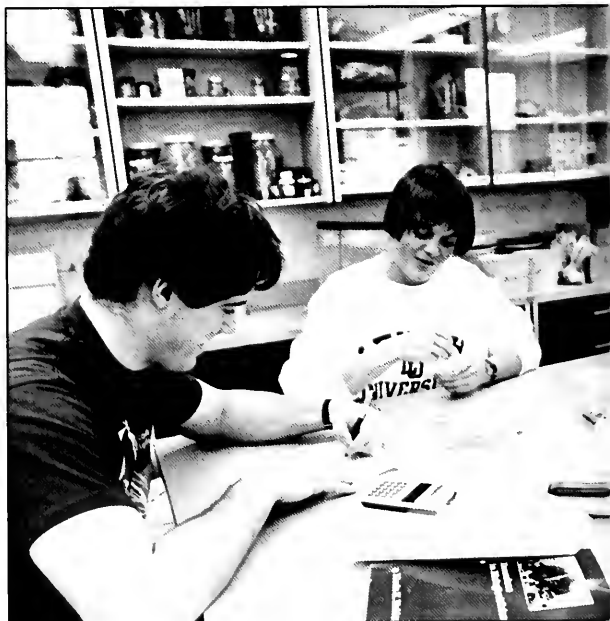

The mission of our department was being actively redefined and focused as the faculty strove to meet exciting new challenges and opportunities placed before it by the emergence of molecular biosciences and biotechnology as a major economic force in the nation and the need to have a better understanding of the ecosystems in our biosphere as man's expanding culture continued to pollute the natural environment.

Biology as a discipline covered all aspects of life; from molecules to man; from atoms to ecosystems. With the limited resources and staff positions which were available we knew we couldn't develop excellence in all areas of this field so we focused our development efforts on: Biotechnology, Neurobiology, Reproductive Biology, and Marine Ecology. In addition, we consciously endeavored to maintain the concept of our mission in a flexible or dynamic state so it could be modified to

The Department of **Biology** extends its fondest and warmest congratulations to the graduated class of 1986. We tried our best to help some of you realize lifelong dreams and fulfill your potential as human beings. Further, we hoped Lehigh was able to teach you growth and open-

S. Beil, R. Phillips, J. Williams, A. Richlin.

meet the changing goals of the university. This faculty was also not indifferent to the essential importance of the liberal arts experience. We were committed to educating men and women not only in the traditional knowledge of the field so they could perform currently expedient socially useful tasks, but also in the development of the values of intellectual and scientific honest, openness, curiosity and growth so they could continually adapt to changing employment opportunities and live personally meaningful lives.

For those of you who had not quite found yourselves, let us remind you:

Yeats and Shaw were poor spellers;

Franklin, Picasso, Adler and Jung were poor mathematicians;

Einstein, Poe, Shelly, Roentgen and Whistler were expelled from school;

Gauguin was a dreamer;

According to his teacher, Watt was dull and inept.

Class of '86, there's still hope for **all** of you. Best wishes for a happy and prosperous life.

Classics saw a 33 1/3% change in faculty, as our new Hellenist, Professor Julie Williams, replaced Professor Doug Feaver, who was spreading the good word in Hawaii. Professor Phillips was still laying history on the Visigoths, and Professor Richlin was still chained to the ditto machine. During the first semester we even became a four-person faculty; Professor Ann Brownlee, our archaeologist, gave us the best male-female ratio at Lehigh (1-3 —

Phillips among the Amazons!). Sandy Dostert '86 served as our second Latin drill instructor, and set a new world's record for snapping her fingers. The department became computerized; we had Coffee Hours and hosted eight colloquim speakers on topics ranging from Bithynian coinage to Sappho's poetry. Professor Feaver's talk on ancient Greek music was followed by modern Greek belly-dancing. Finally, our seniors — Jess Chang, Patti Lee, Mike Rieder — suf-

fered through comps together and arrived at a new understanding of the phrase **pathei mathos** (or, "the overexamined life is not worth living").

The department wishes a fond farewell to the graduated class; your act is hard to follow, and we miss you already. **valete omnes!**

Very few colleges and universities maintain a strong undergraduate program in **International relations** organized in a separate department. The Department of International Relations had been enjoying this distinction for almost four decades. As an interdisciplinary unit in the College of Arts and Science, the Department served as an integral part of liberal arts education and prepared its majors for a variety of opportunities — graduate study, study of law, foreign service, careers in corporations, in government and international organizations.

In its middle age, the Department served an increasingly important function. Powerful forces around the globe tended to increase the isolation of Americans from other societies. Terrorism and military responses to terrorism; the danger of fragile technologies in other countries breaking down in large-scale disasters; the sense of personal insecurity in repressive and politically unstable states; the dramatic growth of English as a second language in many foreign countries obviating the need for Americans to learn foreign tongues and other developments operated to keep more Americans at home at precisely the time when the United States more and more needed to understand other societies in order to work, compete, and live with them.

To counter the forces of isolation, the Department had considerably strengthened its curriculum and was moving beyond it. It had been instrumental in establishing in 1986 a university-wide Center for International Studies. It was developing a far-flung program of internship/study abroad. It directed the Cohen International Lecture Series; started in 1986, the series brought to the campus world leaders of highest rank. And the Department also served as the home of the student-run International Relations Club

and, as of 1986, of the Upsilon Chapter of Sigma Iota Rho, a national honorary society in international relations. In sum, it kept wide open the windows on the world beyond our borders.

An erstwhile **Journalism** chairman once declared that it was the department's goal to teach students to write one simple declarative sentence after another, linked by suitable transitions. The goal has remained.

This may explain why the department became a breeding ground, not only of print and broadcast journalists, science writers and public relations practitioners, but of lawyers, business executives and a few novelists.

The key to whatever success that the department had was practice in clear and, above all, accurate reporting. Journalism students were required to write countless assignments in class and to hone their skills on *The Brown and White*, which exposed them to public

criticism — something that was not in short supply at Lehigh.

By the time they left South Mountain, students had acquired not only a certain degree of facility in writing, but a keen awareness that the world was inhabited by people of differing viewpoints who did not always believe what they read in print. With this knowledge came a degree of humility, which was not the least of the virtues that the department taught.

Since 1980, Robert Sullivan had been the chairman of the department of Journalism. This year he retired from the post. "He's been a teacher to me," said assistant professor, Wally Trimble. "Students have a lot of respect and admiration for Bob."

Associate Professor Sharon Friedman became a full professor on July 1. She took Sullivan's place as chairman, making her the only female department chairman at Lehigh.

International Relations

(Front Row): R. Menon, M. Hodges, G. Tannebaum, (Back Row): C. Joynt, Z. Slouka, O. Smolansky.

Journalism

It was rather like business as usual in **Modern Foreign Languages** this year from the student point of view, although students did meet our new colleague in Latin-American studies, Antonio Prieto. David Lewis returned from leave in France to resume the chairmanship with a book on French for professionals in his briefcase, and Anje van der Naald departed on leave to research short-story writing in Brazil. A familiar figure now less in evidence was John Van Eerde who retired after a quarter-century of teaching and research in Romance Languages. The department was taking on a younger face.

Nevertheless a great deal was going on behind the familiar facade of ivy-clad

Modern Foreign Language

(Front Row): L.D. Wolfgang, T. Decker, L.S. Lefkowitz; (Back Row): A. Waldenrath, VanEerde, D.W. Lewis.

Coppee Hall (due for another coat of paint). Computers weren't the half of it, although there was feverish activity among faculty to catch up with the students on that score! We had received our Visiting Committee under a new chairman, Trustee Edwin Scheetz and conducted two extensive job searches: new faculty will be joining us in Chinese and French.

Perhaps the most significant development was the growing realization that foreign language skills were valuable to all disciplines of the University and in many professions. This received concrete expression in the vote by the faculty of the College of Arts and Sciences to restore the language requirement for the BA degree and close association of the department with the newly-established Center for International Studies. Dr. Herz, Professor of Russian, succeeded Dr. Lewis, Professor of Modern Languages, in the departmental chair. We express our appreciation to Margaret Tsao for her excellent service in Chinese and to Sadia Zoubir who moved on to a tenure-track position in the University of Alabama. Another feature of our year was the visit of Jacqueline Mueller of Lafayette College to teach a course in Japanese culture which drew some ninety students.

The French and German Houses continued their activities. Two MFL colleagues directed LVAIC programs in which Lehigh students are participating: Dr. Eric Williams went to Bonn, Berlin and Munich and Dr. David Lewis to Poitiers and Paris. A number of MFL students received departmental awards to study abroad and Lee Hammett was nominated for an assistantship in France.

Philosophy? You can major in **Philosophy** at Lehigh? What do you do with a Philosophy major — Teach? Teach — like the always ex-

Music

P. Salemi, J. Bidlack, N. Sine, S. Sametz.

Philosophy

(Front Row): J. Hare, N. Melchert, L. Nelson, R. Barnes; (Back Row): G. Galardi, J. Volpe.

uberant Prof. Hare. A man who keeps his faith in a profession designed to criticize.

Teach — like Prof. Volpe. The devoted professor who still seeks his first "gold record and a moderately successful video on MTV."

Teach — like Prof. Melchert

who in his own quiet manner, treats every question as a good question.

Teach — like Prof. Barnes whom it is believed has invented a sentient life form in his office — made entirely of paper.

Teach — like Prof. Nelson who

seems to thrive on coffee, cigarettes, and arguments.

Teach? No, I think I'll do whatever I please.

Psychology

(Front Row): L. Williams, A. Brody, M. Richter, G. Shortess, J. Nyby; (Back Row): N. Simon, S. Pipp, W. Mah, D. Hyland.

Religion

J. Reid, N. Girardot, M. Paposa, A. Eckardt, L. Silberstein, W. Floyd, E. Issac.

most Lehigh students felt: why waste your time on all that artsie stuff. We all took it for granted that it wasn't going to help us get a better job. Now I think ...

Interviewer: Yes, Mr. Iacocca, but why, why Religion Studies?

Mr. Iacocca: Well, it's really pretty simple. It's something I started to think about the past few years. You know, I almost think in a strange way it was a sort of unconscious reason why I didn't say very much about my years at Lehigh in my best selling autobiography. But you know just thinking about Lady Liberty ... you know she's a great engineering feat, in fact, a pretty damn impressive feat. She's really enough to make any Lehigh, or Chrysler, engineer feel his heart thump right through his plastic pen protector. But you know, there's something more about it, something my father always said ... but I didn't understand it at the time. And ... by the way, what are you majoring in at Lehigh?

Interviewer: I'm a business school student with a double major in econometrics and entrepreneurial accounting. But please, Mr. Iacocca, so what? I still don't understand

FRAGMENT OF AN IMAGINARY INTERVIEW: LEE IACOC-CA'S ONLY REGRET

Explanatory Note: Caught on the run at Newark International Airport, Lee Iacocca graciously, though somewhat breathlessly, consented to an interview. It is noteworthy that Mr. Iacocca's famous down-to-earth toughness and pragmatic optimism is tempered in this encounter by a strangely reflective, and somewhat tersely bittersweet, mood. The entire interview lasted only a hurried seventeen minutes while Mr. Iacocca was rushing to make a connection at the airport. We present here only the concluding portion of the exchange.

Interviewer: Did I hear you correctly, sir? Did you really say that your only regret is that you didn't double major in Engineering and **Religion Studies** (A smallish, yet fiery, department in the Arts and Science College at Lehigh University that studies the role and significance of religion, throughout world cultures, in all aspects of human endeavor) when you were at Lehigh? I don't understand ...

Mr. Iacocca: What's there to understand? The explanation is simple — though I'll admit I didn't feel that way at the time. In fact, I guess I felt the way

why Religious Studies?

Mr. Iacocca: Well, maybe like me, you'll see later. But listen to me now ...

Interviewer: You're one of the richest and most famous men in America. God!, you invented the Mustang and saved Chrysler. You're maybe our next president. How, Mr. Iacocca, how could you regret not having majored in Religion Studies?

Mr. Iacocca: As I said before, she got me thinking, that giant Lady with the big torch, and you know, I realized that I couldn't make sense out of her. How was she more than just a great engineering project? You know, of course, that that French guy back then didn't know anything about CAD-CAM when he designed her. And what about our devotion to Old Lady Liberty? It's a little bit like my father used to say ... but I'm getting off the track ... and it's so simple ... just like what a university is supposed to be. And ...

Interviewer: Quickly, Mr. Iacocca! They're calling you to the gate.

Mr. Iacocca: Looks like I'm going to have to save the best for later, son. But just think about this. And maybe you should ask the Vietnamese

boat people ...

Interviewer: Yes, what, what ...

Mr. Iacocca: It's like this ... religion — and all that other artsie stuff — it really does help us to understand her, and ourselves ... and the world, the Japanese, Korean messiahs, Jerry Falwell, Bishop Tutu, the Pope and Father Curran. Nuns in Central America, Big "Bob," the wailing wall and terrorists, Taoists on Wall Street, Kadaffi, Black Ethiopian Jews, and those Yugo's — thank God they're not minivans — and, fraternities at Lehigh and even entrepreneurial accounting. But you'll have to ask Mal Forbes about that. So anyway, I've got to go ... hope to see you on the fourth ... (pausing briefly before going through the gate) ... You do understand now, don't you?

Interviewer: (to Mr. Iacocca's departing back and while being shoved aside by security guards) ... No.

It was a typically active year for the Division of **Speech and Theatre**. All told, we mounted or sponsored a dozen theatrical productions, offered a full battery of academic courses and, in conjunction with the Mustard and Cheese Drama Society, ventured on a number of theatergoing excursions. Our dedicated students from all walks of academic life worked long and hard to help make the year a success. We thank the graduating seniors who have been with us over the years. Regardless of their professional goals, may an appreciation of good theatre always be a part of their lives.

Urban Studies was not a major for faint-hearted collegians interested in shallow acquaintance with the latest "urban crisis" discovered by the breathless media. We sought to impart a careful, analytical grasp of the patterns of life in large human settlements. In the process, we tried our best to deliver the classic benefits of a liberal arts education, helping our students to reason more clearly, search more diligently for the truth, and argue more effectively. We combined many disciplines; an Urban Studies major took courses with economists, architects, historians, anthropologists, political scientists, and perhaps even a classicist or geologist. Consequently, ours was a major readily combined with a second ("double") major, most commonly in Architecture, Economics, or Government.

Most of our graduates have entered the business world, which suits us fine.

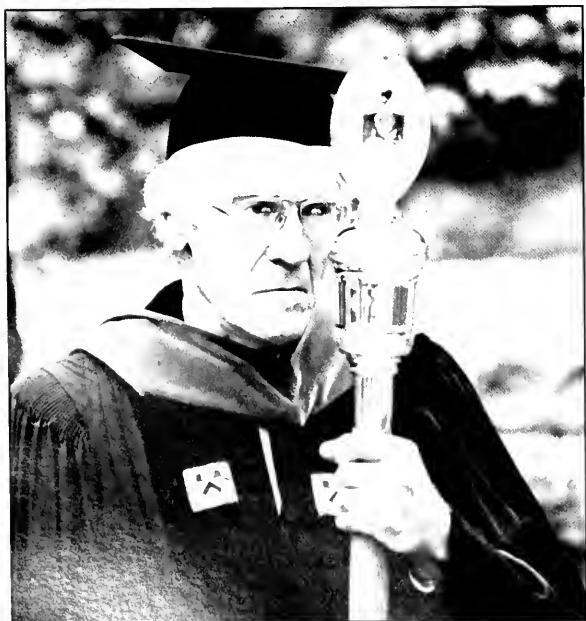

We think the sort of broad-language liberal education we offered was the best possible preparation for the adventures of the marketplace. Law was the second most popular career choice among Urban Studies majors. Others went into real estate, banking, public service (planning and city management), medicine, and architecture.

We were a small operation and students got to know us well. Several courses included field trips to Philadelphia or New York, and some students chose to spend internship semesters in Philadelphia or Washington for major credit. We were working on a revised curriculum which will greatly simplify the dauntingly complex description of the major now found in the catalog. Our philosophy? You paid \$15,000 a year to improve your mind and your chances in life. We aimed to help our students do both.

Urban Studies

D. Amidon.

At the 107th Founders Day exercises held October 13, President Peter Likins conferred degrees on graduate and undergraduate students

who completed their requirements during the preceding summer. Raymond Emrich, Professor of Physics, served as Mace Bearer.

Faculty

Extracurricular Activities

Faculty activity did not end in the classrooms. Curtis Clump, Associate Dean of the Engineering College, played General Oscar Fairfax in the Lehigh Choir's production of "Little Mary Sunshine."

Lee Stanley, Assistant Professor of Mathematics, challenged residents of Taylor College to a chess tournament. He was also advisor of for the Chess Team.

In the printing workshop of Chandler — Ullmann Hall, Richard Redd, Professor of Art, produced works that made him one of the most prominent artists in the Lehigh Valley.

The College of Business and Economics

Adapting to Growth

For the first time in the history of the **College of Business and Economics**, undergraduate enrollment exceeded 1100 students. In order to teach these and other students, the number of full-time CBE faculty reached a high of 56 including eight new faculty members.

Yet, the tremendous growth caused problems with inadequate facilities, according to Richard Barsness, Dean of the college. There was not enough room in Drown Hall, home of the college, to house the faculty, some of whom had offices in Johnson Hall because of the lack of space in Drown.

Another problem was that business students had their classes in a variety of other buildings around campus, many of which did not meet the needs of a quality business classroom. Because of the dispersion of classes, the college had no real place for students to identify with.

Dean Richard Barsness

The growth of the college could be attributed to the range of opportunities it offered. Students and faculty were invited to numerous seminars featuring both external as well as internal

speakers. Among these were Maurice J. Closs, President, Chrysler of Canada, as part of the new Canadian Studies program in the Fairchild-Martindale Center, and William B. Eagleson, Chair

Emeritus, Mellon Bank who was Executive-in-Residence in April.

Various student clubs and honoraries sponsored a number of speakers and field trips. Professor Carl Beidleman, Chair, Department of Finance, arranged for summer internships with financial institutions in Switzerland for a few finance majors who had some fluency in German.

A major development was the reaccreditation of the school's B.S. and M.B.A. programs by the American Assembly of Collegiate Schools of Business (AACSB). It made Lehigh one of 50 schools nationwide to be recognized for triple accreditation by the AACSB.

During the AACSB's evaluation of the business program, the need for increased use of micro-computers was expressed. As a result, the Price Waterhouse Micro-Computer Laboratory was established

J.R. Aronson, Economics Professor, continued to entertain the Eco 1 class with his unique style of teaching and sense of humor.

with the aid of a grant from a group of alumni who were partners in that accounting firm. The state-of-the-art facility, located in room 15 Drown Hall, was dedicated in the fall of 1985. Micros became an important tool widely available to CBE students and faculty. Each faculty member was provided with one, and they were also available to students at a number of sites in addition to being able to be purchased at the new microcomputer store. Many assignments involving the use of micros were given in CBE courses, leading the way for even further growth in the college.

Carl Beigle spoke on the state of the Canadian economy on Tuesday, October 15. He was the second speaker in a series presented by the Fairchild-Martindale Center.

Accounting and Law

S. Webster, B. Carpenter, C. Moore, M. Davis, F. Luh, J. Kercsmar, J. Hall, K. Sinclair, J. Paul, R. Lawrence, R. Mills, J. Largay, D. Bainbridge.

Economics

(Front Row): F. Gunter, E. Schwartz, N. Balabkins; (2nd Row): J. Innes, T. Hyclak, C. Callahan, G. Garb, R. Thornton; (Back Row): R.A. Moran, V. Munley, R. Mudambi, W. Pillsbury, J.R. Aronson, A. Cohen, L. Taylor, J. McNamara.

The Department of **Accounting** enjoyed a reputation as one of the strongest and largest programs for undergraduate majors on the campus. Approximately 100 students graduated with 60% or more entering public accounting. Accounting alumni rose to the highest positions in their chosen professions among the larger public accounting firms. Lehigh alumni were partners in each of the well-known firms.

These alumni were also

generous when it came to sharing their success with Lehigh. A trip through Drown Hall could find study lounges, classrooms, and microcomputer laboratories furnished by graduates of the department.

Also worth mentioning was the recent national accreditation attained for the undergraduate program in accounting. The curriculum leading to a major in accounting was one of 60 nationally accredited programs. The accreditation process of the

American Assembly of Collegiate Schools of Business was a rigorous examination of faculty, course content, students, and resources which added additional luster to a program with a long history of success.

The interest shown in the **Economics** major remained high, with approximately 60 students in the College of Business and Economics and the College of Arts and Science having elected it. We saw the formation of the Economics

Club under the direction of Professor Colleen Callahan. The club was formed to provide a chance for students and economics faculty to meet informally on a regular basis and discuss current economic issues or aspects of the curriculum. It was also designed to bring in outside economists as speakers and allow better communication of job opportunities for economics majors which came to the attention of the Faculty. Students involved in organizing the club were Larry Sullivan, Kathy Smith, Brian Phillips, Chris Hopkins, Joe Freeman, Wayne Barz and David Cohen.

The year also saw seven new inductees into the new chapter of Omicron Delta Epsilon, the national Economics honor society. The students selected were Patrick Brophy, Christopher Hopkins, Maria Kattan, Ellen Krupat, John Kwasney, Dilia M. Mitrotti, and Nancy Weber. Professors Larry Taylor and Allen Moran served as advisors for the group.

Two Department faculty were honored with chairs this past year. Professor Tom Hyclak held the Sue and Eugene Mercy Jr. Chair and Professor Vincent Munley the Class of 1961 Chair.

Finance

J. Greenleaf, J. Guerard, S. Thode, C. Beidleman, D. Leahigh.

The **Finance** Department and its students had a year of significant growth and new opportunities. Over 150 seniors graduated with degrees in Finance making it one of the most popular majors on campus. A new course also set a record for the longest waiting list. Market demand for Finance majors remained

strong as seniors secured positions with the most prestigious investment banking firms, corporations and commercial banks throughout the world. Work-study opportunities for Finance majors expanded with a distinctly international flavor as several juniors spent the summer working in the Zurich banking

community.

Career Night attracted a record number of students. The Investment Club had a busy year hosting key members of the investment community on South Mountain and travelling to Wall Street. The Financial Management Association Honor Society inducted 13 new members and hosted a break-

fast for Williams B. Eagleson — one of Lehigh's most distinguished alums. And, a new organization, the Finance Club, was formed to further enhance dialogue among students, faculty and finance practitioners.

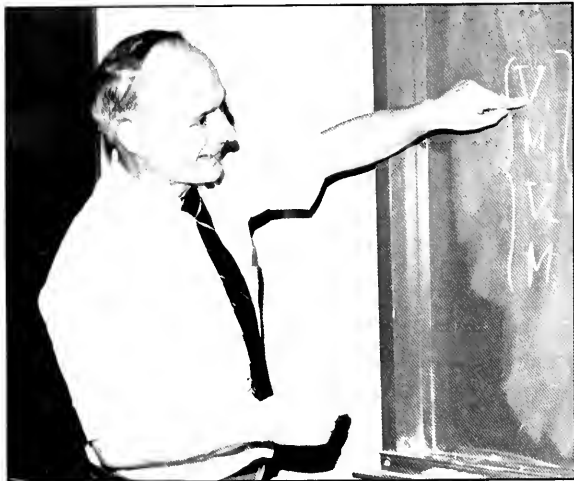

Management and Marketing

B. Litt, B. Smackey, E. Grasso, A. Bean.

The College of Engineering and Physical Sciences

Reaching New Heights

The **College of Engineering and Physical Sciences** had its share of accomplishments that were worth noting.

Tau Beta Pi, a national engineering honor society, celebrated its 100-year anniversary at a convention in October. The society was

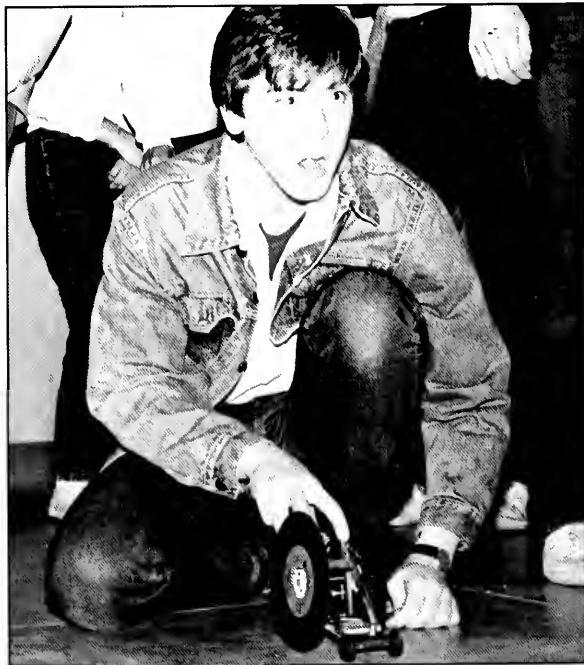

founded in 1885 by Edward H. Williams, Jr., a mining professor at Lehigh. More than 300 convention delegates listened to author Isaac Asimov as he spoke in Packer Memorial Church about the tasks of adjusting to today's automation.

Richard Roberts, a professor of mechanical engineering and mechanics was involved with the restoration of the Statue of Liberty, which celebrated its centennial on July 4th. Roberts performed critical studies evaluating the strength of the structure. "The statue is good for another 100 years," said Roberts. "Our current design codes couldn't have designed one stronger." His part of the project required him to crawl through the statue's insides, including the wrought iron structure leading to the torch. Samples of rivets and iron from the statue's shoulders were stressed on an electrohydraulic tester in Coxie Laboratory.

The **Chemistry** Department saw remarkable changes in the last year. They included and derived largely from the addition of six new faculty. Drs. Larsen, Foster and Regen in organic chemistry, Dr. Roberts, an NMR specialist, and Drs. Behe and Lowe-Krentz, who were the first female chemistry faculty. Extensive renovations on floors 2, 6, and 7 of Mudd were still occurring to make room for these additions and new instrumentation. Many undergraduates, even chemistry

majors were surprised to discover that there were twenty-six faculty members in the department. This size was an indication of the breadth of science that modern chemistry covered, which included many interdisciplinary contracts. Even after four years of chemistry education it was difficult to get a real grasp on the variety that was chemistry.

The 23 graduated chemistry and biochemistry majors this year constituted a truly outstanding group, both in academic excellence and extracurricular activities. These graduates were headed to a variety of places including graduate school, medical school, law school, industrial positions in research, technical sales, or business. The Student Affiliates' group (American Chemical Society) had good participation in both social and educational activities.

Civil Engineering Professor Celal Kostem was named

'Outstanding Civil Engineer of the Year' by the Lehigh Valley section of the Society of Civil Engineers in December. In addition to helping computerize the civil engineering program, Kostern received the award because of his contributions to computer-related design and drafting programs at Lehigh. "I was the computer nut of the department," said Kostern, a native of Turkey.

Computer Science and Electrical Engineering — CSEE.

CSEE, ECSE, CESE, ... ?, or whatever, our new cryptographer, Professor Cohen, may have been able to unscramble.

Networking?? Hell, we didn't have enough room to get all our new computers out of the boxes, let alone have them talk to each other.

Speaking of talking, our computer scientists were paranoid about other computer scientists not talking

Civil Engineering

P. Mueller, L. Beedle, L. Lu, B. Yen, T. Huang, R. Sorensen, J.H. Daniels, R. Johnson, I. Kugelman, G. Dinsmore, R. Weisman, G. Driscoll, G. Lennon, A. Ostapenko, C. Kostern.

Computer Science and Electrical Engineering

K. Tzeng, C. Holzinger, D. Talhelm, F. Hielscher, M. White, D. Frey, G. Rayna, M. Wagh, S. Gulden, L. Tuscher, F. Harvey, J. Butt, P. Ota, D. Leenov, G. Blank, R. Decker.

to them, so we decided to go operational on the national CSNET.

But students were talking about the departmental faculty — Professor Talhelm was named as an outstanding IEEE student branch counselor (his wife Shirley deservedly got the money) and Steve Corvesero, FLASH to most, received the annual outstanding teaching assistant award.

Students generally found FLASH tattooing funny patterns on SNOW WHITE and the

SEVEN DWARFS. People who took these patterns seriously called them VALID results.

Judging from the clock and dagger scenes, something great must have been happening within the department — a new college?? atop the hill?

The past three years in **Industrial Engineering** had at times inched by (the plant layout project by Richardson) and had other times slipped by (the time to finish a Groover quiz). They had, none-the-less, ended. That left lots of memories of activities like the smell of chocolate on the senior inspection trip to

Hershey or Zimmer's Santa appearance at the Christmas party. How about those pre-registration meetings with Kane when we tried to look like we had chosen all the electives we should have, or when we tried to convince Wiginton and Wilson and Plebani that the Computer Center really did go down the

night before that program was due? Maybe twenty years from now the students will still be telling Adams and Odrey and Sathya that the dog ate the homework assignment that was due that class. Let's hope they get more original...

We all saw a great deal of change during our stay. Packard Lab West expanded to include the Computer-Integrated Manufacturing Lab, the Robotics Lab and the Manufacturing Technology Lab. I wonder what they'll be called when we come back for our twentieth reunion? More than anything else, the big change was in ourselves. As freshmen we were concerned about the next Physics exam. Thanks to passing that exam, we were able to ponder what the future held as we began our professional careers — we were also glad that passing that Physics exam helped us get here!

See you all at our reunions where we can embellish these reflections with both fact and fiction.

(Front Row): G. Kane, W. Richardson, G. Wilson; (Back Row): J. Wiginton, J. Adams, M. Groover, L. Plebani, N. Odrey.

Materials Science and Engineering

Change was with **Materials Science and Engineering** the entire year.

Undergraduate majors returned in the fall to find the grinding room on the second floor of Whitaker Lab converted to a microcomputer laboratory. The grinding room reappeared in a smaller and more efficient area, including two belt grinders purchased with funds from the new undergraduate laboratory fee.

The department recommended and the university approved a change of name to Materials Science and Engineering. As described in the President's Report in January 1986, the new name "has its origins in almost twenty years of broadening our field beyond metals. Although the emphasis was still on metals in the undergraduate program, the curriculum is broadening and will continue to do so. In our graduate program, ceramics and electronic materials

already rival metals importance, and polymers and composites are also significant." Seniors contributed ideas concerning curriculum change in a videotaped debate and discussion at the conclusion of Met. 278, Metallurgical Reports.

Faculty changes included the arrival of Dr. Himanshu Jain from Brookhaven National Laboratory and the appointment of Dr. Helen M. Chan who had been on the research staff since 1982 but she had already taught the introductory course, Engineering Materials and Processes, as an adjunct professor. Dr. Jain was a broad materials scientist with special interest and expertise in glasses and ceramics.

Finally, emeritus faculty member Dr. George P. Conard II established a departmental "outstanding graduate student" award. The first winner, Sailesh Merchant, was known to many undergraduates as an outstanding laboratory teacher.

The **Mechanical Engineering** and Mechanics Student Faculty Council was formed with students elected by the sophomore, junior, senior and graduate classes. Senior Brent Formigli was elected chairman. Faculty members were appointed to represent the four divisions of the department. Open meetings were held to discuss topics of concern. The council developed a new course evaluation form and supervised evaluation for the spring semester. Changes to improve pre-registration and senior lab scheduling were suggested to the department.

The student section of ASME had an active year. Led by chairman Plympton and a capable executive committee, get-acquainted coffee hours promoted informal socializing by both students and faculty. Professor Efthimiadis entertained student groups with his music. Several students

Mechanical Engineering

attended the Student Leadership conference in the Poconos in September. Four students attended the ASME Winter Annual Meeting in Miami Beach. A trip to the Stroh's brewery was followed by a discussion on maintenance engineering. Newly arrived Professor Duke Perriera discussed robotics at a technical session. The first Annual

Faculty Roast examined the failings of Professors Hartrandt, Terry, Jakubowski, Roberts, and Benner. The year concluded with a picnic for all ME's held with the Society of Automotive Engineers.

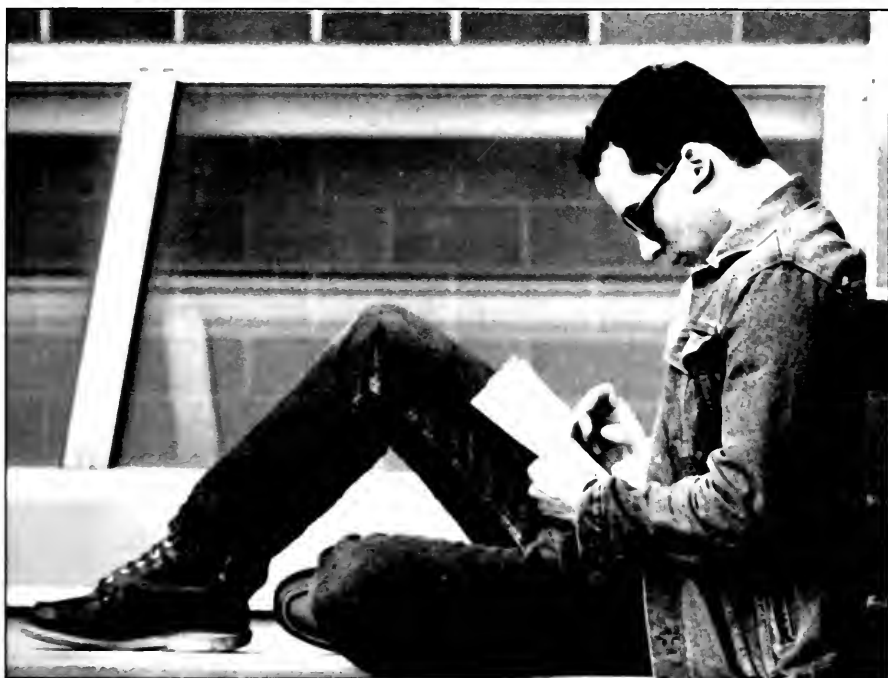

Studying inside could drive students to insanity. So when the weather turned warm, the great outdoors became the perfect library. Students caught up not only on their readings but also on their tans in the process.

Freshman seminar geology students lived the ultimate out of class experience as they traveled south to learn about the environment first hand.

Students

Enjoying The Great Outdoors

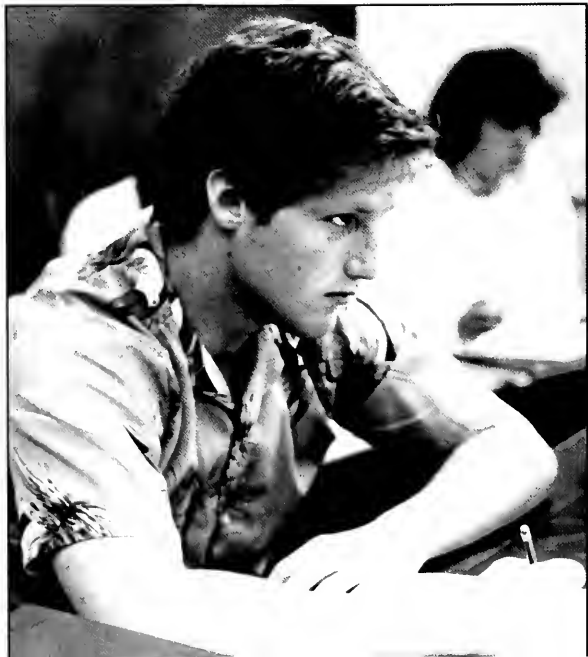

In the fall semester, English Professor Peter Beidler taught English 97, an experimental class where freshmen learned to write their themes using a word processing program on microcomputers in the Computing Center. Beidler used a terminal that projected onto a large screen in front of the classroom to show his students the best arrangement or style for a particular theme. The students were chosen at random by the registrar. The course arose out of Beidler's suggestion that it might be interesting to teach a course using the new microcomputer facilities on campus. Still, the course remained freshman ex-

pository writing. Beidler implored his students, "Write a theme that not everyone could write, one growing out of your own experience."

Showing Their Class

Of course, when the pressure of studying was too much to handle, students spent what free time they had relaxing and socializing.

Students

Taking A Break

COMPANIONS

In everything they did, students learned how to live with each other. Whether in a dormitory, a coed residential college, a fraternity or sorority, or an off campus house, students experienced new ways of life with their companions. A fresh outlook revealed the many living alternatives from which students could choose.

The range of companions was incredible. A senior took the giant leap into married life and, with her husband, learned how to deal with the pressures of both academics and marriage.

Hartman College opened its doors and came through a success by providing a family atmosphere. Taylor College was still going strong in its second year. The success of both colleges proved that coed residential colleges were a viable living alternative. Still, regular on campus dormitory living remained popular.

Many students, bored by

the on campus lifestyle, made the move off campus and entered the brave new world of bills and landlords.

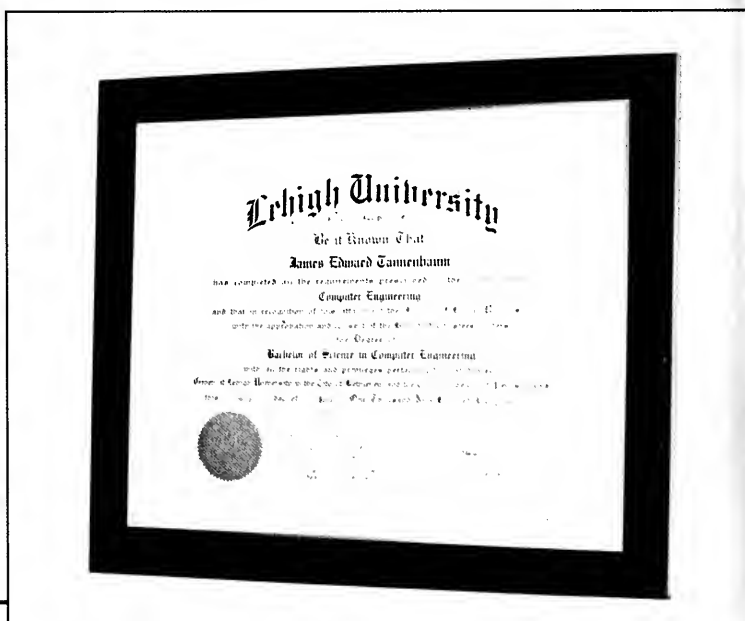

No matter where students lived, they had lasting impressions of their early introductions to Lehighlife.

The increasing female population brought the need for additional sorority housing. The solution had Alpha Gamma Delta and Gamma Phi Beta joining Alpha Phi in the Upper Centennials. And Greek life in general had its share of ups and downs in a year of both probations and awards. Although having parties seemed to be the only reason Greek organizations existed, fresh perspectives exposed a year of fundraising and community contributions.

With more females on campus, Little Sister programs became an important part of fraternities, and changes in attitudes toward dating were inevitable as the ratio between men and women began to even out.

M As husband and wife, Jim and Ellen Tannenbaum were

Married By The Books

Most people are skeptical of fortune cookies. Ellen Silver and Jim Tannenbaum may have been, at first, until they got the same fortune on both their first and second dates. It said, "Marriage is something you have to give your whole mind to."

After they married on July 4th, 1985, before Ellen's senior year, they soon realized the effects of juggling marriage, college, and career. Yet, their story did not begin on the day they became Mr. and Mrs. Tannenbaum.

Ellen and Jim met in her freshman year when he was a junior and a brother at Alpha Epsilon Pi. Her parents and his aunt and uncle, who were close friends, suggested that he help her move in. They hit it off and dated for two years until Jim proposed on September 15, 1984. Ellen, by this time a sister at Alpha Omicron Pi, accepted on the spot because, as she said, "I was a sucker for a smile."

The question of why they married while she was in college remains. They did not want a long engagement and agreed on a December 1985 or summer 1986 wedding. When Ellen, who was on

the basketball team, suffered a knee injury, they decided to marry sooner. Their decision was also affected by the fact that a ceremony during her senior year would have caused too many conflicts with her finals and job search. They chose July 4th, 1985 as their wedding

"Marriage is something you have to give your whole mind to."

— Fortune cookie

day so, as she said, "he wouldn't forget it." Fortunately, she was off crutches three weeks before the ceremony, although she was not able to dance. During the year, they had an apartment on 4th Street.

Originally, Jim and Ellen agreed that being married while she was in college would not be convenient because of the obligations, but they knew they would have to assume these responsibilities eventually. Although she believed that "college is supposed to be a 'me type of time'," she realized that her so-

cial life centered around him anyway and that her carefree time would not be destroyed. When Ellen was injured, and Jim made dinner for her every night, they realized that they could endure marriage and college together.

No marriage is without its share of conflicts, though. After they were married, they both felt "trapped" in a world of half and half. She was half student, who went on the Hill or to Bloomers, and half wife, who went to parties with Jim's married friends from work. Yet, it was humorous to see the reactions of sorority sisters when Jim was introduced by Ellen as "my husband." Her "double" life was most apparent in the confusion of using two last names. In classes and to friends she was still Ellen Silver, but on job interviews she used her married name. She admitted that sometimes she did not know which name to use.

His day ended when he left work, but he had to deal with her academic life, especially when she had group meetings in their living room. His social life was constrained because his friends were married couples and she was not always free to go out with them. Marriage seemed like an artificial situation much like "playing house." But when he had a good day at work or she did well on a test, they shared the happiness, and marrying sooner was the right choice.

Financial burdens were lessened because her parents paid for tuition and books, while Jim took care of expenses and food. Since he has a job nearby, she also looked for work in the area, which she may not have done if they did not marry sooner. As for their college experience, they realize that they would have had a different time if they did not meet so soon. Still, they have no regrets marrying while in college. "It's been fun," they said.

The first residents of Hartman College were happy in A New Home Over The Hill

Hartman Residential College emerged as a new breed of living alternatives, combining the closeness of a fraternity with the convenience of a residence hall. Modeled after Taylor, the first Residential College, Hartman developed a flavor all its own, which contributed to its outstanding success. With only forty residents, Hartman became a community-type dorm with its residents all sharing a close relationship.

In fact, residents grew into a family. Rather than dividing into small cliques separated by hallways, as in most dorms, they socialized as a whole. This unity was facilitated by the small number of people as well as the many functions in which everyone participated. Nightly communal dining provided an excellent opportunity for everyone at Hartman to be together and to get to know each other in a casual atmosphere. Another added advantage of communal dining, according to a unanimous consensus, was that the food was better than that of

the U.C. Many residents enjoyed cooking in their own apartments as well.

Each apartment consisted of two double bedrooms, a living room, kitchen and full bathroom. The spacious arrangements provided for more of a feeling of being at home than in a cinderblock dorm cell.

Living in SMAGs also proved to be a

"It's kind of like a coed fraternity."

— Beth Alexander

pleasant change. At the end of a long, hard day of classes, most Hartman occupants felt a sense of escaping campus and returning to their home away from home, over the hill. Actually, this was the reason that many of them decided to move into Hartman. They wanted to live in an apartment away from campus, but still be surrounded by other students with whom they felt close. Aside from a few inconveniences with

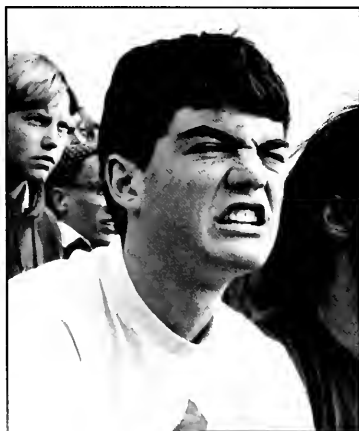

the bus schedule, they felt great relief in being separated from actual classrooms yet still being all together.

Hartman had many social events to keep everyone occupied. Their "Drink or Treat" Halloween party, a sort of dress-up hotel party, proved to be a huge success. Every Thursday night was highlighted by the huge crowd watching "The Cosby Show."

They also tried to get faculty involved as well. Every willing student was assigned a "Faculty Buddy," with whom he developed a close relationship.

The majority of residents were more than satisfied living in Hartman. Most say they'd never go back to a regular dorm, because it was more than just the superior living arrangements, it was the closeness they developed amongst each other in making college a more relaxing, enjoyable place. Said sophomore Michele Bell, "We're all here to learn from each other and we have a great time doing it."

In its second year, Taylor College was Still Going Strong

It was an experiment that worked. In its second year, Taylor, the first residential college, continued to prove itself as a successful living alternative to dormitories and the Greek system. And, although it influenced the formation of

Hartman College, Taylor had created its own unique personality that was enriched by its diversity of people and opportunities.

Taylor's distinction came not from the fact that it was the first dorm to use coed

by room halls, but from the success with which it integrated its diverse residents. Taylor was not just a place to sleep and study; it was a home and a family.

Much of its success was attributed to Professor J.R. Aronson, who acted as faculty advisor for the second year with his wife, Judy. They strived to make the Taylor experience more worthwhile by organizing such educational opportuni-

Taylor was not just a place to sleep and study; it was a home and a family.

ties as a trip to New York City to see "The Magic Flute" as well as weekly discussions for faculty and students.

But student involvement created the atmosphere that made Taylor successful. Its government, comprised of Hall Director Jenny Merritt, a House President, Hall Presidents, Social Chairmen, and Gryphons, worked to provide activities for all residents. These included parties, visiting lectures, and monthly Taylor Dinners held in the Asa Packer room of the UC. Perhaps the most distinctive characteristic of Taylor was its Town Crier, who read humorous messages to the residents each Monday night.

Carothers 3

There once was a dorm named Carothers, whose fame was above all others. The girls, they were pretty, all personalities witty, but their behavior would shock their mothers.

Their year started off beautifully, they partied quite dutifully. But much more important than that, as they sat and they chatted, they found out they got along suitably.

Then a strange thing occurred called classes, for these, the girls put down their glasses. So they started their studies. And became better buddies, but the weekends were still saved for bashes.

The girls were very neat, so now then, you shall meet. First of all, at the end of the hall, Arlene or A and Patty Ann Wall. Lisa and Kris who are quite dandy, then two called Speck-tater and Randi. The next are real keen, Pam and Cristine, and a super Joe Gryphon Eileen.

The following ones, Marla and Stacey, occupied room three-zero-eight. Right next to them were Sharon and Kim, and all this occurred through fate. Carol and Cathy, their mess and all. Then Nancy and Susie, across the hall. They were always on time, but Edie was not. She and Caroline lived in the same spot. Onward we go to Tish and Dory. Then last but not least, dear Karen and Lori.

Very exciting were the events of the year, of the hill the girls had no fear. Sorority rush, those pots and pans. Hall maggots, and basketball fans. Little sisters here and there, and an October party with a lounge covered by beer. With the warm weather, we all hit the beach, which, very luckily was in arm's reach. Ready for finals, all dark and tan, we drove crazy every Lehigh man.

Then came the end everyone would dread, and there are eight who are off to Broadhead. We had a Theta, Beta, and one Delta Chi, DG's, Gamma Phi's and some from AOPi. But even as we go off our own separate ways, we'll never forget our freshman Carother's days.

Those who made the move off-campus realized that it was An Experience Beyond All Others

As it has often been said, "Variety is the spice of life." Many students believe this and decide to try new living alternatives as they become tired of the on-campus dormitory routine. Some decide to make the move off-campus. For many, this decision catapults them right into the middle of "Adventure Land."

The whole idea of moving off-campus seems easy and painless, but the obvious isn't always the case. First comes the hunt to find an apartment,

which for most, isn't too difficult. The fun starts when it comes time to decide who gets which bedroom. Friendships can become a little strained by the time this decision is finalized.

Soon the bills start to pour in. They seem to come by the dozen every other day. Of course that one bill always forgets to be paid and another one gets misplaced for a short period of time.

Inevitably, the problem of "house duties" comes up. These brave warriors have to cook, clean and do dishes. This

sounds absurd, but it has to get done (most of the time). Cleaning, paying bills, and cooking may seem grim. It can be a bother, but those weren't exactly the things that prompted most to make the move in the first place.

For most, they feel a sense of independence — it's their first chance to experience "the real world." With this independence comes the privacy most have longed for ever since they stepped into their freshman dormitory. Fights over the television are eliminated,

For many, the decision to move off-campus catapults them right into the middle of "Adventure Land."

for the most part. Also, eating becomes an independent decision no longer revolving around U.C. hours and lines. Finally, the privacy that many enjoy in the bathroom is restored with the advent of moving off-campus.

Most important, however, is the close friendships that develop. Living with the same people for almost 9 months can have it's problems, but mainly it's a whole lot of great memories that are left behind when it comes time to pack up and move on.

Is it worth taking the chance to move off-campus? It most certainly is. It's an opportunity to build close friendships and develop a sense of responsibility. Who said college doesn't prepare one for the real world?

New and old students alike were left with

Lasting Impressions Of Lehighlife

Change was inevitable, but certainly not predictable. Every student who dared to make the leap from high school to college was faced with the uncertainty of adjusting to new lifestyles. And first impressions tended to remain with students as they eventually adapted. Freshmen were the most surprised by the differences between their early expectations and actual experiences; yet, even upperclassmen remembered why they originally had chosen Lehigh.

Many freshmen had previous knowledge of the numerous facets of life here. Suzanne Polcyn and Cathy Bohny, who both had older brothers that attended Lehigh, knew firsthand what to expect, although Bohny admitted that actually arriving here was "a shock."

Konrad Alvarino, a native of Peru, never set eyes on campus before arriving, but said that the counseling service in Lima was very helpful. "Lehigh is more or less the same was the microfilm showed, but you can't really tell till you live here."

As for the social life, most freshmen were pleasantly surprised not only with the Hill but with their halls and housing as

well. Charlie Fersko voiced a popular opinion when he said that the social life was "much better than I had hoped for."

Many of them did not expect the work to be as difficult as they found it. Even those who expected large amounts of studying were somewhat taken back. "You can't cram like in high school," said James Heinly. "I expected the work to be hard," admitted Jodi Maxon, "but you don't know how hard it is till you get here," added Debbie Sickler.

But freshmen were not without their complaints, which included the surrounding south Bethlehem area. Descriptions ranged from creepy to boring, although most admitted that town provided such vital necessities as soda, popcorn, and deodorant. As Fersko said, "Bethlehem isn't all that bad, and anyplace that has a mall nearby is cool."

Finding one's way around campus wasn't too difficult for freshmen, although some admitted to being very confused on the Hill. Other complaints included doing laundry, buying books, and having pubnights that started too late. Yet, despite the complaining, studying, and partying, the class of '89

adapted quite well to Lehighlife.

Still the question remained. Why did the thousands of students who came here make that very decision? Each had his or her own reasons, which included a positive campus atmosphere, a good academic reputation, and an active social life. Many also had positive comments about fellow students and the environment. Paige Hoefler, '88, said, "When I came to visit, everyone seemed outgoing and friendly." Kathy

"The social life was much better than I had hoped for."

— Charlie Fersko, '88

Duggan, '87, said she "thought the campus was pretty."

Many students were pleased with the academic offerings as indicated by Alex Handlers, '88, when he said, "I feel that this school offers a respectable quality of education." Most students added that they heard Lehigh had a very good scholastic reputation compared to the other universities that they had considered.

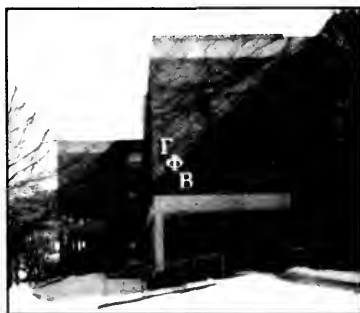

Some students had a more unique reason for attending. Linda Chai, '89, admitted, "I liked the pictures in the catalog." Maureen Nulty, '88, answered, "I didn't have to write an essay for the application."

The social life was also an influential factor in choosing Lehigh. Its reputation as a "party school" prompted many to look even further into the university.

Whatever the reason for deciding to attend, students were left with lasting impressions of the campus and its people once they got here.

**By Steve Bailey and
Maria Rappoccio**

As limited housing became a problem, the solution had

Sororities On The Move

Every year since 1971, more female students have populated the campus, and with this increased number of females a related need for more sorority housing had arisen.

Between 1982 and 1984 the situation began to be resolved. The upper Centennials would be transformed from dormitories into sorority houses. During the transition, the sororities would take turns moving from SMAGS and off-campus into the dorms. In 1984, Alpha Phi was the first to make the move from SMAGS. Gamma Phi Beta and Alpha Gamma Delta also made their way to campus in the fall of 1985. Arrangements are being made for Alpha Omicron Pi and Kappa Alpha Theta to join the other three on campus. Delta Gamma will soon move from their off-campus house to the Upper Centennials, which will be known as "Sorority Centennials" in 1988.

The sororities are also in the process of moving to campus in an effort to make the Greek life and the University more coed.

The differences in living accommodations were many. Off campus living (Delta Gamma) and SMAGS' living

were closely related. Both have apartments consisting of two or three bedrooms, a dining area, a kitchen, a living room and a bathroom. The difference is that they both have a community room, but in SMAGS the room is used for dinner and special events, while in Delta Gamma it is used for special occasions only.

In the Centennials, the living accommodations are dorm style. There is a bedroom for two people, a community bathroom, a tv lounge, and a community kitchen and dining room which is used for dinner every night.

All three styles have their disadvantages and advantages. The women in SMAGS feel a sense of security because they are in the middle of a field and they have their own house in which to eat dinner. But they do have their problems. The women must travel back and forth to campus on buses or in cars which makes attending classes difficult and visiting friends inconvenient. Limited parking spaces on campus make traveling over the Hill a problem. Living off-campus in Delta Gamma also has its ups and downs. They do have their own apartments in their own house, but the problems seem to outnumber the advantages. The sisters have to pay their own bills every month. The sorority is unable to gather together for dinner every day. Since the house is not large enough for all the members, some of the women live in their own houses off-campus. The location of the house has its safety problems, too. No buses run from campus to Delta Gamma, so the women must walk or drive cars.

The Centennials became a good alternative for the sororities. The buildings are close to classes; consequently, transportation problems were reduced. They eat dinner together everyday giving members of the house a chance to become closer. Now, sororities get more visitors and are more

sociable with each other because of their proximity.

The reactions of the sororities to the move are positive. Most of the women that have not made the move can not wait to be on campus. Karen Kornheiser, a Delta Gamma sister, said, "While I love living in our apartments, I am excited about moving on campus, not so much for the location, but because the move will improve inter-sorority relations." The idea of eating dinner together appeals to many, also.

Most of the women that have not made the move can not wait to be on campus.

The dorms look good because the sisters fix them up to make them more like a sorority house. Still, some senior members do not want to move because they like their present apartment arrangements and do not want to live in a dormitory again.

The sororities that are in the upper Centennials seem to enjoy it. Most of the sisters would not go back to other forms of housing because they enjoy being closer to other sororities and within themselves. They also save money on transportation.

The move onto campus made the process of rush easier, too. More prospective sisters were able to visit the houses without the problems of transportation and time conflicts with studies.

From most perspectives, the move is for the best. So in 1988, say goodbye to the Upper Centennials as they have been known, and say hello to the new "Sorority Centennials."

By Lisa Bolitsky

Greek life was more than a Carnival On The Hill

Fresh perspectives of Greek life revealed much more than pledging, rush, and parties. Although the news was both good and bad, it proved that the Greek system was an essential component of Lehighlife.

The year in Greeks started off with two fraternities facing probation charges from the semester before. In August, students returned to find that Delta Sigma Phi had been dissolved for four years as the result of a hazing incident the previous March, but it would be allowed to re-colonize in 1988. Delta Upsilon was put on disciplinary probation for the year, after being found guilty of hazing in the previous April.

Pi Lambda Phi, which had been prohibited from serving alcohol for one year, noted that the sanction was ineffective in changing the brothers' views about alcohol. A positive effect was that "... it (the punishment) brought the house together because of the hard time we went through," said Social Chairman William Neff.

Gamma Phi Beta, Alpha Gamma Delta, and Alpha Phi sororities were robbed of cash and jewelry late in August. An area youth was later charged with the robberies.

Not all news was bad, though. Fall saw the return of Delta Tau Delta to the Hill after being dissolved for four years. And Chi Psi was recognized as the most outstanding chapter in the nation by being awarded the Thayer Trophy by the Chi Psi National Headquarters.

Two Sigma Alpha Mu pledges were arrested the morning of September 18 for criminal mischief after they were allegedly blindfolded then deserted in Hellertown. The fraternity, charged with hazing violations, was found not guilty at an InterFraternity Judiciary committee meeting on October 7.

Phi Kappa Psi, having earned a national charter, needed only official recognition by the administration to become the 32nd fraternity. Six of the brothers were suspended from intramural sports competition for falsifying their score cards on September 10. On October 8, the Phi Kappa Psi colony was denied entrance to the IFC because "adding a new frat would dilute the

(Greek) system," according to Mike Boyd, Coordinator of Greek Affairs. In a letter to the **Brown and White**, Fred Rivera, Phi Psi Vice President, said, "This chapter has shown that it is capable of thriving without IFC recognition, and will continue to do so in the future."

On November 6th, Bob Egan, author of the book **From Here To Fraternity** based on his tour of the Greek system across the country, gave a lecture in Packard Lab. He referred to types of

Greeks, ranging from the "stud house" fraternity brothers also known as "the blow-dry guys," to the "face house" sorority sisters whose "bodies could cause cardiac arrest in a yak." Describing Greeks in general, he said "... there's just something in the Greek psyche that says 'When in doubt, party.'"

At a meeting on November 12, the IFC reaffirmed its policy of checking IDs at parties and social events in an effort to reduce the likelihood of problems with non-Lehigh students. Many fraternities disagreed with the policy, saying it was impractical to check every guest's ID. The policy of limiting cars on the Hill on weekends was another controversy that faced the IFC. Both issues were raised after an Allentown man was injured by a moving automobile near Alpha Tau

Omega on October 24.

Sigma Chi was put on disciplinary probation until December 1986 after being charged with breaking a window at Beta Theta Pi and blocking a Lehigh bus from passing the Sigma Chi house.

Gamma Phi Beta and Kappa Alpha earned the highest cumulative averages among Greeks for the fall semester. Kappa Alpha had been ranked 30th in the spring of 1983.

A successful Bid Day on January 25, 1986 kicked off the second semester of Greeks. Fraternity bids were accepted by 361 men in the freshman class, and 130 sorority bids were accepted from the 303 women who signed up to participate in rush. Those who were not given a bid were able to participate in post rush.

For the first time in the chapter's history, Lambda Chi Alpha was awarded one of only four national Grand High Alpha Awards for chapter excellence, in February.

Rob Ripp, '87, was elected to succeed Howard Goldstein, '86, as IFC president at the meeting of the IFC Executive Board on February 5. Ripp stressed communication and unity as the main areas that he would concentrate on. He was joined by Doug Hess, '87, vice president; Mike Alfieri, '87, treasurer; Sean Kelly, '88, secretary; and Mike Rubright, '87, judicial chairman.

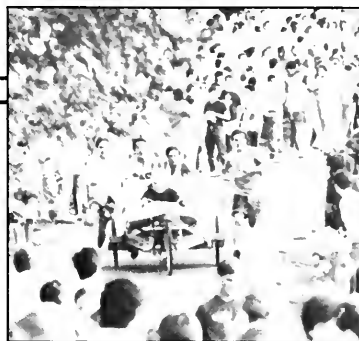

At the same meeting, it was decided that every car with a Lehigh registration sticker would be allowed on the Hill at all times. The decision was the result of resentment toward the policy of allowing only cars owned by Greeks on the Hill during party hours.

Newly elected Panhel officers were Lisa Eisenberg, president; Diane Barone, vice president, housing; Laura D'Orsi, vice president, rush; Lisa King, treasurer; and Kim Byrne, secretary. All were juniors.

Although Greek Week was marred by disorderly conduct and criminal mischief, students still enjoyed participating in the traditional celebration of bed races, greaser eating, and parties.

No review of the Greek year would be

Alpha Tau Omega Mr. Lehigh Contest

complete without mentioning the impressive contributions made to charities and nearby communities.

In November, Chi Phi helped clean up the Hellertown Reservoir Park. The effort had not gone unnoticed; it brought the house a Certificate of Appreciation from the city.

Alpha Phi raised over \$1,000 in its Cardiac Arrest fundraiser on November 14 by 'kidnapping' several faculty members and holding them for ransom until each raised \$50 for the American Heart Association.

Alpha Tau Omega held their first Annual Balloon launch on November 23. The fundraiser benefitted a local charity. For the fourth year, Theta Chi participated in the Theta Chi Run For Life before the Lehigh-Lafayette game. The Theta Chi chapter of Lafayette ran from its house to Taylor stadium with the

game ball.

Alpha Sigma Phi and Alpha Omicron Pi co-sponsored a softball tournament and donated the proceeds to the

With the highest fraternity scholastic average, Kappa Alpha went from 30th in 1983 to 1st in 1985.

Lehigh Valley Easter Seals. Kappa Alpha Theta and Delta Tau Delta also teamed up to sponsor a Thanksgiving food-fund drive, donating food and \$550 to the Catholic Social Agency of Allentown.

Gamma Phi Beta sponsored a Girl Scout Troop, and Sigma Phi Epsilon

participated in Channel 39's Holiday Showcase Telethon, answering phones. Tau Epsilon Phi prepared a Christmas dinner for the Wiley House, a home for emotionally disturbed children.

Zeta Psi raised over \$4,000 for Children's Rights of Pennsylvania in February. Delta Gamma earned \$1,200 for Sight Conservation and Aid to the Blind at its third annual Anchor Splash in Taylor Gym on March 15.

Lambda Chi Alpha donated proceeds from its "Maze" to the Muscular Dystrophy Association. Delta Phi's Volleyball Beach Blast raised over \$1,500 for the Big Brothers — Big Sisters of the Lehigh Valley, and Sigma Chi's Derby Days benefitted the United Cerebral Palsy foundation.

Between Greeks and independents, little sisters had The Best Of Both Worlds

Somewhere between the tight bonds of sorority sisters and the liberal friendships of independent women hides another class of females. They are known as "little sisters" and are derived from the former two distinct classes of women.

The exact definition of a little sister depends on who is giving it. Some might say that a little sister program serves no real purpose in a fraternity, whereas others may believe that a sisterhood is an important and integral part of the house. Still, some similarities exist throughout little sister programs. All little sisters become a part of a fraternity in a formal ceremony, yet they do not belong to the brotherhood nor do they hold status equal to that of a brother. Several fraternities have little sister programs which vary greatly from house to house.

Little sister pledging is never as difficult as its respective brother pledging. Their pledging programs are much shorter and less intense than that of the

brother pledges. Pledging varies from four weeks of getting to know brothers and sisters at cocktail parties to two semesters of weekly phone duties, pledge trips, projects, and memorizing endless pages of information about the fraternity. The objective is the same: to

The brothers may sincerely want to form close friendships with the sisters.

make them feel that they are a part of the house and to get them to know as many people as possible.

Duties vary from house to house as well when the pledge becomes a little sister. The main function of a little sister is to show up at parties and/ or give the house a reputation of having good parties filled with girls. In some houses, the brothers may sincerely want to form

close friendships with the sisters, since it would be difficult to form these friendships if the sisterhood did not exist.

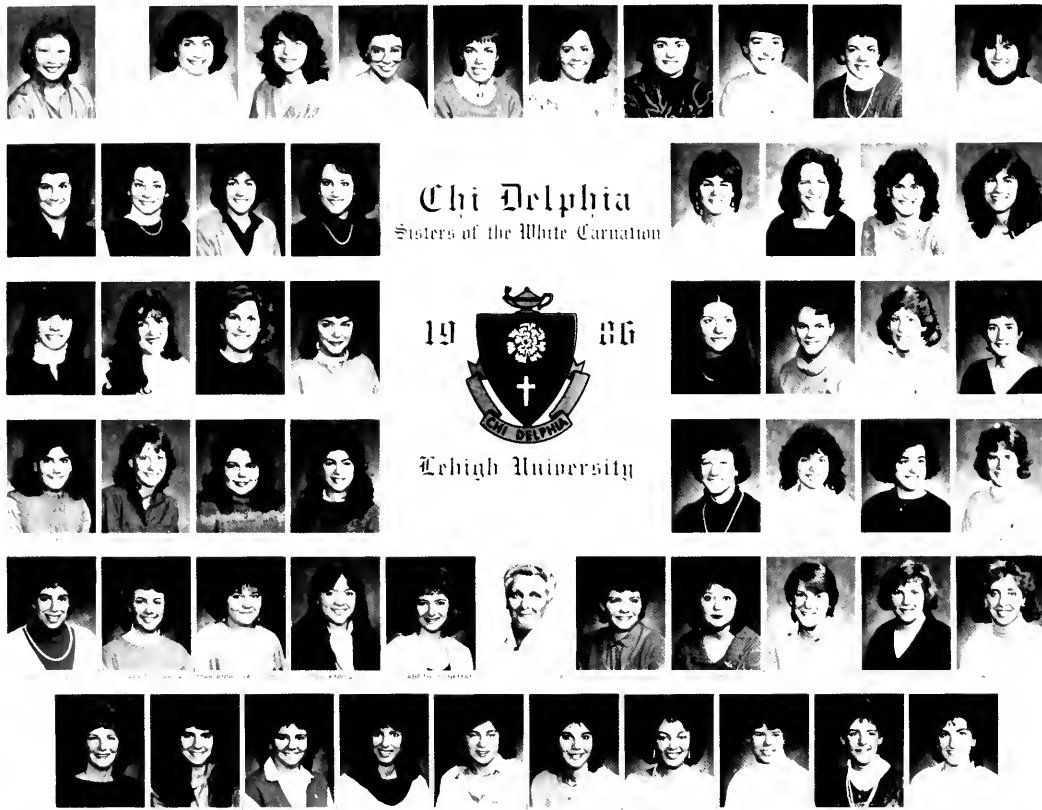

After initiation into the sisterhood, a new little sister may realize that it might not be the tight bond that she had expected. It revolves around the brotherhood and with the exception of one or two very close sisterhoods, most of the sisters are closer with the brothers than with their fellow sisters. As might be expected, cliques of very close friends exist within the sisterhoods, but a sisterhood on the whole is not usually as close as the bond of the brothers. However, this loose structure of the sisterhood is what makes little sisters unique. If they wanted constant companions, they could have joined sororities. This way they get the best of both worlds: a chance to meet and become friends with a group of men and women in addition to being able to live anywhere and maintain close friendships with others outside the fraternity system.

The ace of Spades: 11 in 1 & 1 in 11 ... 6 pledges ... way to go Kaiser, 5 more ... A pin & a broom ... Which little black guy? ... A Bayer follows CB home, Crowley studies for a Chem test, where's Mundy, Pledge-pledge master, pledge homo, Psi Chi — the revolution, a fetish for gargoyles ... They torched the mother Fers, Scooter & the paper lodges, Mitch & CB almost get lynched in Hickstown, USA, Me bounces Goober's head, and vise versa and so on ... Mitch is ready to walk.

I.E.'s get smart & go business, Heardy gets a footjob from a cheese steak ... Mitch gets a buzz ... Where Goob? ... In the fountain, Boy did we study alot, "I am Dave Dickerson" or is it Mr. Sandman, "Come on Charlie ... break it ... you ass!!" "Throw the bolster too!!" Tri Sigs meet Mr. Dick Slap, Parker blows Mitch! "Beef did you ever see a naked woman ... Thanks Kathleen!" ... Bye-

bye Emma, hello Lupe ... "You're fucked up!!" ... FP means fat pussy, stop throwing ice you gay bastards, get some cence in the tube room, Beef throws firecrackers at Greg ... We're going to be blued!! ... Swoop hangs all over the place ... "You can't get a stinger in tight jeans," "I just want to see a blonde pussy." ... CB gets Bj's during finals ... Who is Jane Baldwin? ... Sugar bear gets slurped ... Where are Charlie's shoes ... Thanks for stealing Frank's ties, Greg cops some tit from Sarah, Heardy avoids the Herpe, Cheese steak Kyle attacks the lodge, Bryan sleeps on the kegs, Bryan gets his head bounced, Swoop gives Adriene body oil, Wayne beats up the soda machine, Wayne yanks Heardy out of bed, we all get sucked in, Swoop, the only true 69, CB gets macho in Beta's lot ... "You can't get there from here" ... "Let me smell your fingers," Tank takes out a window at Lambda Chi, Uncle Ben & Nephew steal girlfriends over the summer.

85 pumpkins ... beat that, New Years: "You know you like it," 12 Goober invade the lodge, Sugarbear hides in the closet, CB rides the white elephant while Grog and mouth sleep, "Who's next with Skimmer?" ... Ask Brenda ... Parker makes ALL-American ... Katina pulls weeds on Monday ... Is it Doug or Dan? ... Frank lays on the Sandy beach ... "Did I fill you up?" ... Crowley sees the snow fall — "Kristen you're not Bryan," Trembley 7 H Fers, Smile Parker, you're on Candid Camera ... Beef and Panface ... Charlie doesn't know who he is going to cut with, Goob bounces Meg's head and bones Capone ... Tardekcufnyrak

The BARN is back!! Bryan's endless summer, 3D's anad F, 50 girls?? ... Yeah, ok Bryan ... CB gives his title and his kitten to the dawg and he eats it ...

Charlie run, its the loon ... Poor, poor Mia ... Beef rocks Deena's world!! ... Weld blew Doug's girlfriend in the tool room and thought of Perry, "Mitch where are the computer room keys?" ... Parker eats the Big Mac, Sorry Guzzler ... The Dickerson-Sapir soap opera, continues: Beef, how big is your back? ... STuuud!! ... CB Bryan take the plunge; Mitch dumps out the window, Goob headbutts the floor.

A black Santa? ... Brenda beats up Bryan, Erica mauls Eric ... Fuck DG!! ... Swoop takes Paula's heart to Boston, Beef almost losses his lig n a loggin' accident, Swoop crawls in Crista's room ... New ware hookers, Charlie & Book ... Some secret, Barton gets the double BJ on his b'day, Suzie seduces Mitch, Weld gets slammed & thrown in the fountain, Samantha looks like Gutter, CB sucked face with Karyn Yost, Senior class goes to pot on Spring break, "He's not in the tool room you ass!!" ... Beth Ann you idiot, leave Crowley alone ... Suppy bounces Kathy B's head, Anne punched some chick Frank was kissing, Heardy don't live with Suziel ... Class of 1989 ... One hell of a pledge class, carry on the tradition boys ... Adios ... Y.I.T.B., C.B., Parker, Mitch, Heardy, Charlie, Tank, Beef, Swoop, Bryan, Goober and oh yeah ... Schreck.

Williams College

Founded Locally — 1885

Colors — Royal Blue and Old Gold

Delta Upsilon (DU) is a very unique fraternity at Lehigh. We at DU do not base the foundation of our brotherhood on secret rituals or hazing. We rely on our own system, a system of friendship and loyalty.

DU is a house rich in tradition and ability, both in academics and athletics. Several DU brothers hold honorable positions in the Tau Beta Pi Engineering Honor, while many brothers compete in varsity sports such as football, baseball, and lacrosse. In addition we are very competitive in intramurals and year in year out DU fields strong teams in basketball, football, boxing, and wrestling.

Furthermore, many brothers are active in the Brown and White, the school's newspaper, and WLVR, the school's radio station.

Being a DU brother is a rewarding experience that is looked on with much respect and admiration around campus. We can offer you one of the newer houses on the hill (no cold dorms) and our social events (the most notable being our annual Greek Week Beach Party) are not to be missed. Come up and visit us and see if DU is for you.

Participation in extracurriculars is a vital part of our college experience. Kappa Sig brothers participate in IFC, Brown and White, Epitome and Forum. We also have a strong intramural program with four President's Cups to our credit. Brothers also participate on varsity baseball, hockey, rugby, soccer, football, and track teams.

Socially, Kappa Sigma never fails to produce with its annual Bahama Mama Party, which raises over \$1000 every year. Timely theme parties and our famous IFC cocktails are also campus wide attractions.

The fraternity experience has been a major part of many Lehigh Students lives. We at Kappa Sigma encourage you to come up and visit and see for yourselves if the fraternity experience is for you.

High school was a thorn in my foot. Lehigh's been a nail in my brain. AARGH — a feeling of dread. The only thing I can say right now is that there is nothing further that can be said at this time. Want Wally to drive, Neff? Right now I'm cleaning my oven. A Repo-man's life is always intense. I feel strongly both ways. Pi Lam shuffle. Whiter is better. You spineless, jelly-fish-like sophomores. Get up Ferber, so I can knock you down. Manly Men doing Manly things amongst men. Turn around Choppers. Bogus off-campus Dork. Rat-dog: part rat, part ashtray. "I see sneakers, jeans . . . and a big set of lips." "Let me take you to the Casbah and buy you a Chapeau du fromage" Glen's got the key to the Iron Box. Mega malfunction, dude. Bloody Millies. Pi Lam '86 starred the following: LITTLE GEORGE, DEREK, BEETER, ANDY, TED, DIVIT, FLU KEARNSY, STAMMY, NICK, NIEMO, and, BIG GEORGE

T In the fifteenth year of Lehigh women, men commented on

The Changing Face of Dating

Relationships between the sexes was an often discussed issue. In the past, most would agree that there had been little dating. Many men had resorted to dating girls from other schools.

But among freshmen and sophomore men, the trend seems to be changing. "A lot of the guys in my class have been dating girls from Lehigh," said John Harvey '88. Not too long ago, men had

vocally expressed their opinions that Lehigh women were not as pretty nor as sociable as women at other colleges. Now it seemed that the women were getting much more respect. One junior stated, "The long-standing attitude that women from Cedar Crest and other area colleges are better-looking than Lehigh women is bull!"

One feeling that changed very little

Few differences in opinion existed between men who lived in dorms, off-campus, and fraternities on most issues about women. The separate living groups seemed to differ only on where and how to pick up women. According to one fraternity member, "It's harder to pick up girls if you live in a fraternity, because the girls figure that the men are only looking for a casual fling and often shy away from any approaches." On the other hand, many men who did not frequent the Hill said that they tended to meet women on an intimate basis at smaller off-campus parties.

It was reassuring to see that men and women were beginning to date more and that the men were showing women more respect. Some of the change in attitude could be related to the ratio between guys and girls. The class of '89 had 392 women out of 1106 students, or a total of 36 percent. As the campus-wide ratio reaches equilibrium in the years to come, the tension between men and women may continue to diminish, so perhaps the dating patterns will change even more.

By Tom Jost

The change could be related to the ratio.

was the attitude toward the sororities. Ron Zimmerman, '87, said, "Most sorority girls are really nice when you meet them individually, but they change completely when they're out with the rest of the girls in their house."

Some men voiced even stronger opinions. Lars Tuveeson, '88, scoffed, "Sororities are great if you want to hang out with fifty girls who walk, talk, eat, and sleep alike."

However, to say that all men were against sororities would be a gross generalization. "I've met many sorority girls," said Rick Young, '88. "They're a lot of fun."

SPiRiT

Learning from each other through academics and various lifestyles was nothing compared to what students could accomplish when they united toward a common goal. True spirit shined as students participated in extracurricular activities.

The University Center served as the home for many activities. The newspaper, radio station, and yearbook staffs did their work in its basement, while upstairs, students attended meetings and performances.

Many complained that there was nothing to do on

campus. Fresh perspectives revealed that any interests could be satisfied. Honorary and academic societies offered education outside the classroom. Special interest clubs brought diverse people together for entertainment. Student governments used the power of unity to change existing policies and make campus a better place. And athletic organizations provided both competition and recreation. It did not matter what group it was, the Lehigh spirit continued to shine.

Academic Societies

The IEEE was a student branch of the professional organization, the Institute of Electrical and Electronics Engineers. Students were exposed to technical fields outside the topics covered in classes. Each month, the IEEE held a technical lecture, where the speaker was from academia or industry. The student branch sponsored tele-video miniconferences that were given by the parent organization. These miniconferences were conducted by a nationwide panel of experts who presented the latest innovations in technology. The miniconferences were live broadcasts which the student branch received using the satellite dish and controlling equipment purchased last

year. Students were encouraged to develop their written and spoken communication skills through participation in papers contests. The IEEE held a university contest and participated in the Walter B. Morton regional contest. Each contestant wrote a fifteen page technical paper and gave a fifteen minute oral presentation on his topic. Over the years, Lehigh has accumulated an impressive record of prize winning papers. The IEEE also held a variety of social functions to increase student-faculty interaction. These included spring and fall picnics and coffee-donut hours that were enjoyed by all.

WLVR — Radio Station

WLVR, the student-run radio station, broadcasted at 91.3 FM. The educational station provided the whole listening area, including a good part of the Lehigh Valley, with public affairs programs, university sports, and alternative music. Programming included rock, jazz, soul and classical music. All disc jockeys and staff members were volunteers who received no academic credit. They decided on all programming themselves, having no faculty advisory committee.

This past year WLVR altered its format, programming a new afternoon show featuring the New Music Top-30 Countdown. The Paisley Underground garage band feature, radio interviews of live bands, and the Friday Night Weekend Jam were all important to the station.

"Little Mary Sunshine," a light-hearted operetta of young ladies from a finishing school who meet handsome forest rangers, was performed by the Lehigh Choir on April 11, 12, and 13 in Lamberton Hall. The play, which first opened off-Broadway in 1959, was a satiric view of musicals in the first half of the 19th century.

Teresa Kent, '89, played Mary, the sweet young owner of the Colorado Inn in the Rocky Mountains at the turn of the century. Also in the cast was Rene Schillinger, '88, who played Capt. "Big Jim" Warrington, and Curtis Clump,

Associate Dean of the Engineering College, who played Gen. Oscar Fairfax.

The musical was directed by Deborah Sacarakis, Cultural Affairs Coordinator; Steven Sametz, Professor of Music, served as musical director.

December 8 marked the date of Christmas Vespers performed by the choir in Packer Chapel to celebrate the winter holiday. The choir also presented "Carmina Burana" on May 4, to welcome the spring season. The piece was done in Latin, German, and French.

Marching 97

The Marching 97 took pride in being one of the most enthusiastic groups on campus. The familiar group in brown and white dress, accompanied by chants of "nine-ty-seven" and strains of fight songs could be seen at nearly every football game and pep rally, the Lafayette bonfire, and even on the Streets of Bethlehem and Hellertown for their annual Halloween appearances.

The Marching 97 received their name from an ideal structure imagined in the 1950's consisting of 12 ranks of 8 people plus a drum major. It was this standardized size that allowed for the famous "marching Lehigh" seen at every football game, as well as being a static parameter in creating the many new field

shows that were performed. Led by a student executive committee of 9 people, members of the band were responsible for everything from writing the shows to conducting field rehearsals and playing in the stands. This situation created a high level of spirit within the organization, and also promoted the tremendous alumni support the band received.

Although much of the band's activity was based on years-old tradition, they were always looking for new ideas and creating traditions of their own. This season's contribution to 97 culture included a professional videotape of the year's highlights that could be purchased by the members.

The Brown and White experienced two losses of its own. First, in December, nine-year Journalism Department secretary Ruth Mathis retired, followed by Department Chairman Robert Sullivan who retired in June after more than 20 years with the program. His wise counsel, which had been so valuable to past editors and reporters, will be sorely missed.

With the retirement of Sully, the era of the old-timers of the department came to an end. The advent of new technology and the arrival of new professors had given the journalism department and The Brown and White a new look. An era had indeed ended, and a new and better one must now begin.

The Brown and White student newspaper

The Brown and White Staff

The Brown and White was in a state of transition. Change struck the paper in full force beginning in the later half of first semester.

As the B&W made the jump to high-tech journalism, embodied by the temperamental VDTs in the newsroom and the fuse-blowing typesetter hiding in the back of the office, lapses in sanity became as common as lapses in spelling. Doing it the 'Wally Way' was often more than many could manage.

First semester, EIC Pete

Trumbore successfully achieved the first large-scale dismantling of the typesetter after it broke down the day before the paper was to go to press, only to learn that the needed fuse had to be brought in by a company repairman. By then the machine was in pieces.

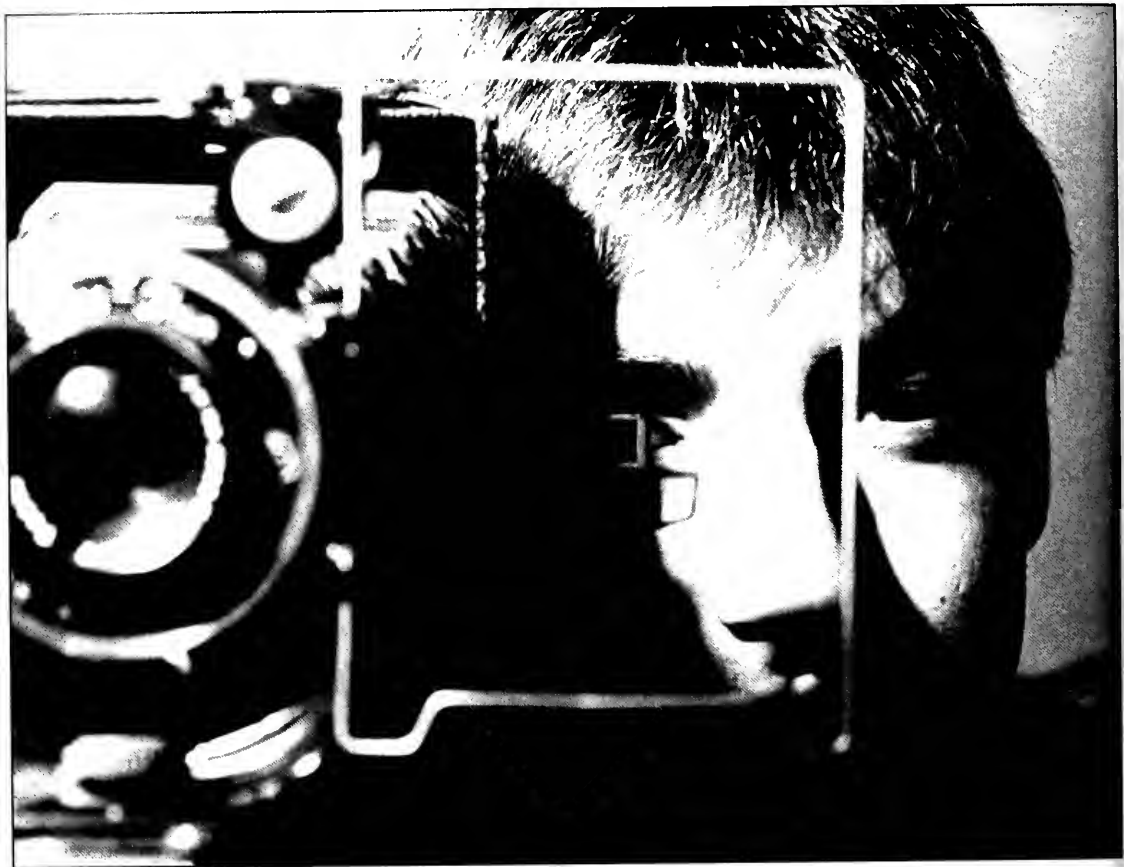

Early in the spring semester, Managing Editor Dan Ryan lost all control late one press-night and reverted to writing cryptic messages and posting them around the newsroom. Second semester EIC Rich

Simon was also not immune to B&W dementia. Simon, often enraged by the complexities of high-tech journalism, searched in vain for fuses to repair the again ailing typesetter. Remembering the words of advisor Wally Trimble, "Computers and typesetting will make everything easier," Simon grudgingly admitted that Wally was right, despite the fact that the elusive fuses remained to be found as dawn was rapidly approaching.

It was difficult enough to pronounce the name of the yearbook, let alone find its office in the basement of the UC. Still, **Eptome 1986** was actually being organized.

New traditions formed as the theme, "Fresh Perspectives," took shape and was applied to each section. A rise in price caused a mild uproar; yet sales were the best ever. A drive for patrons and sponsors raised funds for additional color and graphics.

Though they received little attention or credit, editors met every week to discuss plans for the book. A banquet at the Tea Room ended a hectic year of both problems and good times.

The IFC, composed of over 1300 brothers, was a forum where greeks could present their views to the community. It sponsored Oktoberfest and Greek Week, regulated rush, and published "The Olympian," the greek newspaper. And it raised thousands of dollars for charity over the year.

The IFC played a big role in developing the new social policy and carrying it out in its first year. The position of Judicial Chairman was added to the Executive Council, better enabling student problems to be handled by students. Panhel was added to the "Olympian," providing better coverage of greek life.

R. VanBenSchoten, H. Goldstein, E. Stark, G. Pan, T. Briggs.

Gryphon Society

The RHC was the student governing body of the Residence Hall system. It was responsible for campus wide programming among students in residence halls.

Some programs sponsored by the RHC included the fall and spring parties on the U.C. lawn, the annual suitcase party, and alcohol awareness week. The RHC also sponsored a comedian for the Laugh Off during Lehigh/Lafayette Weekend, and the Big Band Springfest (co-sponsored with SAC) during Greek Week.

Residence Halls Council

Visiting Lectures Committee

Behind each speaker the Visiting Lectures Committee brought to campus was time, sweat, and detailed planning. The payoff came with the results. Such names as F. Lee Bailey and Vincent Price illustrated the devotion and talent of this organization.

The committee generated a list of names which were tested in a poll sent out to a random sample of students. These names, together with people known to be touring, were contacted through agents. Times were arranged, topics discussed, contracts written. But the work didn't stop when the contract was signed. The speaker had to be promoted. Sound systems had to be planned, rooms reserved, and transportation worked out. Much work was involved, but when a speaker approached the platform and the audience gathered in a hush, all the work melted into a glow of satisfaction.

Forum

Student Activities Council

Providing alternatives to the Hill social life was one of the most important contributions of the Student Activities Council. Every weekend was highlighted by the movies shown in Packard Lab; the selection included **Beverly Hills Cop**, **St. Elmo's Fire**, and **Rocky IV**.

Crowds filled the Lehigh Cafe on Thursday nights to watch Hourglass performances. On SAC night, held on September 11, Grace Lounge was swarming with campus organizations trying to attract new members. Meanwhile, comedian Mark Weiner performed for a packed audience. He was best known for his appearances on David Letterman and HBO.

The group Sync, winner of

the SAC talent contest the semester before, performed on November 14 to another full crowd. SAC also presented the comedy kick-off concert before the bonfire on Lehigh-Lafayette weekend.

On February 8, SAC hosted its first Nitecap, a cafe-style coffeehouse held in the Blue Lounge of Taylor College. It was part of the "Big Chill Weekend" winter carnival.

Closing SAC news did not concern entertainment, though. Elections that took place on April 9 and 10 were invalidated due to suspected ballot fixing. Though 1400 ballots were cast, fewer students had voted. Elections were held again on April 21 and 22.

Football Cheerleading

PLAYERS

Sometimes it seemed as though athletics were as essential to Lehigh life as academics. And from fresh perspectives, they were.

Players were not out to win by themselves; victory was a team effort. But a team could be successful only if its members learned how to unite. Only then could players accept defeat or celebrate victory.

Yet, players were not the only ones who learned how to celebrate. Spectators were essential to a team's success. In a sense, they were players themselves, cheering a team to victory or supporting them in defeat.

And there was plenty to cheer about in an exciting year of athletics. The Engineers

won in college football's most played rivalry as they punted the Birds off the field. Three wrestlers brought home individual titles from the BMAA tournament in March. A burning issue around campus was the survival of "need-based" scholarships for wrestlers. For the first time, the Engineers played Lafayette in basketball, starting another tradition. And the ladies brought home their first ECC title. The men's swim team had their best season ever, as the women's team broke records with every stroke. Lehigh's best kept secret, the rifle team, finished with an impressive winning record, and women's tennis won its fourth consecutive ECC title.

Despite the Engineer's efforts, it was a **Repeat Performance**

Coming into the 1985 season, the Engineers had hoped to improve their 1984 season's disappointing record; despite their efforts, they repeated the same 5-6 record of the previous year. However, important victories over Delaware and Lafayette and some excellent individual performances highlighted the season.

The Engineers opened the '85 season with a high scoring victory over Indiana University of Pennsylvania. Senior quarterback, Marty Horn, worked closely with fellow senior wide receiver Rennie Benn to score five of the Engineer's six touchdowns. It was an especially rewarding game for Benn who was honored by the Maxwell Club of Philadelphia as its college player of the week. After the Indiana game, he was also ranked number one in receiving and number two for an all-purpose yardage of 266 yards in Division I-AA. Horn was ranked number one in total offense and number two in passing offense.

In the second game of the season against the University of Con-

nnecticut, the gridders were handed their first defeat. After falling behind in the third quarter the Engineers came back strong in the fourth, only to lose by four points. This game proved to be particularly frustrating because the Engineers missed several key plays.

Lehigh then went on to defeat Princeton. Freshman tailback Lee Blum proved himself to be a key to Lehigh's offense by rushing 85 yards and scoring a touchdown. Sophomore kicker Mike Beattie also kicked two field goals to help the gridders in their win over Princeton.

With a winning record of 2-1, the Engineers traveled to Colgate. The Horn-Benn combination provided Lehigh with two touchdowns, but that just wasn't enough to defeat Colgate.

The following week, the gridders slipped once again by losing to nationally ranked Rhode Island. The Engineers were leading in the first half, but they were not able to hold Rhode Island back from winning.

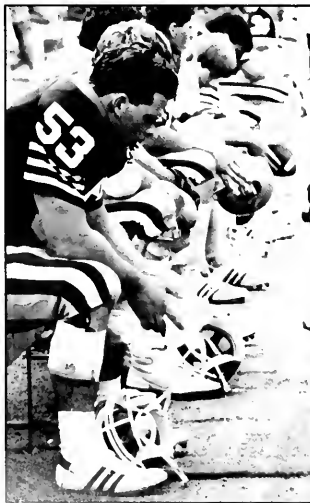

In the game against New Hampshire Matt Cichocki, Mike

Muchowski, and Jeff Supp led the defense with 19, 15, and 13 sacks respectively, but the offense was unable to put enough points on the board for a victory.

The Delaware game proved to be one of the more exciting games of the season. The gridders defeated one of their biggest rivals. In the first half Delaware was ahead 14-3, but Lehigh fought back to win by two points. A strong force in the game was Beattie who kicked three field goals.

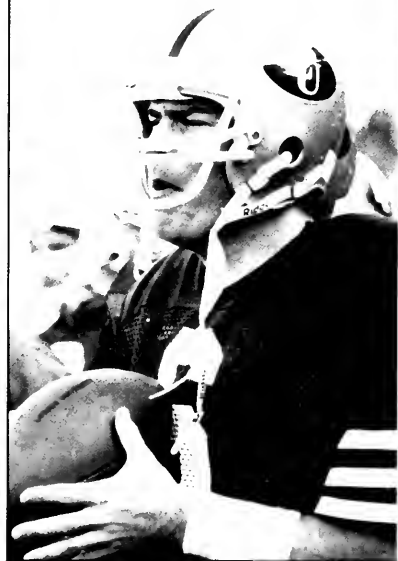

Taylor Stadium was packed on Parent's weekend for the William & Mary game. All hoped to see Lehigh pull off another win. At half-time the two teams were tied 17-17. William & Mary then went on to defeat Lehigh. Although this marked another loss for the gridders, it was a successful game for some key individuals. Horn hit 37 of 62 passes for 411 yards and had a pair of touchdowns. He also set two school records in one game — the most completions and the most attempts in a single game.

An added highlight to the past season was the fact that some Lehigh gridgers may turn pro. Rennie Benn, who was expected to be drafted in the seventh round ended up signing a free agent contract with the Los Angeles Raiders. Defensive tackle Jim Rovito was signing with the

Seattle Seahawks. Quarterback Marty Horn was scheduled to sign as a free agent with the New York Giants. With the possibility of three players going pro it was evident that the Lehigh football tradition was a winning one.

Repeat Performance

game, the Engineers had hoped to gain a victory for themselves, but their hopes were dashed as West Chester University defeated them. Jeff Supp and Glenn Comisac led the Lehigh defense with 11 and 8 tackles respectively.

On a cold rainy day the gridders travelled to Lewisburg, Pennsylvania to play the Bucknell Bison and blanked their opponent. Horn completed 12 of 19 passes for 140 yards and eclipsed his one season records, all set last year, for attempts, completions, and yardage. Freshman Lee Blum gained 189 yards on 32 carries recording the best rushing day by an engineer since 1973. For this feat he was chosen ECAC DIV I-AA co-rookie of the week.

The Lehigh-Lafayette game was the 121 first renewal of college football's most played rivalry. Lehigh's quarterback, Marty Horn, completed 19 of 24 first half passes for 226 yards and two touchdowns, as the Engineer's took a commanding 24-7 lead by halftime. Marty

Horn who was voted the game's MVP by the media finished with 22 for 36 for 263 yards and two touchdowns. He became the second man to win the Lehigh-Lafayette game MVP on two occasions. He

also won it as a sophomore in 1983. Lee Blum gained 78 yards on 30 carries to further aid Lehigh in their victory.

and Ilana Zablocki

One On One

Teammate Chris Sapsis spoke with seniors Rennie Benn and Todd Melton about their football careers.

Rennie Benn

Chris Sapsis: What do you have planned for the future?

Rennie Benn: I'm going to see what happens... go with football 100% and give the pros a shot. If nothing happens then I'll go into the business field, most likely financial marketing.

CS: Catching a touchdown pass in the senior bowl must have been an exciting event. How do you feel about it and how much attention did you receive as a result?

RB: Personally, it was a big thrill, especially coming from a small school. It was especially good for Lehigh because of all the exposure the school got since I was the only player from Lehigh to ever play in the Senior Bowl. The exposure helped me with scouts in that I got a chance to show what I could do.

CS: What was your best game this season?

RB: I would say the best game for me was Indiana because I scored five touchdowns and set a few records. We needed the win; it kind of got the ball rolling for the rest of the season.

CS: How do you feel about Coach Whitehead's

resignation?

RB: Well, Lehigh football has lost a great coach. It's a great opportunity for him, taking the job as Athletic Director. Lehigh football will miss him. I was fortunate to play for him, I learned a lot from him.

Todd Melton

Sapsis: Will you miss playing or are you ready for something else?

Todd Melton: I will definitely miss it. Everytime I walk past the stadium I remember the games there. I really miss the atmosphere and the excitement. It's something I will always remember. And being an electrical engineer, practice was the easiest part of my day. I could take a break from classes for awhile. It was a regular part of my day.

CS: What did scouting camp in New Orleans do for you?

TM: The scouting camp allowed me to equate with the best receivers in the nation and show that I could compete with them. It showed me what I was up against.

CS: Do your future plans include football?

TM: No one comes to Lehigh to be an EE and expect to play football, too. If the opportunity comes for the pros I'll make the best of it, but it won't bother me if that falls through. Afterall, I am an EE.

The Cross Country teams were almost **Running On Empty**

The Men's Cross Country team had its eyes set on a bright 1986 season with returning lettering juniors Ed Kehoe and John Marian as the leaders of the pack. The tide turned quickly though when Kehoe suffered muscle problems and Marian's cyatic nerve caused major problems for him. However, coach John Covert was able to keep the engineers' hopes high. His runners held great respect for him. As sophomore Bill Globerman said, "He'll give you time, if you give him time." Tom Vancor received the John Maxwell award for having the best record.

The Women's Cross Country team started their second varsity season with a winning finish in their meet against Cedar Crest, led by seniors Susan Kotek-Captain and Kristen Myhre. Both Myhre and Kotek were top runners on the team. Myhre ran the Boston marathon with an impressive finish of just over three hours and thirty minutes, while Kotek maintained the season's best record and received the Women's Cross

Country Award.

The main transition of this season was adjusting to new coach Mark Will-Weber. Will-Weber proved to be a knowledgeable coach and a bright spot for women's cross country. In addition to his coaching

duties Will-Weber was a sports writer for the Allentown Morning Call. Although Kotek and Myhre's leadership will be missed, Will-Weber's guidance should run the team into a successful '86 season.

Front Row: K. Pearson, B. Globerman, K. Kunsman, D. Andrews, A. Croly, J. Marian. **Second Row:** Coach Covert, A. Pennet, T. Lee, J. Kent, T. Vancor, K. Clocca.

In five of its games, the soccer team was **So Close To Victory**

The story of the **soccer** team was a tale of one goal. The kickers lost at least five games by the score of 2-1. They just could not find the firepower to put them on the winning side.

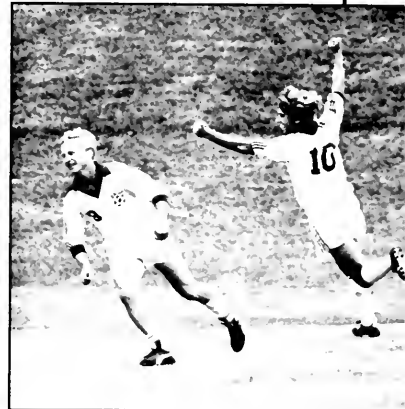

Yet, second year coach John McCloskey was able to see the team bring home the Mayor's Trophy by defeating Moravian 2-1 in the annual game. Freshman Eric Frary scored both goals; one in each half. Eric Sejourne, the goalkeeper,

was able to keep the Greyhounds to just one goal. The returning letter winner was recovering from an elbow injury.

Not surprisingly, dedicated team member Dan Donovan won the W. Richard Goat Memorial Cup which went to the player who best displayed selfless and inspirational leadership. High scorer Jeff Armor was awarded the John W. Morrison Trophy as the most valuable team member.

For the lady stickers, athletics and academics were

The Perfect Combination

The ladies field hockey team dropped to an even 10-10 mark this season. It was a rookie season for first year coach Mary Beth Holder. A big highlight of the season was a victory over ninth ranked Temple before facing East Coast Conference tournament play.

Lehigh hosted the ECC tournament on the Murray Goodman campus. The engineers were notoriously tough in ECC competition as they proved once again. Junior forward, Cheryl Miller emerged as a team leader flanked by tri-captains Dodi Lucarelli, Mary Ann Way, and Mary Weiner. The stickers beat Drexel and advanced to the ECC semifinals. There, the Engineers met Delaware who was undefeated in ECC play allowing only one conference goal. Although the engineers had beaten Delaware twice in previous ECC championship play, they were unable to hold back the Blue Hens this time.

The stickers turned in excellent performances off the field as well. Senior Mary Ann Way received the Eastern College Athletic Conference Award for outstanding

scholarship and athletic prowess, as well as being voted the team MVP. The team's academic performance did not end with Way, though. The ladies earned the A.C. Zettlemoyer triple "A" award for academic and athletic achievement. They easily

met the requirements of having a minimum of six letter winners as well as being the athletic team with the highest GPA. They were truly a success in Lehigh's athletic realm.

Front Row: P. Lee, K. Hynes, M. Weiner, M. Way, D. Lucarelli. **Back Row:** Coach M. Holder, J. Pickens, I. Walter, L. Harkrader, C. Juliana, C. Miller, R. Ervin, J. McElwreath, B. Schmidt, G. Thistle.

Members of the Rugby Club were

Powerhouse Players

The Rugby Club began the season with a good outlook and a win over the University of Pennsylvania followed by a close loss to the Whitemarsh Men's club. Unfortunately, losses against Lafayette and Princeton in the conference cost the Lehigh team a bid in the national tournament. However, these losses were due to penalties; all opposition points were from penalty kicks.

Lehigh bounced back with a major win against undefeated Penn State, the defending Western Pennsylvania Conference Champs. Lehigh was losing late in the game when co-captain Charlie Crowley scored on a five meter run. Richard Greed iced the game with a 20 meter penalty kick.

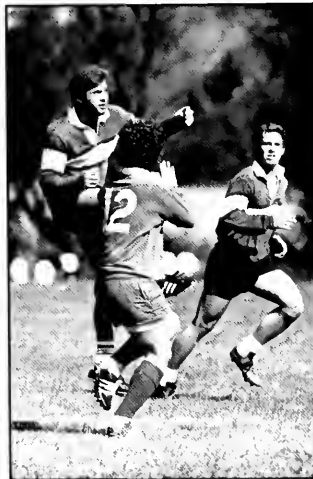

The addition of Wales' Joe "Fire Marshall" Hanely helped to solidify the Engineer's front three in the spring. Greg Heard gave the Brown and White a definite offensive threat. Co-Captain Frank Dickson was an

enthusiastic leader on the wing. Dickson was able to make the open field breaks to help open up the offensive threats on the wing. Junior stand outs Jim Ash, Bill Jones, and Adam Hess gave the Engineer's an advantage for next season. Seniors Mark Dunsheath, Doug Gaffney, Duane Kotsen, and Greg Bunting were blood and fire for the ruggers. The sophomores Kevin Black, Dave Dibrigida, and Dave McFall brought new life to the Saucon Valley fields. Decisive wins over East Stroudsburg gave another bright season.

One of the season's highlights was the Bucknell tournament. Many new players had to play on the "A" squad, but the Engineer's rolled over the opposition 34-0 against Alfred University, 35-3 against Bucknell. After suffering losses to Lafayette and Penn State the "A" squad rebounded and tied the eastern runner up West Point. This was the kind of rugby that the engineers were capable of playing.

Greg Heard gave the engineers the try to tie after the scrum dominated the entire game. Costa Dovanos was happy to end the season with this game.

With losing records, volleyball and squash kept **Spiking And Swinging**

The Women's Volleyball team began the season under the guidance of a new coach, Donna Koehler. It was a big transition for the team. The women spent much of the time on the road while competing in several tournaments. They traveled as far as Connecticut for the Connecticut State Tournament where the engineers had the opportunity to face a wide variety of opponents. At the tournament, they played teams from larger schools as well as teams such as C.W. Post, against whom they had never competed. Although the women sported a losing record of 12-25, their record failed to represent their true ability. Many of the matches were lost by a few points in the final game. The Engineers were able to take Drexel, the eventual ECC champs, to five games in the first round of the ECC tournament. The ladies did not lose any seniors and expected a promising recruiting class for next season. Co-Captains Maureen McPartland and Judy Ryan will return to provide leadership. McPartland was recipient of the most valuable player award from the Allentown Alumni Club this past season.

The Men's Squash team completed its season by finishing 30th in the NCAA tournament hosted by the University of Pennsylvania.

Alf Kennedy and Bruce Craig led the squashers by advancing to the quarter finals of the consolation bracket. Coach Mark Nesbet said, "Alf probably played the best he has all season."

The mighty wrestling team continued

The Winning Tradition

The Engineer Wrestlers did everything except bring home the team title at the Eastern Intercollegiate Wrestling Association Championships in March. The matmen fell one and a half points shy of the Naval Academy. The tournament was one of the most exciting ever, with the team title being decided in the final round.

The Brown and White brought home three individual titles and qualified six men for the NCAA tournament. Bernie Brown's performance was the highlight of the tournament. The senior pinned his first two opponents in the first period, a feat which earned him the Sheridan Trophy for the most falls in the least time. Brown then beat third-seeded Rich Pilkington of Columbia in the semi-finals for a rematch against Andy Schwab of Syracuse. Beating Schwab, Brown won his second Easterns title by a score of 3-2.

Pete Yozzo, junior, owned the 142 weight class and received the Most Outstanding Wrestler Award. He hammered four opponents and clinched one of the top three seeds at Nationals when he crushed Ted Lewis of William and Mary in the finals by a score of 18-5.

Captain Paul Diekel also breezed through his weight class. Beating Lelan Rogers of Syracuse in the finals, Diekel received his third EIWA title in three tries. He was also the recipient of the John Fletcher Trophy for most career EIWA points.

The Engineers sent Chris Mears, Eyvind Boyesen, and Kerry Ritrievi to the NAAs in Iowa as well as their three EIWA champs. Mears had won three bouts before losing in the finals. Boyesen and Ritrievi placed third, earning them automatic bids to the Nationals.

The Engineers failed to bring home an individual title at the

NAAs, but their overall team performance was good enough for ninth place, and first among schools representing the EIWA.

Of the six who qualified at the EIWA tournament, three wrestled their way to at least the quarterfinals. The best performance was turned in by Pete Yozzo, who beat previously unbeaten Darrin Mossing of Ohio University. In a rematch against Joe Gibbons of Iowa, Yozzo showed his ability to pull out the close ones by nipping the Cyclone, 5-4. Though he got within a takedown of tying the match against Iowa's Kevin Dresser, Yozzo lost, 11-6.

Paul Diekel became a three-time All-American by placing fifth at the tournament. Bernie Brown missed All-American when he lost, 9-1. Yet, their impressive finish closed out another winning season.

Winning Tradition

Front Row: A. Hartman, M. Price, J. Frick, P. Yozzo, W. Schantz. **Second Row:** T. Toggas, K. Retrievi, C. Watkins, M. Altland, D. Garner. **Back Row:** Coach T. Turner, J. Turner, P. Diekel, B. Brown, E. Boyesen, J. Reilly.

The wrestling program sparked controversy over **A Question Of Need**

In the midst of a successful season, the wrestling program generated many comments concerning "no-need" scholarships for wrestlers.

In late January, the Forum's athletic scholarship policy ad hoc committee recommended that, within the budget for alumni student grants, coaches' ability to recruit academically qualified wrestlers should not be constrained to the candidate's demonstration of financial need. A few days earlier, the Educational Policy Committee endorsed the opposite view. Thus, the controversy was sparked.

The question was raised in January 1985 on the heels of a poor recruiting drive and in the midst of a disappointing campaign. President Peter Likins approved "no-need" grants-in-aid for wrestlers on a temporary basis for two recruiting years, and set in motion the review of athletic aid policy.

The temporary relaxation of the need requirement allowed wrestling coach Thad Turner to attract

top wrestlers in the weight classes where they were needed most. "There's no question in my mind that it made the difference," Turner said. "Without (the flexibility), we might have gotten one of the three" wrestlers he recruited for this year.

As a class, the new recruits were academically superior to those recruited in the last few seasons.

"Every coach wants the best students he can get," Turner said, adding that no-need aid has allowed Lehigh to attract solid student-athletes who might have gone elsewhere.

At the end of the year, Vice President for Student Affairs Marsha Duncan was left to decide the fate of non-need scholarships. During the trial period, Duncan was to coordinate a study of inter-collegiate athletic programs and associated financial policy. The results of the study and her recommendations were to be in Likins' hands on July 1. The Board of Trustees should then act on Likins' recommendation in the fall of 1986. Duncan explained that the outcome would not be an easy decision to make. "There are valid arguments to be made for doing it both ways," she said.

Reprinted from **Lehigh Horizons** and **The Brown and White**

For men's basketball, it was the start of

New Traditions

The men's basketball team began the season in an unusual way; they played an exhibition game against the Partizan-Belgrade Yugoslavian team at Stabler Arena. It was an interesting match-up with one of the Yugoslavians from their olympic team and several players from the national team. Co-Captain Michael Androlewicz viewed the game as "a way to get first game jitters out."

With a 2-2 record, the Engineers headed to the Amana-Hawkeye Classic at the University of Iowa. There the Engineers successfully kept nationally ranked University of Alabama — Birmingham within ten points. Forward Daren Queenan set a record for the most points scored in a two game series.

After Christmas break, the hoopsters found themselves leading the ECC and capping their biggest winning streak since 1969-70 of six straight wins. At the same time, Queenan and Bill Cheslock shared the spot of leading scorer in the ECC with 18 points each.

In the midst of Lehigh's winning streak, the Engineers were featured on national television as a special feature during half-time of the

DePaul — Notre Dame game. CBS filmed the Engineers on their home court of Stabler Arena on November 15. The segment featured interviews with head coach Fran McCaffery, who was the youngest coach in division I basketball, as well as senior sensations Vernon Doswell and Michael Androlewicz. The highlight of the segment was a Queenan slam dunk.

A big contribution to the hoopster's winning ways was added fan support. Each game was made "official" when the fans bombarded the court with toilet paper when the Engineers sunk their first basket. The entertainment did not stop at the half. The Goosey Gander free-throw and Domino's half court shot would get the fans on the court for a chance to win food prizes. Midget basketball kept the fans cheering as well as getting the community involved.

A big highlight of the season was when the 24th ranked Marquette Warriors visited the Engineers, who went into the locker room with a one point lead at the half. With only 51 seconds left in the game, Daren

Queenan scored his 100th point. He was the first sophomore to reach this plateau. This was in addition to his scoring record of 33 points in a single game, against Manhattan College. He also led the team with 50 steals. This helped make up for the absence of Mike Polaha, who sat the season out after having knee surgery.

Michael Androlewicz received national attention as a top twenty free throw shooter. Queenan and Androlewicz were named to the All ECC team and received honorable mention as All-Americans.

When February hit, the hoopsters began to slide. They ended the season with a 13-15 mark, but the hoopsters played much better than their record reflected. Most of their losses were by one point or in games which ended with a controversial call.

A new tradition on South Mountain was the Lehigh-Lafayette basketball game. The Engineers dunked the Leopards in the first half of the season 82-72. The final game of the season was a rematch between the two teams.

New Traditions

Lafayette edged out the Engineers by one point, but a controversial non-call by the referees sent coach McCaffrey over the brink. The court exploded into a mass of wildly swinging players, coaches and fans. The tempers were quickly brought under control and packed away for next season.

The hoopsters returned to Towson State to defend their ECC championship title. The hoopsters suffered a loss in the first round to Lafayette and were eliminated from the tournament. The spirit remained alive as many disappointed fans

returned to South Mountain full of hope.

The hoopster's season was highlighted with more awards and recognition at the sports banquet. Ken Greene received the Walter J. Messner Memorial Award as the most outstanding junior showing the most improvement. Michael Androlewicz was chosen as the most valuable senior and recipient of the Bruce Thompson Memorial Trophy. The Chi Psi Trophy for most valuable player was awarded to Daren Queenan.

With the ECC title, the ladies could smell

Sweet Victory

The women's basketball team got the chance to end their season with a win. But it was not just any win. The Lady Engineers won the East Coast Conference Championship, defeating Delaware, 72-59, to conclude their season with an incredible 24-4 record.

Guided by head coach, Muffett McGraw, it was the team's first ECC title and the climax to a nine game winning streak. "It's a great ending to a great season," said McGraw. She was disappointed though, about being rejected by both the National Invitational Tournament and the NCAA tournament selection committees.

Led by seniors Cathy Englebert, Liz Feeley, and Shawn Steward, the Lady Engineers became the powerhouse of the ECC. Feeley and Steward were both named to the first all-conference and all-tournament teams. Englebert was recognized as the tournament's Most Valuable Player.

Feeley also held the distinction of being only the second Lehigh women's player to score 1000 points in her career. Shawn Steward was the first to reach the milestone last season. Feeley reached it in the game against Delaware. The moment only added to glorious victory over the Blue Hens, 71-54.

By David Best

For both the men and women swimmers, it was the **Start Of Something Big**

This season, the **men's swim team** swam to their best finish ever. Keeping with the pace of the season, the Engineers executed outstanding performances at the ECC's. One of the most rewarding victories for the team was over Bucknell in the last dual meet of the season. It was the first time in seven years that the Engineers defeated the Bisons. And at the ECC championships, Bucknell was once again the team to beat. Bucknell was able to squeak past the Engineers despite some remarkable individual performances from Lehigh. Leading the way was the outstanding junior Ted Rudel. Rudel had been the high scorer for three years in a row and this year he placed first in the ECC's. Rudel also received the Peter J. Morrissey Trophy for the most outstanding team member.

Moreover, co-captains John Shewell and Bob Gaydos finished in the top three at the championships. Gaydos was awarded the Lehigh Long Distance Cup for being the most improved distance swimmer.

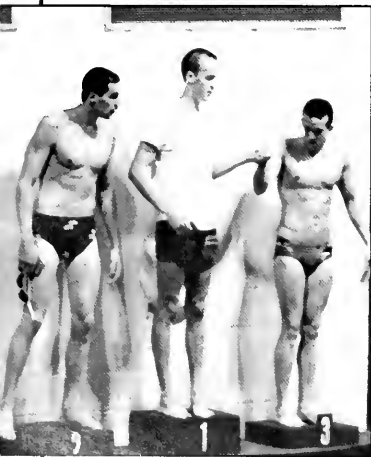

The relay team also managed to break the school record during the ECC's. Rudel, Gaydos, and Shewell placed first, second and fourth in the freestyle event during ECC's; Brookes Clarke, who swam as a freshman here at Lehigh but now swims for Delaware, took third. It was the first time ever that Lehigh swimmers won by sweeping an entire event.

Steve Hiltabiddle, a sophomore, and Phil Titterton, a junior, aided in the winning effort by placing second and third respectively in the butterfly. The swimmers were proud of having their best season ever but were unsure of the future because they are losing eight seniors.

It was a record breaking season for the **women swimmers**. The new freshmen were responsible for all the excitement. Anne Wilkins succeeded in breaking many Lehigh pool records just to have them broken again by standout Gail Jacobs. Jacob's broke 17 pool records as well as four ECC records.

She was also named Lehigh's women athlete of the year. With the addition of Jacobs, Lehigh swimming will never be the same again. Not only did she win, but she did it convincingly with margins of three seconds or more over the second place finisher in all four of her ECC records.

The team was worried about the loss of swimmers Karen Young and Sue Rhoden to co-ops in the beginning of the season but the freshmen proved that they could turn the tide. Even though they swam to their best record in five years it could have been better. The ladies lost three meets by only one point and they rarely swam at full strength. It always seemed that one of the three freshmen sensations Wilkins, Jacobs, or Amy Pickard was out due to sickness. However, they did manage to reset all of the school's relay records. Watch out for the women swimmers; they are going to get even better with age and experience.

Front Row: J. Shewell, K. Hutchinson, B. Gaydos, R. Siepka. **Second Row:** B. Gardiner — coach, L. Sunflower — Asst. coach, H. Sain, C. Mower, G. Weiss, B. Whitney, H. The hockey and rifle teams battled with **Sticks And Guns**

The skaters skid into a slumping '86 season. The team found the guidance of a new head coach, Bob Beck. Once a Lehigh puckster himself, Beck felt at ease on the engineer's home ice, the Allentown ice rink. The icemen lead an unusual and demanding schedule. Practices were held two or three times a week from 10:30 p.m. to 2 a.m. Moreover, games were held at odd times. Most of the Lehigh pucksters came from good backgrounds in organized hockey.

Despite beginning the season with a three game winning streak, the pucksters soon lost track of their winning ways. Senior left wing Scott Wenzel alongside sophomore right wing Dave Dibrigida lead the scoring brigade with 25 and 24 points, respectively. One of the engineers' biggest problems was a lack of depth. Coach Beck lacked the needed talent, from the bench, for the necessary line changes, every few minutes. Varsity ice hockey had been at Lehigh for thirteen seasons, but it seemed the

program was in trouble. Lehigh sports fans could only hope that the icemen will return to their winning ways to keep this from being their final season.

Gratefully, Dibrigida and Wenzel shared the Alexander King Wiggins memorial trophy as Co-MVP's. In addition, junior Dave Sacher received the James R. Quirk Award for outstanding play and sportsmanship.

One of the least renowned sports groups was the **rifle team**. Although the sharp-shooters were rarely in the spotlight, exciting things were going on behind the scenes.

Home, to the team members, was the basement of Lamberton Hall. Because of the limited facilities, the team rarely met their opponents face-to-face. Instead, they competed through "postal matches." Ordinarily, three or four teams competed simultaneously at various locations. At the end of the round, the tallied scores were sent to all participants and a winner was

determined.

The Engineers proved to be successful shooters under coach Sergeant Major Jerry Carden, finishing the season with an impressive 20 and 3 mark. Team captain, senior Michael Swider, was one of the team's leading shooters. He received the most outstanding team member award, the Robert E. Coates Jr. Memorial Trophy, this season. Swider explained that the quality of Lehigh's opponents was first rate. Lehigh competed against several schools that have sent shooters to the Olympics.

Another team leader was junior Michele Diegmann. She set the university small bore (.22 caliber) record of 558 out of 600 shots. Michele ended the season by receiving the MacPhee Varsity Trophy for the best all-around shooter. Rounding out the awards squad was freshman Keith Lutz, the recipient of the Robert F. Dunn R. Freshmen Award.

With the warm weather, the golf and track teams

Spring Into Action

Despite a season shortened by the weather, the mens' **golf** team emerged as winners with a 6-4 mark. They followed up a good regular season with a second place finish at the ECC's which were held on the Engineer's home course, the 72-par Grace Course at the Saucon Valley Country Club. Freshman Jeff Poor and junior Brad McGowan both took medals in ECC competition. They finished fourth and fifth, respectively. To top off the season, Dan Myers was chosen as the most valuable player for which he received the Southern New Jersey Alumni Club Trophy. Myers, the team's captain, turned in a 17th place finish with a score of 169, to tie with teammate Mark Kavulich in the ECC competition.

Lehigh's men of **track and field** came out on top with a 2-1 dual meet record and a fifth place finish in the ECC's. In both the regular season and the ECC tournament, the Engineers were able to defeat Lafayette. Sophomore Wesley Wolfe and senior Jim Kent both turned in first place performances in the ECC's. Wolfe took first in the 400 meter hurdles with a time of 54.67 while Kent won the 800 meter run with a time of 1:55.01. Wolfe also ran on the Engineer's relay team, which placed third, alongside senior Tim Crowley and freshmen David Blake and Chris Haridopolos. In the end, senior Jim Kent received the Philip McGrath Cup as the team's most outstanding runner. Junior Jim Radzelovage, who placed second in the hammer throw and fourth in both the shot put and discus, was awarded the Theodore H.H. Meyer Cup as the team's most outstanding performer in field events.

With impressive records, the tennis teams were

Making A Racket

Senior co-captain Eric Galcher was the outstanding athlete of the **men's tennis team**. Going into the ECC's, Galcher was the top seeded men's singles player; coming out, he was the champion. It was his third championship in the final round of ECC championship play. Galcher teamed up with junior Rich Katsoff to place second in the ECC doubles competition. Off-court, Galcher was a dean's list, industrial engineer and scholarship chairman of Lambda Chi Alpha. His off-court academics combined with his oncourt record of 62 wins and 19 losses, enabled him to win the Eastern College Athletic Conference Award for outstanding academic achievement and athletic prowess. He had been Lehigh's number one singles player for the past two years. In addition, he was awarded the Fritz Mercur Cup as the most outstanding team member.

The engineers **women's tennis team** showed impressive records of 9-2 and 9-1 in their fall and spring seasons respectively. The women netted their fourth consecutive ECC championship under the guidance of coach Karen Adams. Coach Adams assumed the post of assistant director of athletics for women's sports of Lehigh in the fall. She was also inducted into Temple University's Women's Hall of Fame.

Another guiding force in the team's winning character was senior standout Kris Yuracko. Kris began the season winning 14 of her first fifteen matches and she ended the spring season with a 10-0 mark. In the Middle States Tournament, Yuracko teamed up with senior co-captain Gail Brennan as the number one doubles team. They made it to the semi-finals before suffering a loss. Lehigh showed an impressive fifth place out of 23 at the middle states tourney. In addition to her outstanding performance with

Yuracko, Brennan sported a nearly perfect season of 9-0 in the fall and 9-1 in the spring. She was also the recipient of the Margret B. Savic Women's Award for the most valuable player. The lady aces will also be sacrificing senior doubles player Margot Garant. Garant teamed up with junior Denise Durando in the fall for a 13-1 record while in the spring she doubled with junior Donna Armenio to net a 5-1 mark. Even with the loss of the three seniors the Engineers have plenty of talent and experience to rack up another ECC championship. Hopes are riding on the comeback of junior Beth Dale who lost her number one single spot in the spring due to a knee injury. Donna Armenio, Jamie Cohen, and Holly Stas should be able to pick up the slack, and with coach Adams, winning should be no problem for these ladies.

K. Yuracko, D. Armenio, B. Dale, M. Garant, Coach Adams, J. Cohen, G. Brennan, D. Durando.

Dismal outcomes had baseball and softball

Setting The Wrong Records

Disappointing was the only word for Lady Engineers' **softball** season. The ladies ended up with a 3 and 24 record. 24 losses was the most ever suffered in one season. Of the Engineer's three wins, two were in ECC games. Unfortunately, they carried a nine game losing streak into the ECC tournament where they came up empty, losing to both Delaware and Drexel.

There is light at the end of the tunnel. Despite senior Marie Bradshaw's .219 batting average, freshmen Ann Cavanaugh and Alicia DiChristina stole the show by batting .256 and .233, respectively. Cavanaugh was also the leading pitcher, recording all three of the team's wins and ending the season with a 3-8 record.

The **baseball** team slid into an all

time slump this season. The Engineers suffered 21 defeats which was the most since 20 defeats in 1982. It was an unexpected turn of events for coach Stan Schultz whose 1984 team won 20 games in a single season, a Lehigh first. Despite carrying a 16 game losing streak into next season, the outlook is promising for our ball players. The bats of freshman Roger Cantor (.365) and junior Tony Rinaldi (.327) with some improvement from the pitching staff should focus the Engineers on a winning '87 season.

However, the team will have to overcome the loss of senior standout Mark Zlock who ended the season with five homeruns and 17 RBI's. Zlock was also recipient of the Bruce Thompson Memorial Trophy for the most valuable senior and the Nannie Lamberton Wilbur Cup and Medal for the best all-around team member.

The Engineers proved that they could win by beating the eventual ECC champs, Rider, during the regular season. The Engineers will have to make winning a habit to gain credibility in the upcoming season.

Strong performances gave the lacrosse teams **Plenty To Cheer About**

Coach John McCloskey's second year proved to be a winning one for the **men's lacrosse** team. The laxers achieved their first winning season in 7 years by finishing 8 and 6. They proved to be especially strong when they wrapped up the season, victorious in their last five starts. Freshman superstar Chris Cameron provided the boost the Engineers needed to become a winning team. Cameron ended the

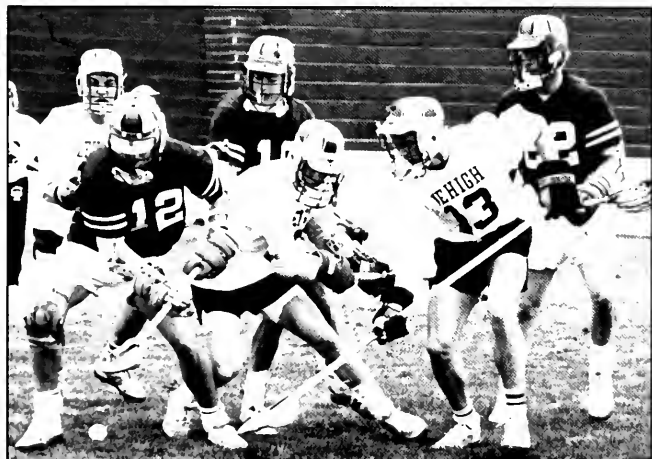

year as the leading conference scorer with 40 goals and 53 assists for a total of 93 points. His records did not stop there. Cameron also lead the conference's points per game statistic with 3.8; nationally, Cameron was number three in points per game. He was also named to the conference's All-Star Team, and was twice named as ECC player of the week. In addition, it looked as if Chris will win All-

American honors.

Seniors Billy Abbott and Parker Carroll proved to be the team's back bone. Abbott's strongest showing was against West Chester where he scored more points than any other Engineer in a single game. He set a new Lehigh record with 9 goals which he followed up with five assists. Abbott ranked third behind Cameron in the ECC's for points per game with 4.2 and fifth in goals per game with 2.7. Abbott ended the year by receiving the honorable Class of 1907 Award for the most outstanding player. Parker Carroll, on the other hand, shed the limelight and assumed a quiet role. He provided the consistency that the Engineers needed to top a winning season. Carroll's efforts paid off when he received the Ernesta Drinker Cup and Medal for the best all-around player.

Finally, rookie goal-tender Mark Belfance was a welcomed addition to the team, playing in every game and amassing a second place ECC ranking for average goals saved of .620.

The ECC's defending **women's lacrosse** champions, the lady laxers, just escaped from a losing season. The ladies ended a four game losing streak by defeating Towson State, Drexel, and Old Dominion in the final games of the season. However, the laxers ended

Plenty to Cheer About

their winning streak by losing in the first round of the ECC's. Senior Cathy Engelbert emerged as the team's leading scorer with 31 goals and 13 assists for 44 points total. She was closely followed by fellow senior Karen Denmark who netted 30 goals with 9 assists for a total of 39 points. Sophomore goalkeeper, Margaraet Corrigan, led the ECC with 256 saves allowing only 146 points for a .606 average.

The real star of the lady laxers was Mary Weiner, a spirited and devoted two-year starter. After leading the team to ECC championships in 1983 and 1984, Mary suffered an injury which kept her off the field for her sophomore and junior seasons. This year, she came back in full force and was named to the ECC All-Star Team. For her efforts, she was awarded the prestigious Mary O. Hurley Award for the women who best exemplified the spirit of sportsmanship. In addition, Mary received the Chuck Hess Award for the team's most valuable player.

SENIORS

The class of 1986 started and ended in the same place. Its introduction to the world of coed dormitories, college academics, and fraternity parties began in August 1982 at the Alumni Memorial Building. There, the new freshmen picked up room assignments and first started meeting their classmates. For four years, the building stood as a reminder that they too would become alumni. On June 1, 1986, amid cheers and

tears, the class graduated, fulfilling the destiny that the building had set for it on that summer day in 1982.

Another class has left, yet its distinction came not just from being the class of 1986. It entered Lehigh as Dr. Peter Likins became the new president. With him, it influenced the campus mood over four years that brought lasting friendships and the memories of both good and bad times together.

RAISING THEIR STANDARD OF LEAVING

The class of 1986 left in grand style. On June 1, Stabler Arena resounded with the cheers and applause of the graduates as they made their last mark on Lehigh.

Many administrators, including President Peter Likins, had feared that the class would act in a disruptive manner as past graduating classes had. In 1985, the sounds of exploding champagne corks caused the graduation ceremony to be stopped temporarily. This year a letter was sent to seniors asking them to

prevent the same occurrence. Plans were made to allow for more personal recognition for seniors during the ceremony. Instead of conferring degrees by colleges, Peter Likins recognized each major, as degree recipients stood and cheered wildly. By no means was the sound disruptive; it proved the spirit and unity of the class on its final day of Lehigh-life.

— continued

THE QUIET MARK OF ACHIEVEMENT

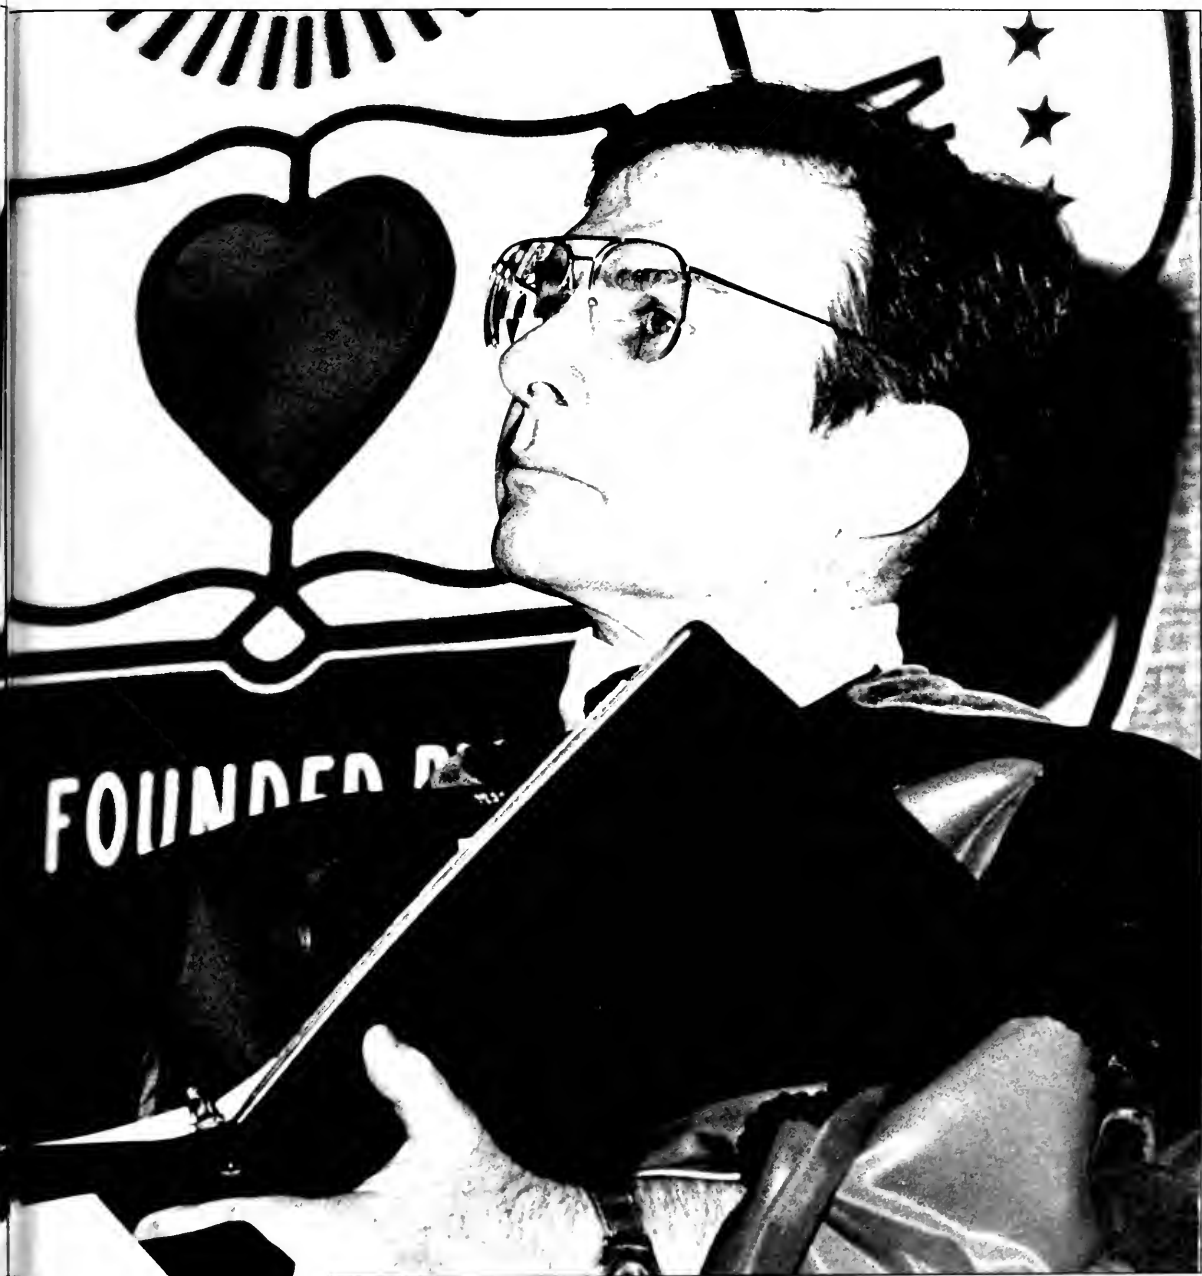

The class of 1986 had also proved its unity with the success of the Senior Class Gift Campaign. Based on the theme "The Seeds of Harvest," the campaign was to raise money for future renovations and improvements to campus.

Under the leadership of Chairman Ken Furst, 110 solicitors persuaded 656 seniors to pledge \$100 over the next five years. The participation of 69% of the senior class made it the most successful campaign in its history.

Dr. Peter Likins, university president, listens as William W. Scranton, III., Lieutenant Governor of Pennsylvania, delivers the commencement address to the graduating class in Stabler Arena.

In Memoriam JEFFREY D. WRIGHT

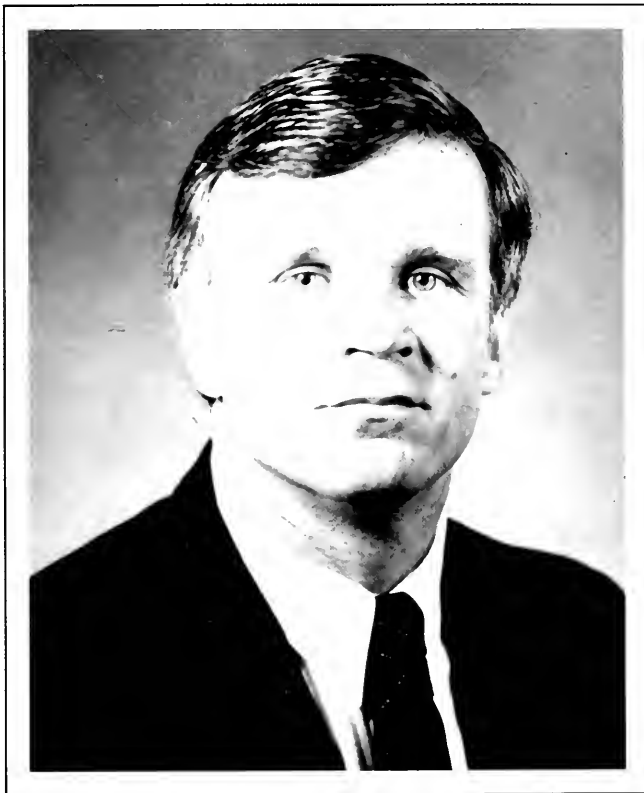

Jef, a member of the class of 1986, studied computer engineering while at Lehigh. He had been named to the Dean's List and was a member of the brass quartet.

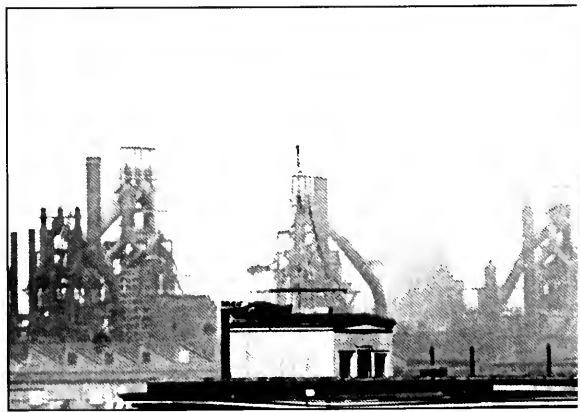

In Memoriam JEANNE ANN CLERY

Each of us is given a world
A world in which to cry,
A world in which to hope,
A world to try to change.
A special world, one that only
you can make
And love, and care for.
No two worlds are alike.
Like your world you are unique
and unparalleled.
We give and take from others.
Your world rests upon mine,
And mine depends upon yours.
Through my life I will
always remember
The chance moments
Of flowing time
When your world became one
with mine

In Memoriam

RICHARD P. GIBNEY

COMMUNITY

The surrounding community became a home that students either loved or hated. But they could not avoid it.

The Tally-Ho Tavern was so popular that it had to be enlarged to hold the crowds. Bethlehem Steel's odor often permeated campus leaving many holding their breaths. In May, a fire in the mill's furnace sent a yellow cloud into the sky.

Yet, the beauty of the Christmas City during the holidays made living in Bethlehem worthwhile.

Lehigh Alumni Clubs

Lehigh camaraderie doesn't end with the last graduation party. There are 66 Lehigh Clubs, and one is probably near you. Like sports? Chances are your club will attend a Lehigh sports event. You can welcome future alumni at freshmen send-offs, share your real-world expertise with undergraduates or broaden your cultural horizons by hearing interesting speakers or touring local places of interest. Many clubs donate some of the dues money to worthy University causes and help out in other ways, such as recruiting and admissions work. The important thing is having fun and being active.

LAST WORDS

I think too much. That's what everyone tells me and it's true. So, now, when I have the chance to tell of my experience as Editor-in-Chief, I'm thinking too hard about what to write, and it's getting me nowhere.

I want to write something that no other editor has written but I think that is impossible. One thing for sure, I don't want to clutter this precious space with a bunch of garbage about all the invaluable advice and support I received from others. It's been a strange year, to say the least, but I'm in no mood to reflect on it with a ton of somber adjectives.

My year as Editor is over. And I am glad. It has been a great experience, but I graduated six weeks ago and I want to relax and enjoy the summer. Being stuck in an office all day while everyone else is outside getting a tan is no fun.

The worst part about this column so far is that I really do sound bitter. But that's the

farthest from the truth. Being editor was what I always wanted. It was my chance to use some talent and to prove my worth by producing, with the help of others, a permanent record of Lehigh. It would be my way of leaving a mark.

Now that the book is done, all I can do is sit back and hope it turns out as good as I hoped. And that's where my anxiety comes from. If this book comes out and people hate it, a whole year will be shot.

I have diligently tried to make this book different from any previous Epitome. I attended a conference with a bunch of other yearbook people and saw what other schools were doing. And I thought Lehigh deserved a book just as nice as the award winning schools. So I worked my ... off, and tried to add a little extra flair, so that people wouldn't just look at it, they'd love to look at it. In the process of doing the book, it truly became a part of me.

I'm not really sure how "Fresh Perspectives" came up as a theme, but as I wrote the opening based on the theme, I began to fear that it just was not working. I didn't want to sound corny, because then no one would ever want to read it again. And a yearbook should not be the kind of thing a person reads once in their life.

Then I realized, even if maybe it wasn't a "fresh" perspective, just my own idealistic opinion of how this school should see itself, that wasn't so bad. What's wrong with finding the spirit or creating a mood? You have to have something to believe in. I chose to find value in the simple beauty of the campus and its history. That's what I was trying to express throughout the book. I hope people like what I've done.

As is expected, there are a few people who deserve special mention for their efforts:

Steve and Donna: Can't say much that other editors haven't already. So, I guess I shouldn't try. You both mean a lot to me and I appreciate your support, especially when my attitude screwed things up. Thanks for putting up with me.

Sharon: Yes, I said the book would be done on time, and yes, the book was done late, but I hope this proves it was not time wasted. We had our disagreements, but my respect for you always remained. I am glad that we had the opportunity to work together. Best of luck as department chairperson.

Linda: You became quite a friend in the lonely days of summer. Thanks for always listening and giving encouragement. I really needed it. I'm going to miss you.

Kellie: OK, so I never got some of the work you owed me, but the book survived. It was totally enjoyable having someone as dedicated as you on the staff.

Wendi: Hey, it was fun. Hope you enjoyed the experience.

Lisa K.: Talk about energy. Thanks for listening when things weren't going right. Which was quite often.

Steve: You gave up the position but you kept coming back. I don't know how this book would have turned out if you left for good. So, do you like the results?

Bill: Hey dude, what's up? It was great working with you. Always remember the convention. Bring an umbrella next time.

Patti: Wow, someone who understood the artistic side of the yearbook. Good luck making next year's book a success.

Sandy: Don't get stuck doing the book in the summer. It stinks, especially if your assistant isn't around to help.

Evan: My right hand man, and great friend. You've had to put up with a lot from me this year. And vice versa. Thanks for all the

help and encouragement. It was oogobs(sp.) of fun. Boy Howdy.

Ellen: Well, we made it. Talk about a good working relationship. Hey, how come no one else wanted to drink at that meeting? Take care of yourself.

Dee: So, what did you think of the Epitome experience? Needless to say, it was great working together, considering it was the only chance we had to do anything. Never thought we'd stay so close, but I am glad we did. Thanks for helping me keep my sanity.

Dean: How's Colorado treating you? Hey, listen, if I never see you again, take care of yourself. No one deserves more happiness or success. Later, dude.

Maria: Near last but not least. I have this feeling that if you weren't by my side throughout the year, I never would have made it. The bear is fine. I love you.

Mom and Dad: I didn't have your support in the beginning, but I think you came to realize how important doing this book was to me. Chances are I'm still living at home as you read this, but someday I will get a good job because of this experience. And Dad, thanks for the inspiration.

I guess all the invaluable advice and support I received wasn't a bunch of garbage after all. It's been a great experience, one which I will miss. I hope that everyone reading this edition has enjoyed it. It don't get much better than this.

COLOPHON

Volume 110 of Lehigh University's EPITOME, 1986 edition, was printed by Hunter Publishing Company, Winston-Salem, North Carolina, using the offset lithography process. The paper used is primarily #80 Gloss with black ink. #110 Kromkote paper is used in the opening sixteen pages.

Cover: The cover, made of Yale Blue Lexotone material, was silkscreened in silver and white. The Epitome logo was designed by Howard Herrera.

Headlines: Gallery — Helvetica Black Italics; Lehighlights, Atmosphere, Campuscope, Spirit — Quadrata; Academics, Companions — Avant Book; Players — Helvetica Black Italics

with subheads in Quadrata. The Campuscope logo, designed by Howard Herrera, was set in Helvetica Black Italics. The Epitome logo was set in Quadrata.

Body Copy: Academics and Companions were set in 10 point Avant Book. All other sections were in 10 point Quadrata except Seniors which was in 8 point.

Spot Color: PMS 293 was used on all dividers except Community, and throughout the first 17 pages.

Photographs: Photographs are the work of Epitome staff photographers. The senior portraits were taken by Merin Studios, 2981 Grant Ave. Philadelphia, PA 19114. Athletic teams were photographed and supplied courtesy of Ryan Studios of Bethlehem.

How quickly the year passed. It seemed that students were unloading their possessions one day and packing up again the next. Of course, it wasn't that way at all.

The events of the year left individual impressions on each person. Students may have thought that they were sharing the same experience, but they couldn't have been. The Lehigh experience was unique to each person who lived it.

The many facets of living the experience sometimes dulled its effect. The pressures of academics, social life, and other responsibilities sometimes clouded the realization that every event really did have special effects on students.

All that was needed was a fresh perspective.
